CONTENTS

Explanatory Notes 4-6

Data Issues and Notes on Airline Services..... 7

Highlights 8-15

Detailed Annual Tables

- 1. Scheduled International Air Traffic to and from Australia..... 16-18
- 2. Scheduled Operator Market Shares and Growth..... 19-22
- 3. Airline Passenger Capacity and Utilisation to and from Australia by Operator .. 23-26
- 4. Australian International Airport Scheduled Traffic and Aircraft Movements 27
- 5. Scheduled International Passengers and Freight by City Pairs..... 28-33
- 6. International Airlines Own Stopover Revenue Passengers, Australian City Pairs ... 34
- 7. Total Aircraft Movements at Australian International Airports by Aircraft Types ... 35

EXPLANATORY NOTES

INTRODUCTION

1. This publication continues the series of publications on a calendar year basis presenting statistical information on the scheduled operations of international airlines operating into/out of Australia.
2. The figures in this publication were obtained from reports submitted by scheduled international carriers and are the best available at the time of publication.

COVERAGE

3. These statistics show uplift/discharge data – These data detail, by direction, the revenue traffic between the actual points of uplift and discharge within each flight, aggregated for all flights within the period. It shows the movement of traffic between two airports not necessarily directly connected but within the same flight number. Typically, flight numbers change when an aircraft reaches its home country. This means that uplift/discharge data for the port in the operator's home country are likely to be overstated by traffic whose origin/destination point is beyond that port. For example, uplift/discharge traffic reported in this publication as Singapore could include traffic whose origin/destination is Europe.
4. These statistics cover revenue traffic carried by the operators of scheduled regular public international air transport services only and do not include charter traffic.
5. Flights with no revenue traffic uplifted from Australia or discharged in Australia are treated as positioning flights and are not included in this data collection. This mainly affects dedicated freighter flights where some flights outbound from Australia do not pick up freight in Australia.

PRODUCTION AND INTERPRETATION

6. Tables 1 and 2 show the country of the relevant uplift or discharge port served by that airline. For example, traffic uplifted/discharged between Sydney and Singapore by British Airways would be shown as Singapore traffic in Tables 1 and 2.
7. Table 3 shows figures for the country of service (or route) for each airline and therefore may not equate to the data in Tables 1 and 2. For example, the British Airways UK service identified in Table 3 could include passengers uplifted or discharged in Singapore as well as the UK; these passengers would be shown individually under those countries in Tables 1 and 2. The difference in treatment of data between Tables 1 and 2 and Table 3 is necessary in order to work out a meaningful Seat Utilisation figure for Table 3.

Figures shown in Table 3 may include total traffic into and out of Australia for airlines that fly through Australia (also necessary in order to work out a meaningful Seat Utilisation figure). Therefore, figures in Table 3 may not equate to figures in Tables 1 and 2. For example, passengers carried by Qantas Airways from New Zealand via Australia to the UK will be included in Table 3 but will not be included in Tables 1 or 2 as these passengers were not uplifted/discharged in Australia.

8. Table 5 – shows uplift/discharge passenger and freight data for city pairs with “same flight number” international flight connections.

9. Where figures have been rounded, discrepancies may occur between sums of component items and totals, and in percentage changes which are derived from figures prior to rounding.
10. Published figures may be revised where figures missing at the time of publication are received or misreporting/miscalculation necessitates revisions.

DEFINITIONS

11. The following definitions have been used in this publication:
 - (a) Aircraft Movement: A landing or a take off.
 - (b) Freight: The aggregate of all revenue freight uplifted or discharged in Australia.
 - (c) Inbound: Inbound to Australia/Australian international airport.
 - (d) Mail: The aggregate of all mail uplifted or discharged in Australia.
 - (e) Outbound: Outbound from Australia/Australian international airport.
 - (f) Revenue Passengers: please refer to paragraph 12.
 - (g) Seat Utilisation: The ratio of passengers carried to seats available, expressed as a percentage.
 - (h) Seats Available: Generally based on standard aircraft configuration, the aggregate of seats available on all flights operated over a particular service.
 - (i) Services: Scheduled flights over authorised routes which are listed according to the main ports involved.

COMPARABILITY OF DATA OVER TIME

12. Revenue Passengers:
 - For July 2000 and onwards: All passengers paying any fare (frequent flyer redemption passengers are regarded as revenue passengers). In most cases, Revenue Passengers will now include all passengers excluding Free Of Charge passengers and positioning crew.
 - To December 1999: The aggregate of all passengers paying 25% or more of the standard air fare (as defined by ICAO at the time).
 - January 2000 to June 2000: Transition period.

The Revenue Passenger definition change could result in approximately a three per cent increase in passenger numbers over a full period (month or year).

13. Country and City data – reporting of Uplift/Discharge data by Qantas Airways:
 - Prior to January 2003: Uplift/Discharge within Qantas Airways' international network.
 - For January 2003 and onwards: Uplift/Discharge within flight number – as per the standard definition.

For example, what was reported as Adelaide to London in January 2002 (no direct services between these two cities), would be reported in January 2003 as either Adelaide to Singapore or Melbourne/Sydney to London.

This change was introduced in order to make the data comparable across all airlines operating services to/from Australia.

The effect of this change – comparing data under the two methods of reporting:

- Country of Port data (Tables 1 & 2) – There will be a shift in traffic to countries such as Singapore and United Arab Emirates (from 2013) which are used as hubs and away from countries such as France, Germany and Italy which

previously received traffic channelled through hubs. The total volume of traffic is not affected.

- Country of Service data (Table 3) – no change, as the Uplift/Discharge definition is not applicable to classifying the country of service.
- Australian International Airports (Table 4) – there may be a shift of traffic to the major airports.
- City Pairs (Table 5) – There will be a shift in traffic to cities such as Singapore and Dubai (from 2013) which are used as hubs and away from cities such as Paris, Frankfurt and Rome which previously received traffic channelled through hubs. The total volume of traffic is not affected.
- Prior to the change, statistics reported for city pairs without “same flight number” international flight connections mainly reflected carriage on interconnecting international services by Qantas Airways. That traffic should have been interpreted as increasing the volume of traffic between the primary international ports rather than as an indicator of traffic volumes between ports without “same flight number” international flight connections. It should be noted however, that there was no double counting of traffic.

14. Country of Service classification by Qantas Airways:

- For July 2002 and onwards: based on the foreign country where same flight number services commence or cease – as per the standard definition. For example, Sydney-Denpasar-Singapore services would be classified as Country of Service = Singapore.
- Prior to July 2002: based on Qantas classification – this mainly affected Indonesia and Singapore Countries of Service. For example, Sydney-Denpasar-Singapore services were classified as Country of Service = Indonesia.

15. Airline data – Reporting of code share services:

Reporting of traffic split by airline code for code share arrangements was discontinued as of June 2000. For July 2000 and onwards, ALL traffic carried is reported under the operating airline regardless of code share arrangements.

Monthly airline market share figures for July 2001 onwards will be comparable with the same month in the previous year. However, these figures may not be comparable with monthly data prior to July 2000.

SYMBOLS AND OTHER USAGE

- nil or zero
- .. not applicable

DATA ISSUES

Vietnam Airlines

The split of inbound passenger movements from Ho Chi Minh City and Hanoi to Sydney have been estimated for June 2010 to March 2014. Operations from Hanoi to Sydney ceased in April 2014.

AIRLINES COMMENCING/WITHDRAWING SERVICES DURING 2014

Commencing:

Cebu Pacific Air – Service commenced September 2014.

Ceasing:

Aerolineas Argentinas – Service ceased April 2014.

Virgin Atlantic Airways – Service ceased May 2014.

HIGHLIGHTS – YEAR ENDED DECEMBER 2014

- Fifty-four international scheduled airlines operated services to/from Australia during the year (includes 5 dedicated freight airlines but excludes airlines operating only via code share arrangements).
- International scheduled passenger traffic in 2014 was 33.089 million compared to 31.345 million in 2013 – an increase of 5.6 per cent.
- Chart I shows total passenger traffic for the years 2004 to 2014. Over this period, each year has recorded an increase in traffic compared to the previous year.
- Chart II compares monthly passenger traffic for 2014 with monthly passenger traffic for 2013. March 2011 (-1.6 per cent) was the last time that monthly passenger traffic recorded a decrease compared to the same month in the previous year.
- Chart III shows the airline market shares in terms of passenger carriage for the top ten airlines for 2004, 2009 and 2014. In the latest year, Qantas Airways had the largest share of the market with 15.9 per cent followed by Emirates with 9.7 per cent, Singapore Airlines with 8.7 per cent, Jetstar with 8.3 per cent and Virgin Australia with 7.8 per cent.
- Compared to 2004, Qantas Airways' share has decreased by 13.9 percentage points, Emirates' share has increased by 5.0 percentage points, Singapore Airlines' share has decreased by 1.8 percentage points and Virgin Australia's share has increased by 6.2 percentage points (international operations commenced in January 2004). Jetstar did not commence international operations until December 2005. The decrease in share for the Qantas group (Qantas Airways, Jetstar and Jetstar Asia in 2014 compared to Qantas and Australian Airlines in 2004) was 8.0 percentage points.
- The share of passenger traffic accounted for by Australian designated airlines decreased from 33.1 per cent in 2004 to 33.0 per cent in 2009 and to 30.1 per cent in 2014. Qantas Airways, Jetstar and Virgin Australia (excluding services operated under New Zealand designation) contributed to the Australian airline share in 2014.
- Seats made available on international scheduled operations in 2014 totaled 44.122 million – an increase of 4.8 per cent compared to 2013. The overall seat utilisation percentage (including China Airlines, Emirates and Qantas passengers travelling through Australian ports) has increased from 76.7 per cent in 2013 to 77.4 per cent in 2014.
- In 2014, Low Cost Carriers AirAsia X, Cebu Pacific Air, Indonesia AirAsia, Jetstar, Jetstar Asia, Scoot and Tigerair together accounted for 16.4 per cent of total international passenger traffic. This compares to the LCC share of 14.4 per cent in 2013.
- International scheduled air freight traffic increased by 2.0 per cent to 896 137 tonnes in 2014. Inbound freight decreased by 1.8 per cent to 515 424 tonnes. Outbound freight increased by 7.5 per cent to 380 713 tonnes.
- In 2014, scheduled dedicated freighter operations accounted for 22.0 per cent of scheduled inbound air freight to Australia, 12.4 per cent of scheduled outbound air freight from Australia and 17.9 per cent of total scheduled air freight. Note that some freighters do not pick up freight in Australia and that accounts for the difference in inbound and outbound percentages.
- Table VI on page 13 shows Traffic On Board passenger movements, flights and operated seats at Australian international airports. All traffic is shown against the first

Australian airport for arrivals to Australia and the last Australian airport for departures from Australia. Movements between Australian airports are not accounted for.

- Seat utilisation in 2014 increased at Sydney (1.8 percentage points to 80.2 per cent) and Brisbane (0.9 percentage points) while declining at all the other capital city airports (at Melbourne by 0.1 percentage points, at Perth by 0.3 percentage points, at Adelaide by 1.7 percentage points and at Darwin by 4.6 percentage points).
- Table VII on page 14 shows Traffic On Board passenger movements, flights and operated seats between Australia and the top thirty countries with non-stop air service connections.
- New Zealand, Singapore, United Arab Emirates, Malaysia, and USA were the top five countries in terms of traffic on board passenger movements in 2014. Seat utilisation was highest for Hong Kong with 85.1 per cent followed by Chile with 84.9 per cent and United Arab Emirates with 82.7 per cent.
- Table VIII on page 14 shows Traffic On Board passenger movements, flights and operated seats between Australia and the top thirty international cities with non-stop air service connections.
- In 2014, 15.4 per cent of the passenger movements to/from Australia were either to/from or via Singapore. Auckland was the next largest hub accounting for 13.2 per cent followed by Kuala Lumpur (8.8 per cent), Dubai (7.3 per cent) and Hong Kong (6.6 per cent).
- Page 15 is a diagrammatic representation of Traffic On Board passenger movements, flights and operated seats by region. The region is based on international cities with non-stop air service connections with Australia. In 2014, 40.2 per cent of the 44.122 million seats operated to/from Australia were either to/from or via South East Asia. New Zealand had 19.6 per cent of the total followed by North East Asia with 15.2 per cent.
- The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication.

Chart IV Share of Operated Seats at Australian International Airports - 2014

The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication. The figures above include some adjustments. The data shown here covers non-stop international connections only - it does not include movements between Australian airports.

Please see notes on page 14 as well.

* First port of call for arrivals to Australia or last port of call for departures from Australia.

Table VII Traffic on Board Passenger Movements, Flights and Seats on Non-Stop Passenger Services By Country - 2014

Country *	No. of Flights	Passengers	Seats	Seat Utilisation %

The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication. The total number of flights, passenger movements and seats shown correspond to total passenger services reported in Table 3. Passenger numbers used here for China Airlines, Emirates and Qantas Airways are total carried into and out of Australia. * First country/port of call for departures from Australia or last country/port of call for arrivals to Australia.

TRAFFIC ON BOARD PASSENGER MOVEMENTS, FLIGHTS AND SEATS BY REGION BASED ON NON-STOP SERVICES TO AND FROM AUSTRALIA

SCHEDULED INTERNATIONAL PASSENGER AIR SERVICES – Year ended December 2014

Please see notes on page 14

Please refer to explanatory notes - paragraphs 4, 5, and 7 in particular.

Seat Factors shown in this table:

Traffic shown in this table for China Airlines (from January 2014), Emirates and Qantas Airways will differ from traffic shown in Tables 1 and 2 because of the inclusion in this table of total traffic into and ex Australia (for seat factor purposes) whereas Tables 1 and 2 include uplift/discharge traffic only.

All other airlines report uplift/discharge traffic only. Currently, there are no other airlines operating via Australia, and therefore uplift/discharge traffic is the same as total traffic into and ex Australia for all other airlines.

(a) Service ceased April 2014.

(b) Service commenced September 2014.

(c) Freight flights only.

(d) Our Airline has been re-branded as Nauru Airlines.

(e) Services ceased May 2014.

Please refer to explanatory notes - paragraphs 3 and 8 in particular.

**TABLE 6 INTERNATIONAL AIRLINES OWN STOPOVER REVENUE PASSENGERS,
AUSTRALIAN CITY PAIRS: Year ended December 2014**

City Pair Route	Total Passengers
Melbourne/Sydney	22 760
Brisbane/Cairns	2 828
Adelaide/Melbourne	36
Brisbane/Darwin	5
TOTAL	25 629

Notes:

1. Own Stopover Revenue Passengers : The aggregate of revenue passengers uplifted at one Australian airport and discharged (excluding transit passengers) at another Australian airport by the same foreign registered international airline on which they entered or left Australia.
2. City Pair Route represents the aggregation of passengers travelling in both directions.
3. This data is additional to the information presented in tables 1-5 which cover only those passengers travelling to/from overseas airports.
