Explanatory Notes 4-6

Data Issues and Notes on Airline Services..... 7

Highlights – Year ended 8-9

Highlights – Month 10-11

Detailed Monthly Tables

- 1. Scheduled International Air Traffic to and from Australia..... 12-13
- 2. Scheduled Operator Market Shares and Growth..... 14-17
- 3. Airline Passenger Capacity and Utilisation to and from Australia by Operator .. 18-20
- 4. Australian International Airport Scheduled Traffic and Aircraft Movements 21
- 5. Scheduled International Passengers and Freight by City Pairs..... 22-27
- 6. International Airlines Own Stopover Revenue Passengers, Australian City Pairs ... 28

EXPLANATORY NOTES

INTRODUCTION

1. This publication continues the series of monthly publications presenting provisional statistical information on the scheduled operations of international airlines operating into/out of Australia.
2. The figures in this publication were obtained from reports submitted by scheduled international carriers and are the best available at the time of publication.

COVERAGE

3. These statistics show uplift/discharge data – These data detail, by direction, the revenue traffic between the actual points of uplift and discharge within each flight, aggregated for all flights within the period. It shows the movement of traffic between two airports not necessarily directly connected but within the same flight number. Typically, flight numbers change when an aircraft reaches its home country. This means that uplift/discharge data for the port in the operator's home country are likely to be overstated by traffic whose origin/destination point is beyond that port. For example, uplift/discharge traffic reported in this publication as Singapore could include traffic whose origin/destination is Europe.
4. These statistics cover revenue traffic carried by the operators of scheduled regular public international air transport services only and do not include charter traffic.
5. Some airlines (generally, dedicated freighter operators) operate scheduled services into Australia but operate non-scheduled services out of Australia and therefore outbound activity is not recorded in this data collection.

PRODUCTION AND INTERPRETATION

6. Tables 1 and 2 show the country of the relevant uplift or discharge port served by that airline. For example, traffic uplifted/discharged between Sydney and Singapore by British Airways would be shown as Singapore traffic in Tables 1 and 2.
7. Table 3 shows figures for the country of service (or route) for each airline and therefore may not equate to the data in Tables 1 and 2. For example, the British Airways UK service identified in Table 3 could include passengers uplifted or discharged in Singapore or Thailand as well as the UK; these passengers would be shown individually under those countries in Tables 1 and 2. The difference in treatment of data between Tables 1 and 2 and Table 3 is necessary in order to work out a meaningful Seat Utilisation figure for Table 3.

Figures shown in Table 3 may include total traffic into and out of Australia for airlines that fly through Australia (also necessary in order to work out a meaningful Seat Utilisation figure). Therefore, figures in Table 3 may not equate to figures in Tables 1 and 2. For example, passengers carried by Qantas Airways from New Zealand via Australia to the UK will be included in Table 3 but will not be included in Tables 1 or 2 as these passengers were not uplifted/discharged in Australia.

8. Table 5 – shows uplift/discharge passenger and freight data for city pairs with same flight number international flight connections.
9. Where figures have been rounded, discrepancies may occur between sums of component items and totals, and in percentage changes which are derived from figures prior to rounding.

10. Published figures may be revised where figures missing at the time of publication are received or misreporting/miscalculation necessitates revisions.

DEFINITIONS

11. The following definitions have been used in this publication:
- (a) Aircraft Movement: A landing or a take off.
 - (b) Freight: The aggregate of all revenue freight uplifted.
 - (c) Inbound: Inbound to Australia/Australian international airport.
 - (d) Mail: The aggregate of all mail uplifted.
 - (e) Outbound: Outbound from Australia/Australian international airport.
 - (f) Revenue Passengers: please refer to paragraph 12.
 - (g) Seat Utilisation: The ratio of passengers carried to seats available, expressed as a percentage.
 - (h) Seats Available: Generally based on standard aircraft configuration, the aggregate of seats available on all flights operated over a particular service.
 - (i) Services: Scheduled flights over authorised routes which are listed according to the main ports involved.

COMPARABILITY OF DATA OVER TIME

12. Revenue Passengers:

- For July 2000 and onwards: All passengers paying any fare (frequent flyer redemption passengers are regarded as revenue passengers). In most cases, Revenue Passengers will now include all passengers excluding Free Of Charge passengers and positioning crew.
- To December 1999: The aggregate of all passengers paying 25% or more of the standard air fare (as defined by ICAO).
- January 2000 to June 2000: Transition period.

The Revenue Passenger definition change could result in approximately a three per cent increase in passenger numbers over a full period (month or year).

13. Country and City data – reporting of Uplift/Discharge data by Qantas Airways:

- Prior to January 2003: Uplift/Discharge within Qantas Airways' international network.
- For January 2003 and onwards: Uplift/Discharge within flight number – as per the standard definition.

For example, what was previously reported as Adelaide to London (no direct services between these two cities) will now be reported as either Adelaide to Singapore or Melbourne/Sydney to London.

This change has been introduced in order to make the data comparable across all airlines operating services to/from Australia.

The effect of this change – comparing data under the two methods of reporting:

- Country of Port data (Tables 1 & 2) – There will be a shift in traffic to countries such as Singapore which are used as hubs and away from countries such as France, Germany and Italy which previously received traffic channelled through hubs. The total volume of traffic is not affected.
- Country of Service data (Table 3) – no change, as the Uplift/Discharge definition is not applicable to classifying the country of service.

- Australian International Airports (Table 4) – there may be a shift of traffic to the major airports.
- City Pairs (Table 5) – There will be a shift in traffic to cities such as Singapore which are used as hubs and away from cities such as Paris, Frankfurt and Rome which previously received traffic channelled through hubs. The total volume of traffic is not affected.
Prior to the change, statistics reported for city pairs without “same flight number” international flight connections mainly reflected carriage on interconnecting international services by Qantas Airways. That traffic should have been interpreted as increasing the volume of traffic between the primary international ports rather than as an indicator of traffic volumes between ports without “same flight number” international flight connections. It should be noted however, that there was no double counting of traffic.

14. Country of Service classification by Qantas Airways:

- For July 2002 and onwards: based on the foreign country where same flight number services commence or cease – as per the standard definition. For example, Sydney-Denpasar-Singapore services would be classified as Country of Service = Singapore.
- Prior to July 2002: based on Qantas classification – this mainly affected Indonesia and Singapore Countries of Service. For example, Sydney-Denpasar-Singapore services were classified as Country of Service = Indonesia.

15. Airline data – Reporting of code share services:

Reporting of traffic split by airline code for code share arrangements was discontinued as of June 2000. For July 2000 and onwards, ALL traffic carried is reported under the operating airline regardless of code share arrangements.

Monthly airline market share figures for July 2001 onwards will be comparable with the same month in the previous year. However, these figures may not be comparable with monthly data prior to July 2000.

SYMBOLS AND OTHER USAGE

- nil or zero
- .. not applicable

INDEMNITY STATEMENT

The Bureau of Infrastructure, Transport and Regional Economics has taken due care in preparing the information contained in this publication. However, noting that data have been provided by third parties, the Commonwealth gives no warranty as to the accuracy, reliability, fitness for purpose, or otherwise of the information.

DATA ISSUES

Air Austral	Operations between Australia and New Caledonia are shown under Air Caledonie.
Air Vanuatu	All 2010 data is under review. No mail data for August 2007 and onwards.
Cargolux Airlines Intl	No data received for June 2010.
Our Airline & Solomon Airlines	For August 2008 to July 2009, due to code share arrangements, Nauru-Honiara-Brisbane vv services were shown under Our Airlines while Honiara-Brisbane vv services were shown under Solomon Airlines. Passenger numbers reported by Solomon Airlines were apportioned.
Vietnam Airlines	No data received for inbound operations to Sydney for June 2010 also for August 2002 to May 2004, July 2004 to November 2004, January 2005 to March 2005 and May 2005. Data for Outbound operations have been received for July 2003 onwards.

NOTES ON AIRLINE SERVICES

Indonesia AirAsia introduced an additional daily Perth-Denpasar-Perth service. It now operates 3/day services on this route.

Strategic Airlines commenced 2/week Perth-Denpasar-Perth services.

(a) Figures for 2010 are provisional. Please refer to Explanatory notes - paragraphs 3 & 13 in particular.

(b) Scheduled services recommenced December 2007 and ceased May 2008.

HIGHLIGHTS – JUNE 2010

- Fifty-three international scheduled airlines operated services to/from Australia during the month (includes five dedicated freight airlines but excludes airlines operating only via code share arrangements).
- International scheduled passenger traffic in June 2010 was 2.092 million compared to 1.830 million in June 2009 – an increase of 14.3 per cent.
- This follows on month on month increases of more than 9 per cent recorded between September 2009 and March 2010 and more moderate increases of 4.3 per cent in April 2010 and 6.9 per cent in May 2010.
- The chart on the next page compares monthly passenger traffic for the year ended June 2010 with monthly passenger traffic for the year ended June 2009. Passenger traffic for the year ended June 2010 was 25.620 million which is a 9.1 per cent increase over the year ended June 2009.
- Total seats made available on international scheduled operations to/from Australia during June 2010 were 2.828 million – an increase of 8.8 per cent compared to June 2009. The overall seat utilisation percentage has increased from 71.4 per cent in June 2009 to 74.8 per cent in June 2010.
- In terms of passenger carriage, Qantas Airways had the largest share of the market in June 2010 with 19.6 per cent of the total followed by Singapore Airlines with 9.2 per cent, Emirates with 8.5 per cent, Jetstar with 7.8 per cent and Air New Zealand with 7.2 per cent. Compared to June 2009, Qantas Airways' share decreased by 2.1 percentage points, Singapore Airlines' share decreased by 0.2 percentage points, Emirates' share decreased by 0.1 percentage point, Jetstar's share decreased by 0.2 percentage points and Air New Zealand's share decreased by 0.8 percentage points.
- The Qantas group – Qantas Airways (19.6 per cent) and Jetstar (7.8 per cent) accounted for 27.4 per cent of total passenger carriage in June 2010. The group share in June 2009 was 29.7 per cent.
- The share of passenger traffic accounted for by Australian designated airlines has decreased slightly from 34.2 per cent in June 2009 to 34.1 per cent in June 2010. The Qantas group, Pacific Blue (3.8 per cent - excludes services operated under New Zealand designation), Strategic Airlines (0.1 per cent) and V Australia (2.8 per cent) contributed to the Australian airline share in June 2010.
- Low Cost Carriers (LCCs) AirAsia X, Indonesia AirAsia, Jetstar, Pacific Blue, Polynesian Blue and Tiger Airways accounted for 18.5 per cent of total international passenger traffic to/from Australia in June 2010 compared to 16.7 per cent in June 2009 – an increase of 1.7 percentage points.
- International scheduled freight traffic in June 2010 increased by 13.6 per cent over June 2009 to 63 681 tonnes. Inbound freight traffic increased by 19.5 per cent in June 2010. This follows six months in a row of month on month increases of more than 20 per cent and continues the recovery in inbound freight traffic after month on month decreases of more than 20 per cent were recorded for December 2008 to May 2009. Outbound freight traffic increased by 5.2 per cent in June 2010.

Monthly traffic

Please refer to explanatory notes - paragraphs 3, 6 and 13 in particular.

(a) Operations between Australia and New Caledonia are shown under Air Caledonie.

(b) Data for 2010 under review. No mail data for August 2007 and onwards.

(c) Data not received prior to publication.

(d) Service commenced July 2009.

(e) Service commenced July 2009.

(f) For August 2008 to July 2009, due to code share arrangements, Nauru-Honiara-Brisbane vv services were shown under Our Airlines while Honiara-Brisbane vv services were shown under Solomon Airlines. Passenger numbers reported by Solomon Airlines were apportioned.

(g) Service commenced December 2009.

(h) Service commenced June 2010.

(i) Data not received for inbound operations to Sydney for the current month.

Vietnam Airlines (h)	Vietnam	37	3 846	11 642	33.0	37	9 992	11 714	85.3
Virgin Atlantic Airways	UK	30	4 900	9 240	53.0	30	7 035	9 240	76.1
TOTAL		5 835	971 345	1 412 740	68.8	5 837	1 142 836	1 415 515	80.7

Please refer to explanatory notes - paragraphs 4, 5, 7 and 14 in particular.

In addition to the above, please note the following regarding **Seat Factors** shown in this table:

Traffic shown in this table for Qantas Airways will differ from traffic shown in Tables 1 and 2 because of the inclusion in this table of total traffic into and ex Australia (for seat factor purposes) whereas Tables 1 and 2 include uplift/discharge traffic only.

All other airlines report uplift/discharge traffic only. Therefore, for other airlines operating via Australia, the seat factors shown here reflect the total seats on the aircraft but only the Australian uplift/discharge portion of passengers on the aircraft. The true seat factors for airlines that operate via Australia will most likely be higher than what is shown in this table.

For example, on Dubai-Sydney-Auckland services:

Seats on the Dubai-Sydney sector are taken up by Dubai-Sydney and Dubai-Auckland passengers. However, when calculating seat factors, only the Dubai-Sydney passengers are used.

Similarly, seats on the Sydney-Auckland sector are taken up by Sydney-Auckland and Dubai-Auckland passengers. However, when calculating seat factors, only the Sydney-Auckland passengers are used.

The following airlines are affected:

Air Austral and Emirates

(a) Traffic carried via Australia to/from New Caledonia is not recorded and therefore, reported seat utilisation figures are understated.

(b) Operations between Australia and New Caledonia are shown under Air Caledonie.

(c) Data for 2010 under review.

(d) Freight flights only

(e) Data not received prior to publication.

(f) Traffic carried via Australia to/from New Zealand is not recorded and therefore, reported seat utilisation figures are understated.

(g) Service commenced June 2010.

(h) Data not received for inbound operations to Sydney for the current month.

Please refer to explanatory notes - paragraphs 3, 8 and 13 in particular.

**TABLE 6 INTERNATIONAL AIRLINES OWN STOPOVER REVENUE PASSENGERS,
AUSTRALIAN CITY PAIRS: June 2010**

City Pair Route	Total Passengers
Melbourne/Sydney	3 173
Brisbane/Cairns	114
Brisbane/Sydney	28
Brisbane/Melbourne	23
Adelaide/Melbourne	17
TOTAL	3 355

Notes:

1. Own Stopover Revenue Passengers : The aggregate of revenue passengers uplifted at one Australian airport and discharged (excluding transit passengers) at another Australian airport by the same foreign registered international airline on which they entered or left Australia.
2. City Pair Route represents the aggregation of passengers travelling in both directions.
3. This data is additional to the information presented in tables 1-5 which cover only those passengers travelling to/from overseas airports.
