Data Issues and Notes on Airline Services	7
Year ended summary figures.....	8-9
Highlights for the Month	10-11
Detailed Monthly Tables	
1. Scheduled International Air Traffic to and from Australia.....	12-13
2. Scheduled Operator Market Shares and Growth	14-17
3. Airline Passenger Capacity and Utilisation to and from Australia by Operator ...	18-20
4. Australian International Airport Scheduled Traffic and Aircraft Movements	21
5. Scheduled International Passengers and Freight by City Pairs	22-28
6. International Airlines Own Stopover Revenue Passengers, Australian City Pairs	29

EXPLANATORY NOTES

INTRODUCTION

1. This publication continues the series of monthly publications presenting provisional statistical information on the scheduled operations of international airlines operating into/out of Australia.
2. The figures in this publication were obtained from reports submitted by scheduled international carriers and are the best available at the time of publication.

COVERAGE

3. These statistics show uplift/discharge data – These data detail, by direction, the revenue traffic between the actual points of uplift and discharge within each flight, aggregated for all flights within the period. It shows the movement of traffic between two airports not necessarily directly connected but within the same flight number. Typically, flight numbers change when an aircraft reaches its home country. This means that uplift/discharge data for the port in the operator's home country are likely to be overstated by traffic whose origin/destination point is beyond that port. For example, uplift/discharge traffic reported in this publication as Singapore could include traffic whose origin/destination is Europe.
4. These statistics cover revenue traffic carried by the operators of scheduled regular public international air transport services only and do not include charter traffic.
5. Flights with no revenue traffic uplifted from Australia or discharged in Australia are treated as positioning flights and are not included in this data collection. This mainly affects dedicated freighter flights where some flights outbound from Australia do not pick up freight in Australia.

PRODUCTION AND INTERPRETATION

6. Tables 1 and 2 show the country of the relevant uplift or discharge port served by that airline. For example, traffic uplifted/discharged between Sydney and Singapore by British Airways would be shown as Singapore traffic in Tables 1 and 2.
7. Table 3 shows figures for the country of service (or route) for each airline and therefore may not equate to the data in Tables 1 and 2. For example, the British Airways UK service identified in Table 3 could include passengers uplifted or discharged in Singapore as well as the UK; these passengers would be shown individually under those countries in Tables 1 and 2. The difference in treatment of data between Tables 1 and 2 and Table 3 is necessary in order to work out a meaningful Seat Utilisation figure for Table 3.

Figures shown in Table 3 may include total traffic into and out of Australia for airlines that fly through Australia (also necessary in order to work out a meaningful Seat Utilisation figure). Therefore, figures in Table 3 may not equate to figures in Tables 1 and 2. For example, passengers carried by Qantas Airways from New Zealand via Australia to the UK will be included in Table 3 but will not be included in Tables 1 or 2 as these passengers were not uplifted/discharged in Australia.

8. Table 5 – shows uplift/discharge passenger and freight data for city pairs with “same flight number” international flight connections.

9. Where figures have been rounded, discrepancies may occur between sums of component items and totals, and in percentage changes which are derived from figures prior to rounding.
10. Published figures may be revised where figures missing at the time of publication are received or misreporting/miscalculation necessitates revisions.

DEFINITIONS

11. The following definitions have been used in this publication:
 - (a) Aircraft Movement: A landing or a take off.
 - (b) Freight: The aggregate of all revenue freight uplifted or discharged in Australia.
 - (c) Inbound: Inbound to Australia/Australian international airport.
 - (d) Mail: The aggregate of all mail uplifted or discharged in Australia.
 - (e) Outbound: Outbound from Australia/Australian international airport.
 - (f) Revenue Passengers: please refer to paragraph 12.
 - (g) Seat Utilisation: The ratio of passengers carried to seats available, expressed as a percentage.
 - (h) Seats Available: Generally based on standard aircraft configuration, the aggregate of seats available on all flights operated over a particular service.
 - (i) Services: Scheduled flights over authorised routes which are listed according to the main ports involved.

COMPARABILITY OF DATA OVER TIME

12. Revenue Passengers:

- For July 2000 and onwards: All passengers paying any fare (frequent flyer redemption passengers are regarded as revenue passengers). In most cases, Revenue Passengers will now include all passengers excluding Free Of Charge passengers and positioning crew.
- To December 1999: The aggregate of all passengers paying 25% or more of the standard air fare (as defined by ICAO at the time).
- January 2000 to June 2000: Transition period.

The Revenue Passenger definition change could result in approximately a three per cent increase in passenger numbers over a full period (month or year).

13. Country and City data – reporting of Uplift/Discharge data by Qantas Airways:

- Prior to January 2003: Uplift/Discharge within Qantas Airways' international network.
- For January 2003 and onwards: Uplift/Discharge within flight number – as per the standard definition.

For example, what was reported as Adelaide to London in January 2002 (no direct services between these two cities), would be reported in January 2003 as either Adelaide to Singapore or Melbourne/Sydney to London.

This change was introduced in order to make the data comparable across all airlines operating services to/from Australia.

The effect of this change – comparing data under the two methods of reporting:

- Country of Port data (Tables 1 & 2) – There will be a shift in traffic to countries such as Singapore and United Arab Emirates (from 2013) which are used as hubs and away from countries such as France, Germany and Italy which

previously received traffic channelled through hubs. The total volume of traffic is not affected.

- Country of Service data (Table 3) – no change, as the Uplift/Discharge definition is not applicable to classifying the country of service.
- Australian International Airports (Table 4) – there may be a shift of traffic to the major airports.
- City Pairs (Table 5) – There will be a shift in traffic to cities such as Singapore and Dubai (from 2013) which are used as hubs and away from cities such as Paris, Frankfurt and Rome which previously received traffic channelled through hubs. The total volume of traffic is not affected.
- Prior to the change, statistics reported for city pairs without “same flight number” international flight connections mainly reflected carriage on interconnecting international services by Qantas Airways. That traffic should have been interpreted as increasing the volume of traffic between the primary international ports rather than as an indicator of traffic volumes between ports without “same flight number” international flight connections. It should be noted however, that there was no double counting of traffic.

14. Country of Service classification by Qantas Airways:

- For July 2002 and onwards: based on the foreign country where same flight number services commence or cease – as per the standard definition. For example, Sydney-Denpasar-Singapore services would be classified as Country of Service = Singapore.
- Prior to July 2002: based on Qantas classification – this mainly affected Indonesia and Singapore Countries of Service. For example, Sydney-Denpasar-Singapore services were classified as Country of Service = Indonesia.

15. Airline data – Reporting of code share services:

Reporting of traffic split by airline code for code share arrangements was discontinued as of June 2000. For July 2000 and onwards, ALL traffic carried is reported under the operating airline regardless of code share arrangements.

Monthly airline market share figures for July 2001 onwards will be comparable with the same month in the previous year. However, these figures may not be comparable with monthly data prior to July 2000.

SYMBOLS AND OTHER USAGE

- nil or zero
- .. not applicable

DATA ISSUES

Hong Kong Airlines

In this report, all freight carried is reported as to and from the Gold Coast. The airline is unable to split the freight carried between Cairns and Gold Coast airports at this stage.

NOTES ON AIRLINE SERVICES

Malindo Air commenced four per week Kuala Lumpur-Denpasar-Adelaide and return services from mid-April 2019.

(b) Scheduled services recommenced September 2016.

(c) Seasonal services only.

(d) Scheduled services recommenced November 2018.

(e) Scheduled services ceased September 2018.

(f) Scheduled services ceased May 2017.

HIGHLIGHTS – APRIL 2019

- Sixty-one international airlines operated scheduled services to/from Australia during the month (includes five dedicated freight airlines but excludes airlines operating only via code share arrangements).
- International scheduled passenger traffic in April 2019 was 3.503 million compared to 3.362 million in April 2018 – an increase of 4.2 per cent. This increase follows a decrease of 2.5 per cent recorded in March 2019 compared to March 2018. Prior to that, March 2011 (-1.6 per cent) was the last time that monthly passenger traffic recorded a decrease compared to the same month in the previous year.
- The chart on the next page compares monthly passenger traffic for the year ended April 2019 with monthly passenger traffic for the year ended April 2018. Passenger traffic for the year ended April 2019 was 41.890 million which is a 4.0 per cent increase over the figure for the year ended April 2018.
- Total seats made available on international scheduled operations to/from Australia during April 2019 were 4.344 million – a decrease of 0.8 per cent compared to April 2018. The overall seat utilisation percentage (including China Airlines, Emirates, Qantas and Singapore Airlines passengers travelling through Australian ports) increased from 79.6 per cent in April 2018 to 82.8 per cent in April 2019.
- In terms of passenger carriage, Qantas Airways had the largest share of the market in April 2019 with 17.9 per cent of the total followed by Jetstar with 8.5 per cent, Singapore Airlines with 8.4 per cent, Virgin Australia with 7.1 per cent and Air New Zealand with 6.9 per cent. Compared to April 2018, Qantas Airways' share increased by 0.2 percentage points, Jetstar's share decreased by 0.8 percentage points, Singapore Airlines' share increased by 0.6 percentage points, Virgin Australia's share increased by 0.9 percentage points and Air New Zealand's share remained unchanged.
- The Qantas group – Qantas Airways, Jetstar and Jetstar Asia (0.2 per cent) accounted for 26.5 per cent of total passenger carriage in April 2019. The group's share in April 2018 was 27.2 per cent.
- The share of passenger traffic accounted for by Australian designated airlines has increased from 33.1 per cent in April 2018 to 33.4 per cent in April 2019. Qantas Airways, Jetstar and Virgin Australia contributed to the Australian airline share in April 2019.
- Low Cost Carriers (LCCs) AirAsia X, Cebu Pacific Air, Indonesia AirAsia, Jetstar, Jetstar Asia and Scoot Tigerair accounted for 14.3 per cent of total international passenger traffic to/from Australia in April 2019. The Low Cost Carriers' share in April 2018 was 15.7 per cent.
- International scheduled freight traffic in April 2019 decreased by 6.8 per cent over April 2018 to 84 517 tonnes. Inbound freight traffic decreased by 9.1 per cent and outbound freight traffic decreased by 4.3 per cent compared to April 2018.

Please refer to explanatory notes - paragraphs 4, 5, and 7 in particular.

Seat Factors shown in this table:

Traffic shown in this table for China Airlines, Emirates, Qantas Airways and Singapore Airlines will differ from traffic shown in Tables 1 and 2 because of the inclusion in this table of total traffic into and ex Australia (for seat factor purposes) whereas Tables 1 and 2 include uplift/discharge traffic only. All other airlines report uplift/discharge traffic only. Currently, there are no other airlines operating via Australia, and therefore uplift/discharge traffic is the same as total traffic into and ex Australia for all other airlines.

(a) No data received for the current month. Missing data have been estimated.

(b) Freight flights only.

**TABLE 6 INTERNATIONAL AIRLINES OWN STOPOVER REVENUE PASSENGERS,
AUSTRALIAN CITY PAIRS: April 2019**

City Pair Route	Total Passengers
Sydney-Canberra	105
Brisbane-Cairns	65
TOTAL	170

Notes:

1. Own Stopover Revenue Passengers: The aggregate of revenue passengers uplifted at one Australian airport and discharged (excluding transit passengers) at another Australian airport by the same foreign registered international airline on which they entered or left Australia.
2. City Pair Route represents the aggregation of passengers travelling in both directions.
3. This data is additional to the information presented in tables 1-5 which cover only those passengers travelling to/from overseas airports.
