Data Issues and Airlines Commencing/Withdrawing Services.....	7
Highlights.....	8-15
Detailed Annual Tables	
1. Scheduled International Air Traffic to and from Australia	16-18
2. Scheduled Operator Market Shares and Growth.....	19-23
3. Airline Passenger Capacity and Utilisation to and from Australia by Operator ...	24-27
4. Australian International Airport Scheduled Traffic and Aircraft Movements	28
5. Scheduled International Passengers and Freight by City Pairs	29-36
6. International Airlines Own Stopover Revenue Passengers, Australian City Pairs	37
7. Total Aircraft Movements at Australian International Airports by Aircraft Types	38

EXPLANATORY NOTES

INTRODUCTION

1. This publication continues the series of publications on a calendar year basis presenting statistical information on the scheduled operations of international airlines operating into/out of Australia.
2. The figures in this publication were obtained from reports submitted by scheduled international carriers and are the best available at the time of publication.

COVERAGE

3. These statistics show uplift/discharge data – These data detail, by direction, the revenue traffic between the actual points of uplift and discharge within each flight, aggregated for all flights within the period. It shows the movement of traffic between two airports not necessarily directly connected but within the same flight number. Typically, flight numbers change when an aircraft reaches its home country. This means that uplift/discharge data for the port in the operator's home country are likely to be overstated by traffic whose origin/destination point is beyond that port. For example, uplift/discharge traffic reported in this publication as Singapore could include traffic whose origin/destination is Europe.
4. These statistics cover revenue traffic carried by the operators of scheduled regular public international air transport services only and do not include charter traffic.
5. Some airlines (generally, dedicated freighter operators) operate scheduled services into Australia but operate non-scheduled services out of Australia and therefore outbound activity is not recorded in this data collection.

PRODUCTION AND INTERPRETATION

6. Tables 1 and 2 show the country of the relevant uplift or discharge port served by that airline. For example, traffic uplifted/discharged between Sydney and Singapore by British Airways would be shown as Singapore traffic in Tables 1 and 2.
7. Table 3 shows figures for the country of service (or route) for each airline and therefore may not equate to the data in Tables 1 and 2. For example, the British Airways UK service identified in Table 3 could include passengers uplifted or discharged in Singapore or Thailand as well as the UK; these passengers would be shown individually under those countries in Tables 1 and 2. The difference in treatment of data between Tables 1 and 2 and Table 3 is necessary in order to work out a meaningful Seat Utilisation figure for Table 3.

Figures shown in Table 3 may include total traffic into and out of Australia for airlines that fly through Australia (also necessary in order to work out a meaningful Seat Utilisation figure). Therefore, figures in Table 3 may not equate to figures in Tables 1 and 2. For example, passengers carried by Qantas Airways from New Zealand via Australia to the UK will be included in Table 3 but will not be included in Tables 1 or 2 as these passengers were not uplifted/discharged in Australia.

8. Table 5 – shows uplift/discharge passenger and freight data for city pairs with same flight number international flight connections.
9. Where figures have been rounded, discrepancies may occur between sums of component items and totals, and in percentage changes which are derived from figures prior to rounding.
10. Published figures may be revised where figures missing at the time of publication are received or misreporting/miscalculation necessitates revisions.

DEFINITIONS

11. The following definitions have been used in this publication:

- (a) Aircraft Movement: A landing or a take off.
- (b) Freight: The aggregate of all revenue freight uplifted.
- (c) Inbound: Inbound to Australia/Australian international airport.
- (d) Mail: The aggregate of all mail uplifted.
- (e) Outbound: Outbound from Australia/Australian international airport.
- (f) Revenue Passengers: please refer to paragraph 12.
- (g) Seat Utilisation: The ratio of passengers carried to seats available, expressed as a percentage.
- (h) Seats Available: Generally based on standard aircraft configuration, the aggregate of seats available on all flights operated over a particular service.
- (i) Services: Scheduled flights over authorised routes which are listed according to the main ports involved.

COMPARABILITY OF DATA OVER TIME

12. Revenue Passengers:

- For July 2000 and onwards: All passengers paying any fare (frequent flyer redemption passengers are regarded as revenue passengers). In most cases, Revenue Passengers will now include all passengers excluding Free Of Charge passengers and positioning crew.
- To December 1999: The aggregate of all passengers paying 25% or more of the standard air fare (as defined by ICAO).
- January 2000 to June 2000: Transition period.

The Revenue Passenger definition change could result in approximately a three per cent increase in passenger numbers over a full period (month or year).

13. Country and City data – reporting of Uplift/Discharge data by Qantas Airways:

- Prior to January 2003: Uplift/Discharge within Qantas Airways' international network.
- For January 2003 and onwards: Uplift/Discharge within flight number – as per the standard definition.

For example, what was previously reported as Adelaide to London (no direct services between these two cities) will now be reported as either Adelaide to Singapore or Melbourne/Sydney to London.

This change has been introduced in order to make the data comparable across all airlines operating services to/from Australia.

The effect of this change – comparing data under the two methods of reporting:

- Country of Port data (Tables 1 & 2) – There will be a shift in traffic to countries such as Singapore which are used as hubs and away from countries such as France, Germany and Italy which previously received traffic channelled through hubs. The total volume of traffic is not affected.
- Country of Service data (Table 3) – no change, as the Uplift/Discharge definition is not applicable to classifying the country of service.
- Australian International Airports (Table 4) – there may be a shift of traffic to the major airports.
- City Pairs (Table 5) – There will be a shift in traffic to cities such as Singapore which are used as hubs and away from cities such as Paris, Frankfurt and Rome which previously received traffic channelled through hubs. The total volume of traffic is not affected.
Prior to the change, statistics reported for city pairs without "same flight number" international flight connections mainly reflected carriage on interconnecting international services by Qantas Airways. That traffic should have been interpreted as increasing the volume of traffic between the primary international ports rather than as an indicator of traffic volumes between ports without "same flight number" international flight connections. It should be noted however, that there was no double counting of traffic.

14. Country of Service classification by Qantas Airways:

- For July 2002 and onwards: based on the foreign country where same flight number services commence or cease – as per the standard definition. For example, Sydney-Denpasar-Singapore services would be classified as Country of Service = Singapore.
- Prior to July 2002: based on Qantas classification – this mainly affected Indonesia and Singapore Countries of Service. For example, Sydney-Denpasar-Singapore services were classified as Country of Service = Indonesia.

15. Airline data – Reporting of code share services:

Reporting of traffic split by airline code for code share arrangements was discontinued as of June 2000. For July 2000 and onwards, ALL traffic carried is reported under the operating airline regardless of code share arrangements.

Monthly airline market share figures for July 2001 onwards will be comparable with the same month in the previous year. However, these figures may not be comparable with monthly data prior to July 2000.

SYMBOLS AND OTHER USAGE

- nil or zero
- .. not applicable

INDEMNITY STATEMENT

The Bureau of Infrastructure, Transport and Regional Economics has taken due care in preparing the information contained in this publication. However, noting that data have been provided by third parties, the Commonwealth gives no warranty as to the accuracy, reliability, fitness for purpose, or otherwise of the information.

DATA ISSUES

Air Vanuatu	Traffic carried under code share arrangements may not be included for July 2000 to June 2006. No mail data received for August 2007 and onwards.
Austrian Airlines/Lauda Air	No outbound freight data for September 2000 onwards. No inbound freight data for April 2001 onwards. Service ceased March 2007.
Jetstar	Freight data for services to/from Singapore is not available prior to July 2007. No mail data prior to November 2007.
Our Airlines	No data received for August 2008 and onwards.
Vietnam Airlines	No data received for inbound operations to Sydney for November 2008. No data received for inbound operations to Sydney for August 2002 to May 2004, July 2004 to November 2004, January 2005 to March 2005 and May 2005. Data for Outbound operations have been received for July 2003 onwards.

AIRLINES COMMENCING/WITHDRAWING SERVICES DURING 2008

Commencing:

OzJet

SkyAirWorld

Withdrawing:

Freedom Air International

Martinair Holland

Silk Air

HIGHLIGHTS – YEAR ENDED DECEMBER 2008

- Fifty-four international scheduled airlines operated services to/from Australia during the year (includes 6 dedicated freight airlines but excludes airlines operating only via code share arrangements).
- International scheduled passenger traffic in 2008 was 23.465 million compared to 22.776 million in 2007 – an increase of 3.0 per cent.
- Chart I shows total passenger traffic for the years 1998 to 2008. Over this period, 2002 and 2003 were the only years that recorded a decrease in traffic compared to the previous year. Passenger traffic in 2002 was affected by the terrorist attacks on the USA in September 2001 and the collapse of Ansett International (also in September 2001). Passenger traffic in 2003 was affected by the SARS crisis (April, May and June 2003 in particular) and the war in Iraq.
- 2008 has recorded the highest level of passenger traffic ever carried in a calendar year. With the exception of March 2006, September 2008 and November 2008, each month since September 2003 has recorded the highest level of passenger traffic when compared to the same month in any previous year. Chart II compares monthly passenger traffic for 2008 with monthly passenger traffic for 2007.
- **Airline shares:** Chart III shows the airline market shares in terms of passenger carriage for the top ten airlines for 1998, 2003 and 2008. In the latest year, Qantas Airways had the largest share of the market with 24.7 per cent followed by Singapore Airlines with 11.6 per cent, Air New Zealand with 9.5 per cent, Emirates with 7.0 per cent and Jetstar with 6.0 per cent.
- Compared to 1998, Qantas Airways' share has decreased by 11.7 percentage points, Singapore Airlines' share has increased by 3.4 percentage points, Air New Zealand's share has decreased by 0.1 percentage point, Emirates' share has increased by 6.6 percentage points (commenced operations to/from Australia in December 1996) and Jetstar did not commence international operations until December 2005. The decrease in share for the Qantas group (Qantas and Jetstar in 2008 compared to Qantas in 1998) was 5.8 percentage points.
- **Australian airline share:** The share of passenger traffic accounted for by Australian designated airlines has decreased from 40.5 per cent in 1998 (Qantas Airways, Ansett International, Flight West and National Jet Systems) to 34.1 per cent in 2003 (Qantas Airways and Australian Airlines) and to 31.9 per cent in 2008 (Qantas Airways, Jetstar, Pacific Blue (excluding services operated under New Zealand designation), Airnorth, OzJet and SkyAirWorld).
- **Seats and seat utilisation:** Total seats made available on international scheduled operations in 2008 totalled 31.526 million – an increase of 5.7 per cent compared to 2007 and an increase of 5.3 per cent compared to 2006. The overall seat utilisation percentage had increased from 72.9 per cent in 2006 to 77.5 per cent in 2007 but decreased to 75.6 per cent in 2008.
- **Low Cost Carrier (LCC) share:** The share of passenger traffic accounted for by LCCs has increased strongly over the last few years. In 2008, AirAsia X, Freedom Air International, Jetstar, Pacific Blue, Polynesian Blue and Tiger Airways together accounted for 11.3 per cent. This compares to the LCC share of 10.0 per cent in 2007, 6.4 per cent in 2006 and 4.5 per cent in 2005. The increase in 2008 comes despite Freedom Air International's

operations being taken over by Air New Zealand for April 2008 and onwards and is due to increased carriage by AirAsiaX, Jetstar and Pacific Blue.

- **Freight:** International scheduled air freight traffic in 2008 decreased by 0.9 per cent over 2007 to 755 235 tonnes. Inbound freight traffic has decreased by 0.4 per cent and outbound freight traffic has decreased by 1.6 per cent. Inbound freight has decreased dramatically in the last few months of 2008 with November recording a month on month decrease of 18.9 per cent and December 22.1 per cent.
- **Dedicated freighters:** In 2008, scheduled dedicated freighter operations accounted for 27.4 per cent of scheduled inbound air freight to Australia, 13.3 per cent of scheduled outbound air freight from Australia and 21.7 per cent of total scheduled air freight. Note that some freighters do not pick up freight in Australia – this accounts for the difference in inbound and outbound percentages. There are some smaller scheduled dedicated freighter operators who are not covered in these figures.
- **Traffic On Board Airport Traffic:** Table VI on page 13 shows Traffic On Board passenger movements, flights and operated seats at Australian international airports. All traffic is shown against the first Australian airport for arrivals to Australia and the last Australian airport for departures from Australia. Movements between Australian airports are not accounted for.
- Seat utilisation at all of the capital city airports other than Perth has decreased in 2008 compared to 2007. Adelaide recorded the highest rate at 79.4 per cent. Of the 31.526 million seats operated to/from Australia, Sydney accounted for 45.5 per cent followed by Melbourne with 18.8 per cent and Brisbane with 17.4 per cent.
- **Traffic On Board Country:** Table VII on page 14 shows Traffic On Board passenger movements, flights and operated seats between Australia and countries with non-stop air service connections.
- New Zealand, Singapore, Hong Kong, Thailand and USA were the top five countries in terms of traffic on board passenger movements in 2008. Seat utilization was highest for India with 84.1 per cent followed by South Africa with 82.9 per cent and Singapore with 80.6 per cent.
- **Hubs for passenger traffic:** Table VIII on page 14 shows Traffic On Board passenger movements, flights and operated seats between Australia and the top twenty-five international cities with non-stop air service connections.
- In 2008, 20.8 per cent of the passenger movements to/from Australia were either to/from or via Singapore. Auckland was the next largest hub accounting for 14.2 per cent followed by Hong Kong which accounted for 9.4 per cent.
- **Traffic On Board Region:** Page 15 is a diagrammatic representation of Traffic On Board passenger movements, flights and operated seats by region. The region is based on international cities with non-stop air service connections with Australia. In 2008, 37.6 per cent of the 31.526 million seats operated to/from Australia were either to/from or via South-East Asia. New Zealand had 23.7 per cent of the total followed by North-East Asia with 20.7 per cent.
- The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication.

Chart IV Share of Operated Seats at Australian International Airports - 2008

* First port of call for arrivals to Australia or last port of call for departures from Australia.

The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication. The figures above include some estimates and adjustments.

The data shown here covers non-stop international connections only - it does not include movements between Australian airports.

Please see notes on page 14 as well.

Table VII Traffic on Board Passenger Movements, Flights and Seats on Non-Stop Passenger Services By Country - 2008

Country *	No. of Flights	Passenger	Seats	Seat Utilisation %
New Zealand	37 784	5 463 480	7 473 426	73.1%
Singapore	19 470	4 953 400	6 144 243	80.6%

Others	10 694	1 392 053	2 079 352	66.9%
Total	123 986	23 823 212	31 525 997	75.6%

* First country/port of call for departures from Australia or last country/port of call for arrivals to Australia.

The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication.

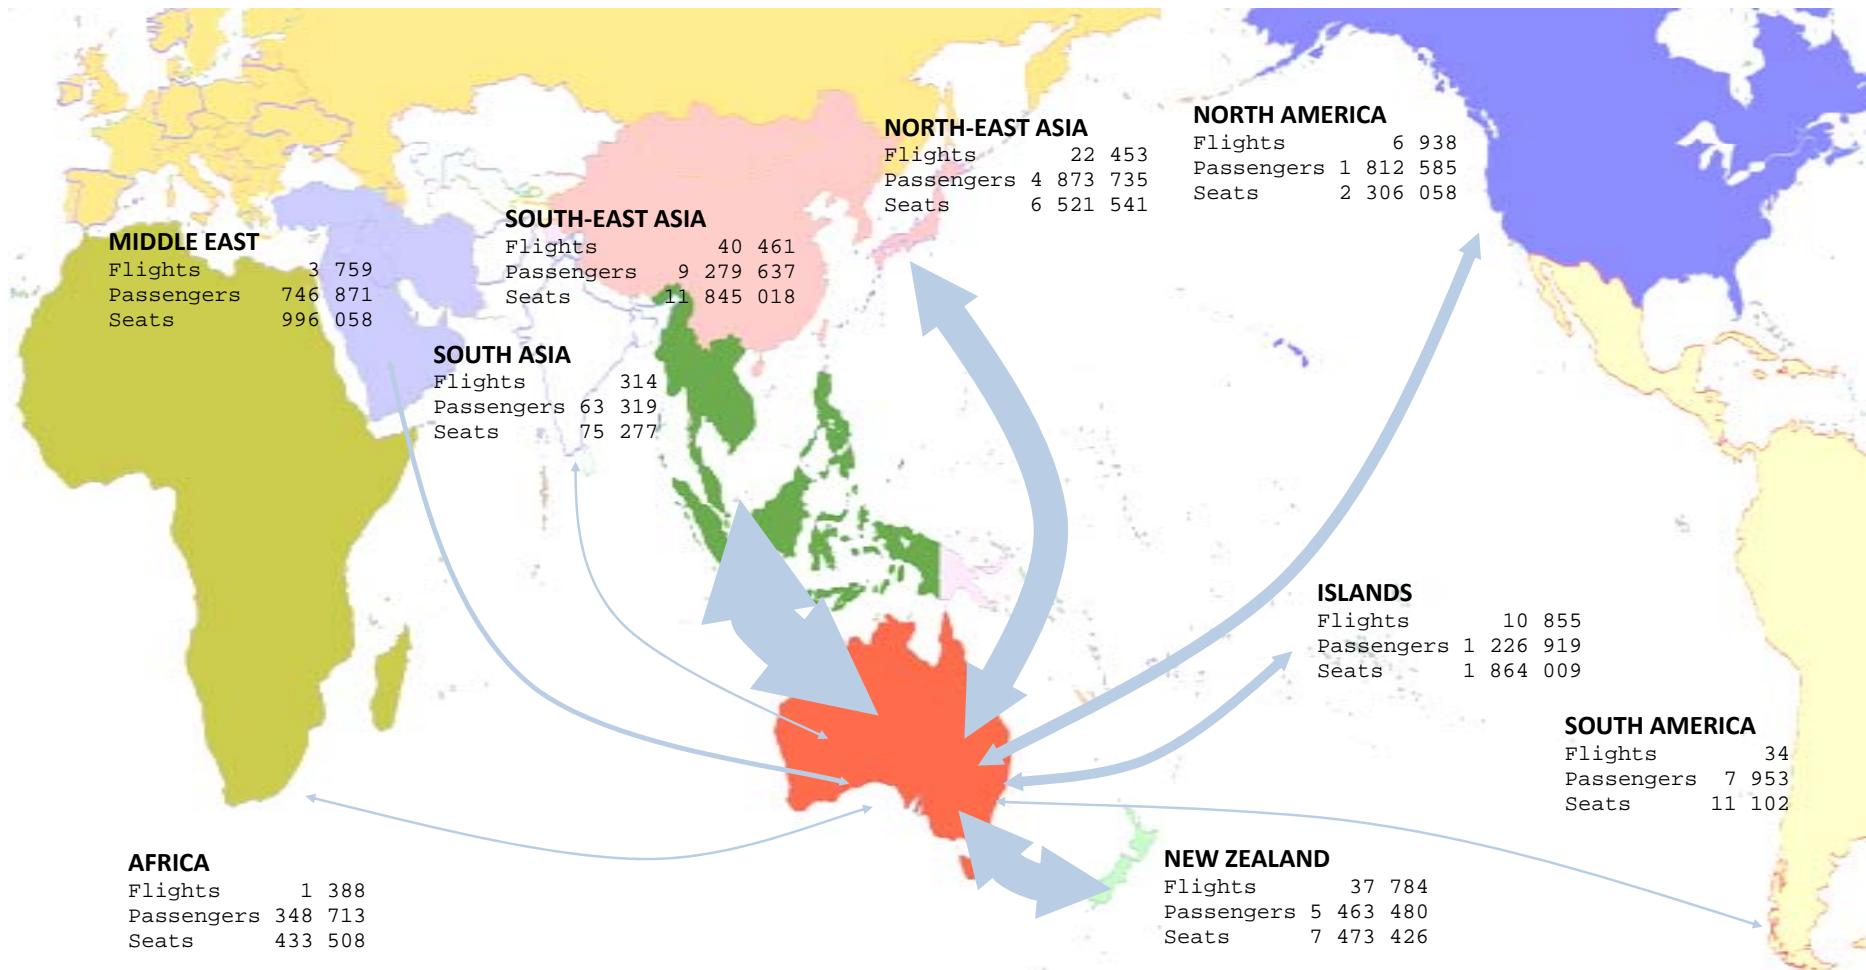

The figures above include some estimates and adjustments.

The total number of flights, passenger movements and seats shown correspond to total passenger services reported in Table 3 - please read the explanatory notes shown under Table 3 for coverage (page 24).

The data shown here does not include passengers not uplifted/discharged in Australia for airlines other than Qantas Airways.

For example: Dubai-Auckland passengers on services that operate via Australia to Auckland. Services by Emirates and Royal Brunei Airlines are affected.

TRAFFIC ON BOARD PASSENGER MOVEMENTS, FLIGHTS AND SEATS BY REGION BASED ON NON-STOP SERVICES TO AND FROM AUSTRALIA
 SCHEDULED INTERNATIONAL PASSENGER AIR SERVICES - Year ended December 2008

Share of Operated Seats by Region

South-East Asia	37.6%	North America	7.3%	Africa	1.4%
New Zealand	23.7%	Islands	5.9%	South Asia	0.2%
North-East Asia	20.7%	Middle East	3.2%	South America	0.0%

Please see notes on page 14.

Please refer to explanatory notes - paragraphs 3, 6 and 13 in particular.

- (a) Nil operations to Sydney in September and November 2008.
- (b) No mail data for August 2007 and onwards.
- (c) Nil operations for November 2008.
- (d) Service ceased March 2008.
- (e) No Mail data prior to November 2007.
- (f) Freight data for services to/from Singapore is not included prior to July 2007.
- (g) Reported as Lan Chile prior to December 2008.
- (h) Service ceased December 2008.
- (i) Reported as Air Nauru prior to December 2008. Data not received for August 2008 and onwards.
- (j) Scheduled services commenced June 2008.
- (k) Scheduled service commenced December 2007 and ceased May 2008.
- (l) Service commenced March 2008.
- (m) Reported as Asian Express Airlines prior to December 2008.
- (n) No data received for inbound operations to Sydney for November 2008. See page 7 for other missing data.

TABLE 2 SCHEDULED OPERATOR MARKET SHARES AND GROWTH: Year ended December

Please refer to explanatory notes - paragraphs 3, 6 and 13 in particular.

- (a) Nil operations to Sydney in September and November 2008.
- (b) No mail data for August 2007 and onwards.
- (c) Service commenced November 2007.
- (d) Service commenced October 2007.
- (e) Service ceased March 2007.
- (f) Nil operations for November 2008.
- (g) Service commenced March 2007.
- (h) Service ceased March 2008.
- (i) Service ceased June 2007.
- (j) Operations taken over by JALWays in October 2007.
- (k) No Mail data prior to November 2007.
- (l) Freight data for services to/from Singapore is not included prior to July 2007.
- (m) Reported as Lan Chile prior to December 2008.
- (n) Service ceased December 2008.
- (o) Operations reported under Airnorth for November 2007 onwards.
- (p) Reported as Air Nauru prior to December 2008. Data not received for August 2008 and onwards.
- (q) Scheduled services commenced June 2008.
- (r) Scheduled service commenced December 2007 and ceased May 2008.
- (s) Service commenced March 2008.
- (t) Reported as Asian Express Airlines prior to December 2008.
- (u) No data received for inbound operations to Sydney for November 2008. See page 7 for other missing data.

TABLE 3 AIRLINE PASSENGER CAPACITY AND UTILISATION TO AND FROM AUSTRALIA BY OPERATOR: Year ended December 2008

Please refer to explanatory notes - paragraphs 4, 5, 7 and 14 in particular.

In addition to the above, please note the following regarding Seat Factors shown in this table:

Traffic shown in this table for Qantas Airways will differ from traffic shown in Tables 1 and 2 because of the inclusion in this table of total traffic into and ex Australia (for seat factor purposes) whereas Tables 1 and 2 include uplift/discharge traffic only.

All other airlines report uplift/discharge traffic only. Therefore, for other airlines operating via Australia, the seat factors shown here reflect the total seats on the aircraft but only the Australian uplift/discharge portion of passengers on the aircraft. The true seat factors for airlines that operate via Australia will most likely be higher than what is shown in this table.

For example, on Dubai-Sydney-Auckland services:

Seats on the Dubai-Sydney sector are taken up by Dubai-Sydney and Dubai-Auckland passengers. However, when calculating seat factors, only the Dubai-Sydney passengers are used.

Similarly, seats on the Sydney-Auckland sector are taken up by Sydney-Auckland and Dubai-Auckland passengers. However, when calculating seat factors, only the Sydney-Auckland passengers are used.

The following airlines are affected:

Emirates and Royal Brunei Airlines

- (a) Nil operations to Sydney in September and November 2008.
- (b) From November 2007 to February 2008, there were no "same flight number" services inbound to Australia from the USA corresponding to Melbourne-Auckland-Los Angeles services. This accounts for the difference between inbound and outbound services for New Zealand and USA.
- (c) Freight flights only.
- (d) Nil operations for November 2008.
- (e) Service ceased March 2008.
- (f) Reported as Lan Chile prior to December 2008.
- (g) Service ceased December 2008.
- (h) Reported as Air Nauru prior to December 2008. Data not received for August 2008 and onwards.
- (i) Scheduled services commenced June 2008.
- (j) Scheduled service commenced December 2007 and ceased May 2008.
- (k) Service commenced March 2008.
- (l) Reported as Asian Express Airlines prior to December 2008.
- (m) No data received for inbound operations to Sydney for November 2008. See page 7 for other missing data.

Please refer to explanatory notes - paragraphs 3, 8 and 13 in particular.

(a) Scheduled services recommenced December 2007 and ceased May 2008.

**TABLE 6 INTERNATIONAL AIRLINES OWN STOPOVER REVENUE PASSENGERS,
AUSTRALIAN CITY PAIRS: Year ended December 2008**

City Pair Route	Total Passengers
Melbourne/Sydney	28 590
Brisbane/Cairns	2 135
Brisbane/Sydney	334
Adelaide/Melbourne	288
TOTAL	31 347

Notes:

1. Own Stopover Revenue Passengers : The aggregate of revenue passengers uplifted at one Australian airport and discharged (excluding transit passengers) at another Australian airport by the same foreign registered international airline on which they entered or left Australia.
2. City Pair Route represents the aggregation of passengers travelling in both directions.
3. This data is additional to the information presented in tables 1-5 which cover only those passengers travelling to/from overseas airports.
