

How to reframe transport planning in Australia

Domestic passenger travel per capita

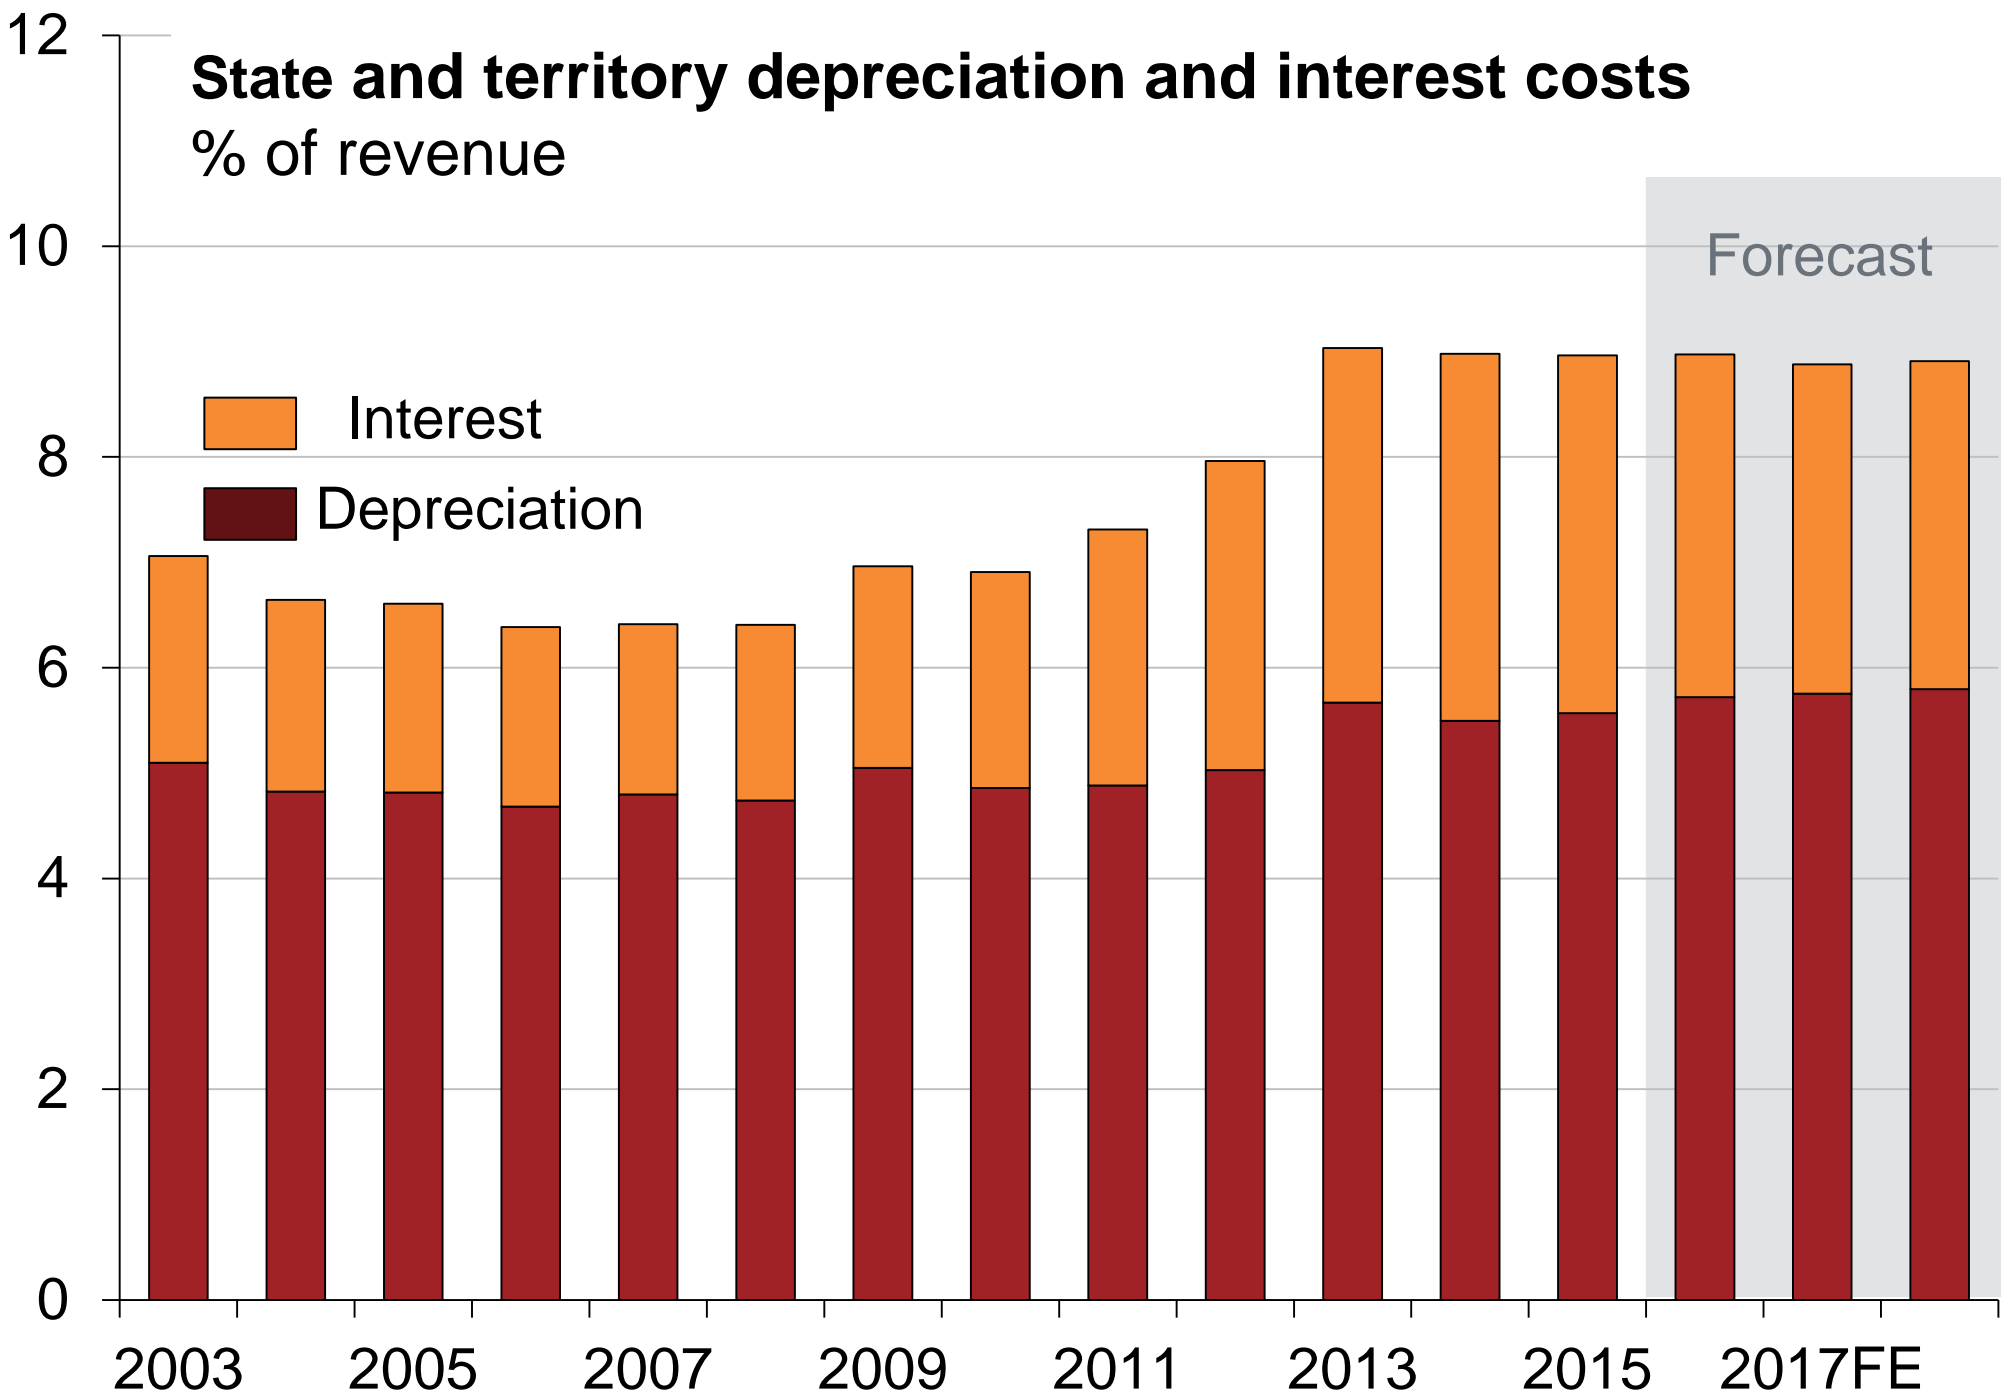

Government spending on transport infrastructure

Engineering construction work done for the public sector, % of GDP

State and territory depreciation and interest costs % of revenue

Last day of the congestion price trial – first day after end of trial – Stockholm 2007

July 31

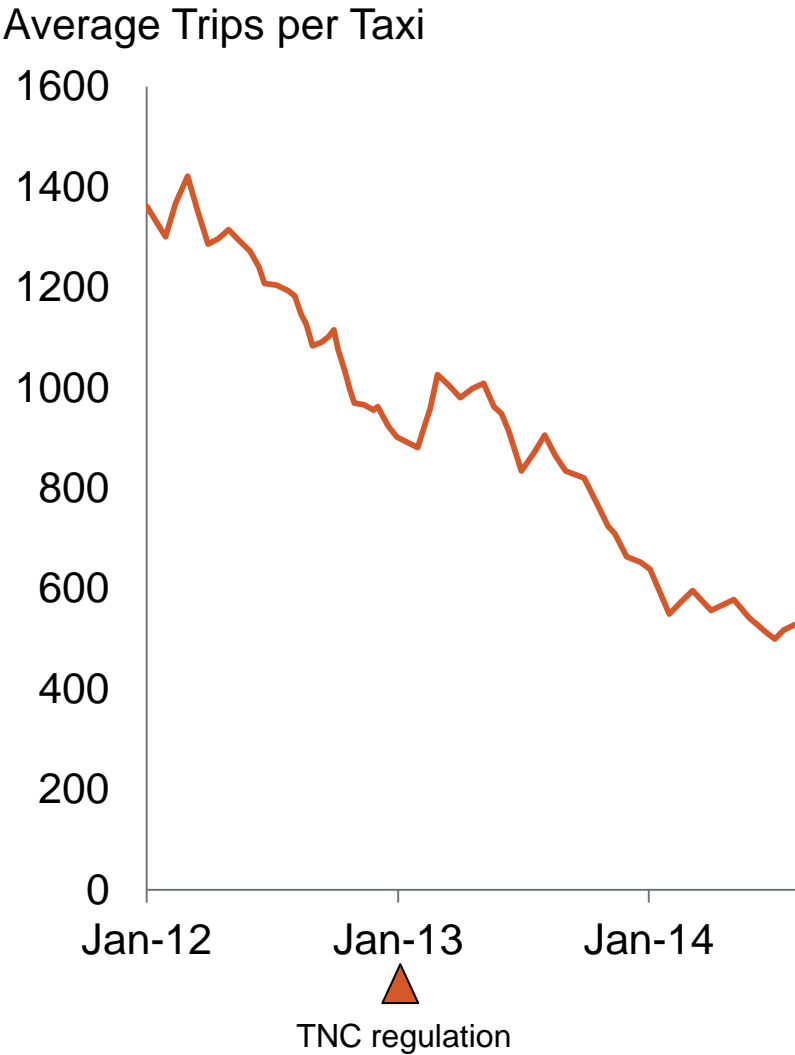

Aug 1

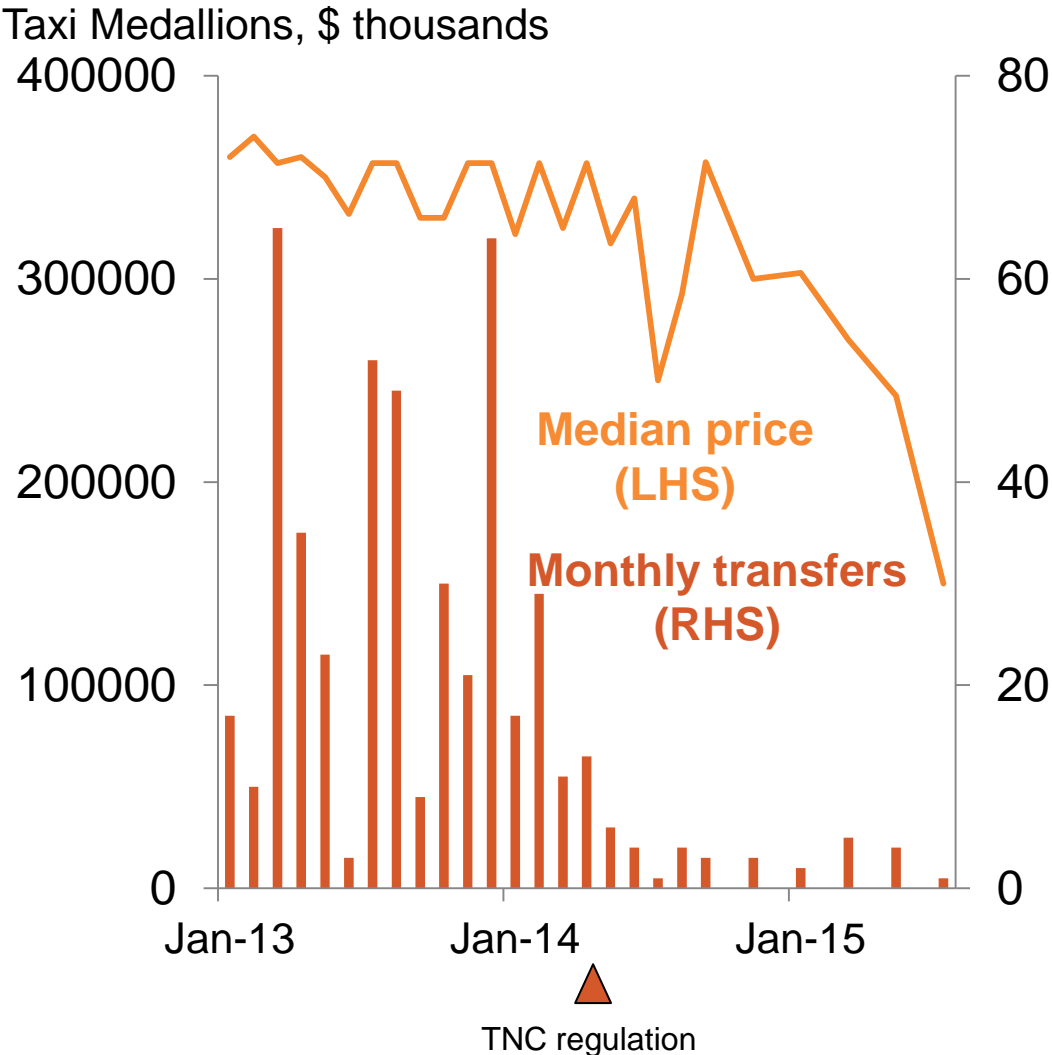

Taxi revenue and licence values fall sharply once ride-sourcing takes off

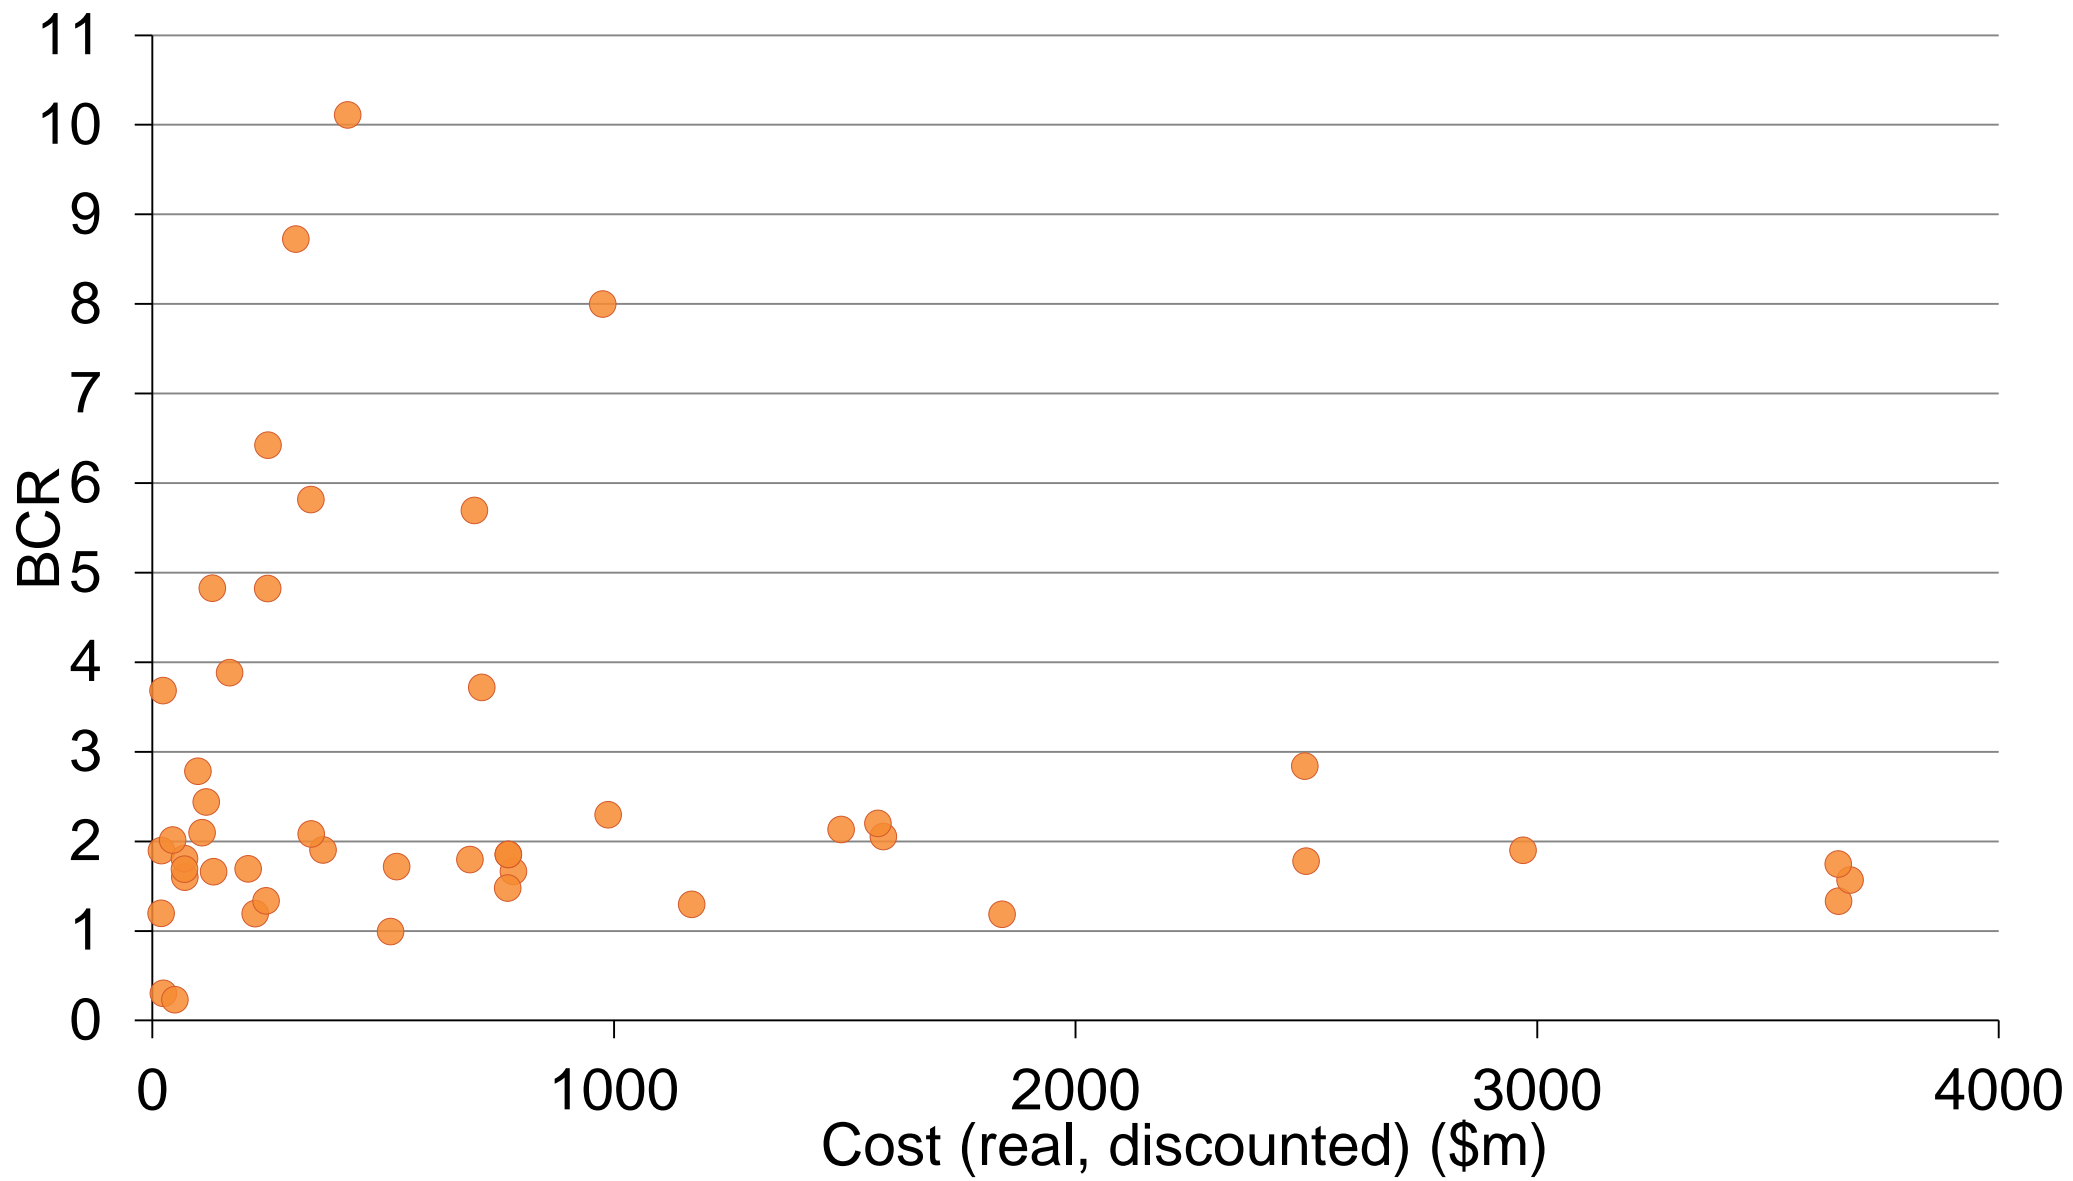

San Francisco

Chicago

Economic returns of smaller schemes compared to larger schemes (projects submitted to Infrastructure Australia)

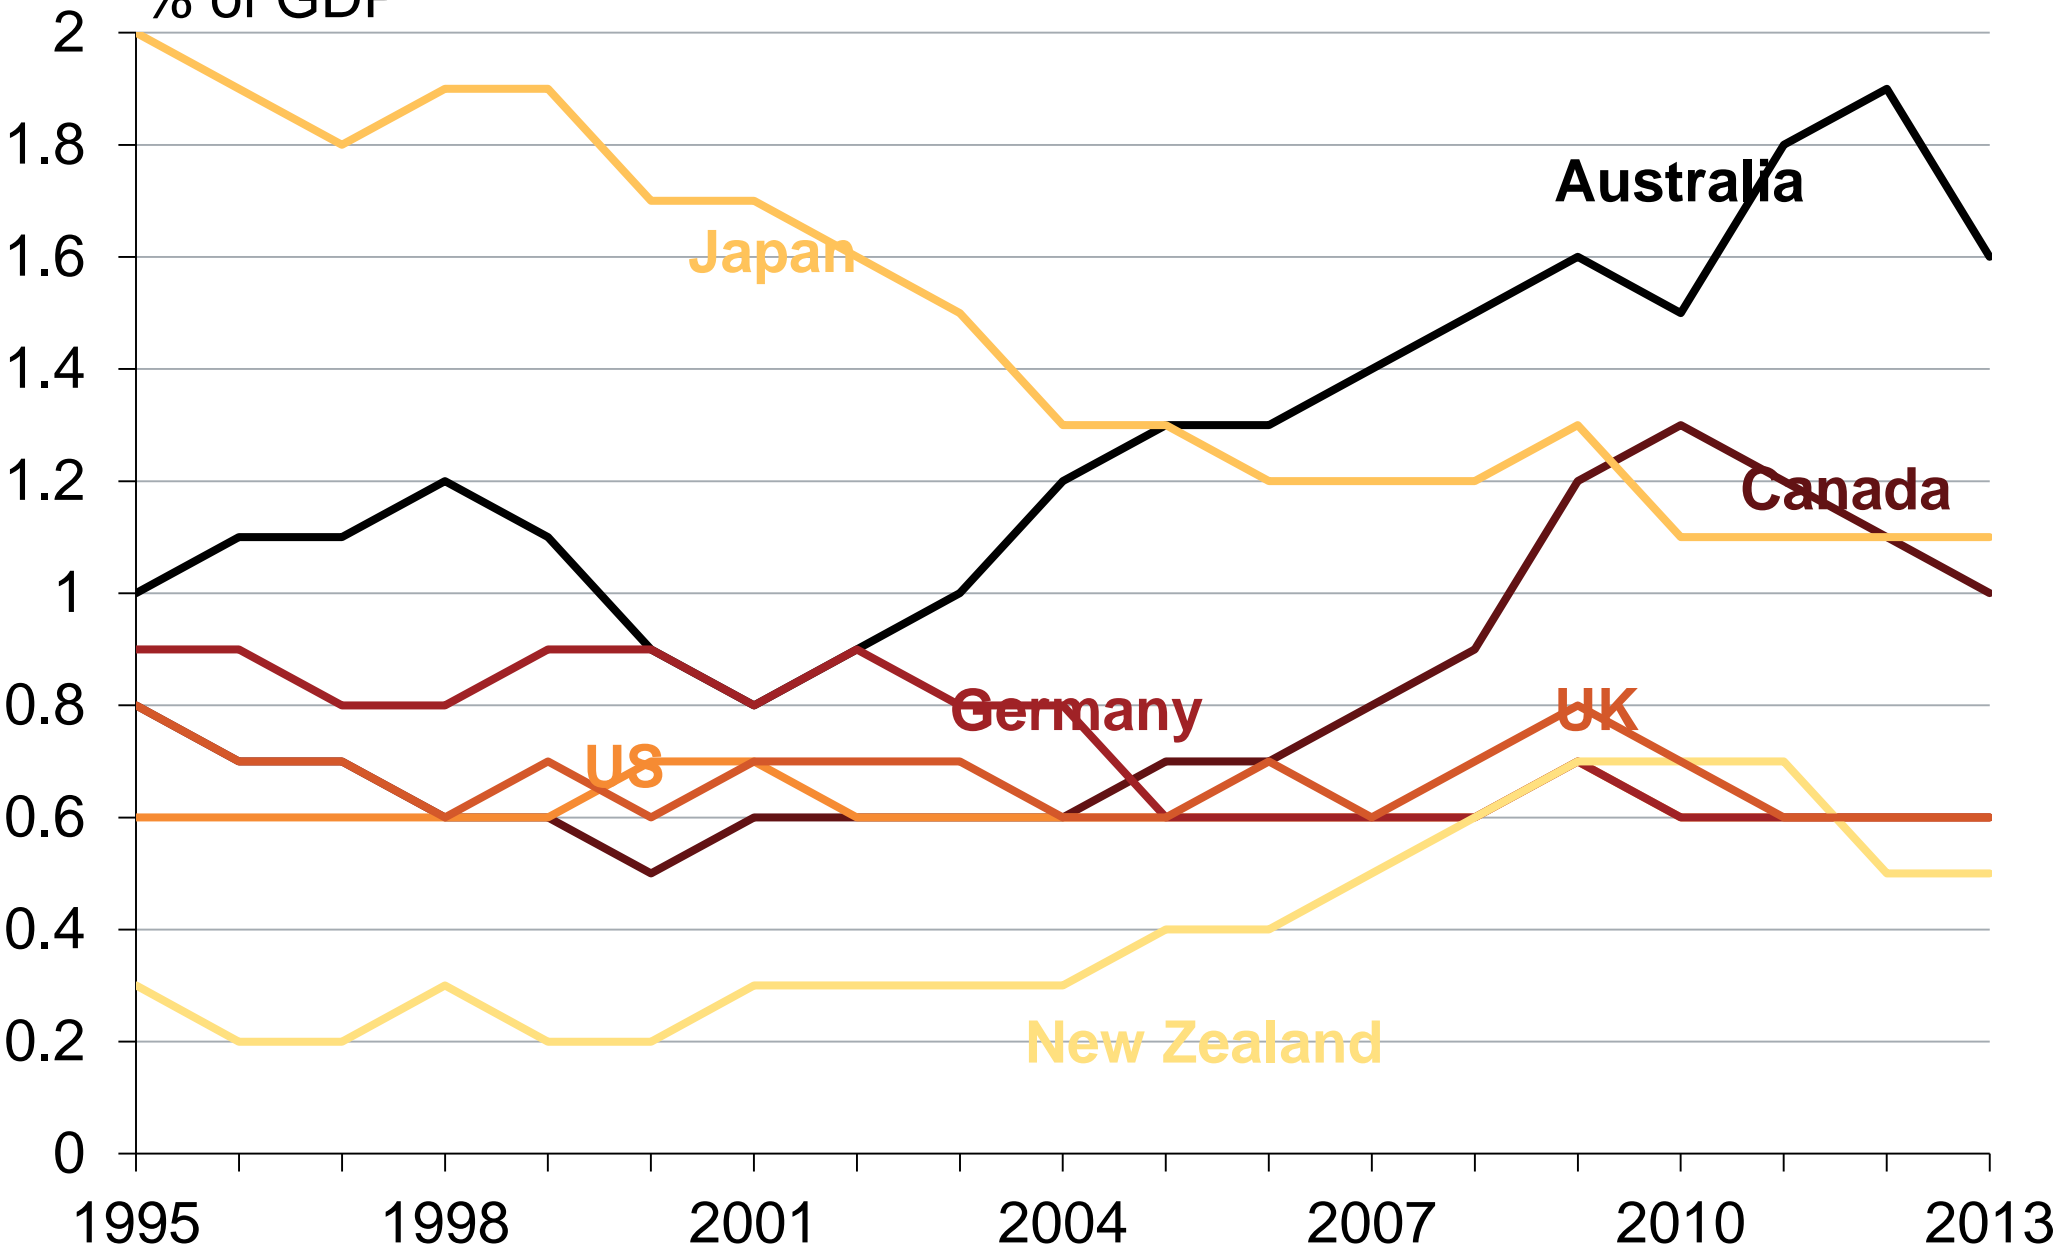

Melbourne rail network needs upgrading

Australia's investment in transport infrastructure is high....

% of GDP

...unlike our spending on maintenance

% of GDP
