Explanatory Notes ..... 4-6

Data Issues and Notes on Airline Services .....7

Highlights – Year ended ..... 8-9

Highlights – Month..... 10-11

Detailed Monthly Tables

- 1. Scheduled International Air Traffic to and from Australia ..... 12-13
- 2. Scheduled Operator Market Shares and Growth..... 14-17
- 3. Airline Passenger Capacity and Utilisation to and from Australia by Operator ... 18-20
- 4. Australian International Airport Scheduled Traffic and Aircraft Movements .....21
- 5. Scheduled International Passengers and Freight by City Pairs ..... 22-27
- 6. International Airlines Own Stopover Revenue Passengers, Australian City Pairs ....28

# EXPLANATORY NOTES

---

## INTRODUCTION

1. This publication continues the series of monthly publications presenting provisional statistical information on the scheduled operations of international airlines operating into/out of Australia.
2. The figures in this publication were obtained from reports submitted by scheduled international carriers and are the best available at the time of publication.

## COVERAGE

3. These statistics show uplift/discharge data – These data detail, by direction, the revenue traffic between the actual points of uplift and discharge within each flight, aggregated for all flights within the period. It shows the movement of traffic between two airports not necessarily directly connected but within the same flight number. Typically, flight numbers change when an aircraft reaches its home country. This means that uplift/discharge data for the port in the operator's home country are likely to be overstated by traffic whose origin/destination point is beyond that port. For example, uplift/discharge traffic reported in this publication as Singapore could include traffic whose origin/destination is Europe.
4. These statistics cover revenue traffic carried by the operators of scheduled regular public international air transport services only and do not include charter traffic.
5. Some airlines (generally, dedicated freighter operators) operate scheduled services into Australia but operate non-scheduled services out of Australia and therefore outbound activity is not recorded in this data collection.

## PRODUCTION AND INTERPRETATION

6. Tables 1 and 2 show the country of the relevant uplift or discharge port served by that airline. For example, traffic uplifted/discharged between Sydney and Singapore by British Airways would be shown as Singapore traffic in Tables 1 and 2.
7. Table 3 shows figures for the country of service (or route) for each airline and therefore may not equate to the data in Tables 1 and 2. For example, the British Airways UK service identified in Table 3 could include passengers uplifted or discharged in Singapore or Thailand as well as the UK; these passengers would be shown individually under those countries in Tables 1 and 2. The difference in treatment of data between Tables 1 and 2 and Table 3 is necessary in order to work out a meaningful Seat Utilisation figure for Table 3.

Figures shown in Table 3 may include total traffic into and out of Australia for airlines that fly through Australia (also necessary in order to work out a meaningful Seat Utilisation figure). Therefore, figures in Table 3 may not equate to figures in Tables 1 and 2. For example, passengers carried by Qantas Airways from New Zealand via Australia to the UK will be included in Table 3 but will not be included in Tables 1 or 2 as these passengers were not uplifted/discharged in Australia.

8. Table 5 – shows uplift/discharge passenger and freight data for city pairs with same flight number international flight connections.
9. Where figures have been rounded, discrepancies may occur between sums of component items and totals, and in percentage changes which are derived from figures prior to rounding.
10. Published figures may be revised where figures missing at the time of publication are received or misreporting/miscalculation necessitates revisions.

## DEFINITIONS

11. The following definitions have been used in this publication:
- (a) Aircraft Movement: A landing or a take off.
  - (b) Freight: The aggregate of all revenue freight uplifted.
  - (c) Inbound: Inbound to Australia/Australian international airport.
  - (d) Mail: The aggregate of all mail uplifted.
  - (e) Outbound: Outbound from Australia/Australian international airport.
  - (f) Revenue Passengers: please refer to paragraph 12.
  - (g) Seat Utilisation: The ratio of passengers carried to seats available, expressed as a percentage.
  - (h) Seats Available: Generally based on standard aircraft configuration, the aggregate of seats available on all flights operated over a particular service.
  - (i) Services: Scheduled flights over authorised routes which are listed according to the main ports involved.

## COMPARABILITY OF DATA OVER TIME

12. Revenue Passengers:
- For July 2000 and onwards: All passengers paying any fare (frequent flyer redemption passengers are regarded as revenue passengers). In most cases, Revenue Passengers will now include all passengers excluding Free Of Charge passengers and positioning crew.
  - To December 1999: The aggregate of all passengers paying 25% or more of the standard air fare (as defined by ICAO).
  - January 2000 to June 2000: Transition period.

The Revenue Passenger definition change could result in approximately a three per cent increase in passenger numbers over a full period (month or year).

13. Country and City data – reporting of Uplift/Discharge data by Qantas Airways:
- Prior to January 2003: Uplift/Discharge within Qantas Airways' international network.
  - For January 2003 and onwards: Uplift/Discharge within flight number – as per the standard definition.

For example, what was previously reported as Adelaide to London (no direct services between these two cities) will now be reported as either Adelaide to Singapore or Melbourne/Sydney to London.

This change has been introduced in order to make the data comparable across all airlines operating services to/from Australia.

The effect of this change – comparing data under the two methods of reporting:

- Country of Port data (Tables 1 & 2) – There will be a shift in traffic to countries such as Singapore which are used as hubs and away from countries such as France, Germany and Italy which previously received traffic channelled through hubs. The total volume of traffic is not affected.
- Country of Service data (Table 3) – no change, as the Uplift/Discharge definition is not applicable to classifying the country of service.
- Australian International Airports (Table 4) – there may be a shift of traffic to the major airports.
- City Pairs (Table 5) – There will be a shift in traffic to cities such as Singapore which are used as hubs and away from cities such as Paris, Frankfurt and Rome which previously received traffic channelled through hubs. The total volume of traffic is not affected. Prior to the change, statistics reported for city pairs without “same flight number” international flight connections mainly reflected carriage on interconnecting international services by Qantas Airways. That traffic should have been interpreted as increasing the volume of traffic between the primary international ports rather than as an indicator of traffic volumes between ports without “same flight number” international flight connections. It should be noted however, that there was no double counting of traffic.

14. Country of Service classification by Qantas Airways:

- For July 2002 and onwards: based on the foreign country where same flight number services commence or cease – as per the standard definition. For example, Sydney-Denpasar-Singapore services would be classified as Country of Service = Singapore.
- Prior to July 2002: based on Qantas classification – this mainly affected Indonesia and Singapore Countries of Service. For example, Sydney-Denpasar-Singapore services were classified as Country of Service = Indonesia.

15. Airline data – Reporting of code share services:

Reporting of traffic split by airline code for code share arrangements was discontinued as of June 2000. For July 2000 and onwards, ALL traffic carried is reported under the operating airline regardless of code share arrangements.

Monthly airline market share figures for July 2001 onwards will be comparable with the same month in the previous year. However, these figures may not be comparable with monthly data prior to July 2000.

SYMBOLS AND OTHER USAGE

- nil or zero
- .. not applicable

INDEMNITY STATEMENT

The Bureau of Infrastructure, Transport and Regional Economics has taken due care in preparing the information contained in this publication. However, noting that data have been provided by third parties, the Commonwealth gives no warranty as to the accuracy, reliability, fitness for purpose, or otherwise of the information.

## DATA ISSUES

---

<b>Air Mauritius</b>	No data received for December 2008.
<b>Air Niugini</b>	No data received for December 2008.
<b>Air Vanuatu</b>	No mail data for August 2007 and onwards.
<b>Our Airlines</b>	No data received for August 2008 and onwards.
<b>Vietnam Airlines</b>	Data not received for inbound operations to Sydney for November 2008. No data received for inbound operations to Sydney for August 2002 to May 2004, July 2004 to November 2004, January 2005 to March 2005 and May 2005. Data for Outbound operations have been received for July 2003 onwards.

## NOTES ON AIRLINE SERVICES

---

Air Pacific commenced 2/week Nadi/Gold Coast services.

Jetstar commenced:

Daily Brisbane/Darwin/Denpasar services

Daily Perth/Singapore services

Daily Cairns/Tokyo and 5/week Gold Coast/Tokyo services.

Martinair Holland ceased operations to/from Australia.

Pacific Blue commenced 2/week Brisbane/Honiara services.

Philippine Airlines commenced additional 2/week services - it now operates daily services to/from Australia.

Polynesian Blue commenced a weekly Brisbane/Apia service.

Qantas Airways ceased its daily Brisbane-Cairns-Tokyo-Cairns-Sydney and daily Sydney-Cairns-Tokyo-Cairns-Brisbane services.

# YEAR ENDED DECEMBER 2008

(a) Figures for 2008 are provisional. Please refer to Explanatory notes - paragraphs 3 & 13 in particular.

Note that there were some freighter operations in Townsville in March, April and May 2006 but no scheduled passenger operations.

(b) Scheduled services recommenced December 2007 and ceased May 2008.

## HIGHLIGHTS – DECEMBER 2008

---

- Fifty-two international scheduled airlines operated services to/from Australia during the month (includes six dedicated freight airlines but excludes airlines operating only via code share arrangements).
- International scheduled passenger traffic in December 2008 was 2.157 million compared to 2.155 million in December 2007 – an increase of 0.1%.
- November 2008 and September 2008 were the only two months since March 2006 to record a decrease in month on month traffic. January 2008 recorded the highest level of passenger traffic ever carried in a calendar month with 2.207 million.
- The chart on the next page compares monthly passenger traffic for the year ended December 2008 with monthly passenger traffic for the year ended December 2007. Passenger traffic for the year ended December 2008 was 23.443 million which is a 2.9% increase over the year ended December 2007.
- Total seats made available on international scheduled operations to/from Australia during December 2008 were 2.839 million – an increase of 5.6% compared to December 2007 and an increase of 8.6% compared to December 2006. The overall seat utilisation percentage has decreased from 81.5% in December 2007 to 77.4% in December 2008.
- In terms of passenger carriage, Qantas Airways had the largest share of the market in December 2008 with 22.6% of the total followed by Singapore Airlines with 12.5%, Air New Zealand with 9.3%, Emirates with 6.9% and Jetstar with 6.3%. Compared to December 2007, Qantas Airways' share decreased by 2.2 percentage points, Singapore Airlines' share increased by 1.0 percentage point, Air New Zealand's share increased by 0.6 percentage points, Emirates' share decreased by 0.3 percentage points and Jetstar's share increased by 0.5 percentage points.
- The Qantas group – Qantas Airways (22.6%) and Jetstar (6.3%) accounted for 28.8% of total passenger carriage in December 2008. The group share in December 2007 was 30.5%.
- The share of passenger traffic accounted for by Australian designated airlines has decreased from 31.9% in December 2007 to 31.6% in December 2008. The Qantas group, Pacific Blue (2.6% - excludes services operated under New Zealand designation), Airnorth (0.1%), OzJet (0.1%) and SkyAirWorld (0.0%) contributed to the Australian airline share in December 2008.
- Low Cost Carriers (LCCs) AirAsia X, Jetstar, Pacific Blue, Polynesian Blue and Tiger Airways accounted for 14.1% of total international passenger traffic to/from Australia in December 2008 compared to 11.4% in December 2007 – an increase of 2.8 percentage points. Pacific Blue's share of LCCs' traffic has increased from 25.3% in December 2007 to 37.8% in December 2008 while AirAsia X's share of LCCs' traffic has increased from 3.6% in December 2007 to 13.6% in December 2008.
- International scheduled freight traffic in December 2008 decreased by 11.9% over December 2007 to 59 669 tonnes. Inbound freight traffic decreased by 22.4% while outbound freight traffic increased by 2.4%. The decrease in inbound freight traffic is the largest month on month decrease recorded over the last twenty years.

	Total Dec-06	Total Dec-07	Inbound Dec-08	Outbound Dec-08	Total Dec-08	Growth compared to

Please refer to explanatory notes - paragraphs 3, 6 and 13 in particular.

(a) Data not received for December 2008.

(b) No mail data for August 2007 and onwards.

(c) Service ceased March 2008.

(d) Reported as Lan Chile prior to December 2008.

(e) Service ceased December 2008.

(f) Reported as Air Nauru prior to December 2008. Data not received for August 2008 and onwards.

(g) Scheduled services commenced June 2008.

(h) Service commenced March 2008.

(i) Reported as Asian Express Airlines prior to December 2008.

Virgin Atlantic Airways	UK	31	6 981	9 486	73.6	31	8 114	9 486	85.5
<b>TOTAL</b>		<b>5 743</b>	<b>1 023 209</b>	<b>1 419 877</b>	<b>72.1</b>	<b>5 720</b>	<b>1 174 980</b>	<b>1 419 119</b>	<b>82.8</b>

Please refer to explanatory notes - paragraphs 4, 5, 7 and 14 in particular.

In addition to the above, please note the following regarding **Seat Factors** shown in this table:

Traffic shown in this table for Qantas Airways will differ from traffic shown in Tables 1 and 2 because of the inclusion in this table of total traffic into and ex Australia (for seat factor purposes) whereas Tables 1 and 2 include uplift/discharge traffic only.

All other airlines report uplift/discharge traffic only. Therefore, for other airlines operating **via** Australia, the seat factors shown here reflect the total seats on the aircraft but only the Australian uplift/discharge portion of passengers on the aircraft. The true seat factors for airlines that operate **via** Australia will most likely be higher than what is shown in this table.

For example, on Dubai-Sydney-Auckland services:

Seats on the Dubai-Sydney sector are taken up by Dubai-Sydney and Dubai-Auckland passengers. However, when calculating seat factors, only the Dubai-Sydney passengers are used.

Similarly, seats on the Sydney-Auckland sector are taken up by Sydney-Auckland and Dubai-Auckland passengers. However, when calculating seat factors, only the Sydney-Auckland passengers are used.

The following airlines are affected:

Emirates and Royal Brunei Airlines

(a) Data not received for December 2008.

(b) Freight flights only

(c) Reported as Lan Chile prior to December 2008.

(d) Freight flights only, service ceased December 2008.

(e) Reported as Air Nauru prior to December 2008. Data not received for August 2008 and onwards.

(f) Freight flights only, reported as Asian Express Airlines prior to December 2008.

**TABLE 6 INTERNATIONAL AIRLINES OWN STOPOVER REVENUE PASSENGERS,  
AUSTRALIAN CITY PAIRS: December 2008**

City Pair Route	Total Passengers
Melbourne/Sydney	1 806
Brisbane/Cairns	305
Brisbane/Sydney	41
Adelaide/Melbourne	32
<b>TOTAL</b>	<b>2 184</b>

Notes:

1. Own Stopover Revenue Passengers : The aggregate of revenue passengers uplifted at one Australian airport and discharged (excluding transit passengers) at another Australian airport by the same foreign registered international airline on which they entered or left Australia.
2. City Pair Route represents the aggregation of passengers travelling in both directions.
3. This data is additional to the information presented in tables 1-5 which cover only those passengers travelling to/from overseas airports.
