CONTENTS

Explanatory Notes	4-6
Data Issues and Notes on Airline Services	7
Highlights	8-15
Detailed Annual Tables	
1. Scheduled International Air Traffic to and from Australia.....	16-18
2. Scheduled Operator Market Shares and Growth	19-22
3. Airline Passenger Capacity and Utilisation to and from Australia by Operator ..	23-26
4. Australian International Airport Scheduled Traffic and Aircraft Movements	27
5. Scheduled International Passengers and Freight by City Pairs	28-34
6. International Airlines Own Stopover Revenue Passengers, Australian City Pairs	35
7. Total Aircraft Movements at Australian International Airports by Aircraft Types	36

EXPLANATORY NOTES

INTRODUCTION

1. This publication continues the series of publications on a calendar year basis presenting statistical information on the scheduled operations of international airlines operating into/out of Australia.
2. The figures in this publication were obtained from reports submitted by scheduled international carriers and are the best available at the time of publication.

COVERAGE

3. These statistics show uplift/discharge data – These data detail, by direction, the revenue traffic between the actual points of uplift and discharge within each flight, aggregated for all flights within the period. It shows the movement of traffic between two airports not necessarily directly connected but within the same flight number. Typically, flight numbers change when an aircraft reaches its home country. This means that uplift/discharge data for the port in the operator's home country are likely to be overstated by traffic whose origin/destination point is beyond that port. For example, uplift/discharge traffic reported in this publication as Singapore could include traffic whose origin/destination is Europe.
4. These statistics cover revenue traffic carried by the operators of scheduled regular public international air transport services only and do not include charter traffic.
5. Flights with no revenue traffic uplifted from Australia or discharged in Australia are treated as positioning flights and are not included in this data collection. This mainly affects dedicated freighter flights where some flights outbound from Australia do not pick up freight in Australia.

PRODUCTION AND INTERPRETATION

6. Tables 1 and 2 show the country of the relevant uplift or discharge port served by that airline. For example, traffic uplifted/discharged between Sydney and Singapore by British Airways would be shown as Singapore traffic in Tables 1 and 2.
7. Table 3 shows figures for the country of service (or route) for each airline and therefore may not equate to the data in Tables 1 and 2. For example, the British Airways UK service identified in Table 3 could include passengers uplifted or discharged in Singapore as well as the UK; these passengers would be shown individually under those countries in Tables 1 and 2. The difference in treatment of data between Tables 1 and 2 and Table 3 is necessary in order to work out a meaningful Seat Utilisation figure for Table 3.

Figures shown in Table 3 may include total traffic into and out of Australia for airlines that fly through Australia (also necessary in order to work out a meaningful Seat Utilisation figure). Therefore, figures in Table 3 may not equate to figures in Tables 1 and 2. For example, passengers carried by Qantas Airways from New Zealand via Australia to the UK will be included in Table 3 but will not be included in Tables 1 or 2 as these passengers were not uplifted/discharged in Australia.

8. Table 5 – shows uplift/discharge passenger and freight data for city pairs with “same flight number” international flight connections.

9. Where figures have been rounded, discrepancies may occur between sums of component items and totals, and in percentage changes which are derived from figures prior to rounding.
10. Published figures may be revised where figures missing at the time of publication are received or misreporting/miscalculation necessitates revisions.

DEFINITIONS

11. The following definitions have been used in this publication:
 - (a) Aircraft Movement: A landing or a take off.
 - (b) Freight: The aggregate of all revenue freight uplifted or discharged in Australia.
 - (c) Inbound: Inbound to Australia/Australian international airport.
 - (d) Mail: The aggregate of all mail uplifted or discharged in Australia.
 - (e) Outbound: Outbound from Australia/Australian international airport.
 - (f) Revenue Passengers: please refer to paragraph 12.
 - (g) Seat Utilisation: The ratio of passengers carried to seats available, expressed as a percentage.
 - (h) Seats Available: Generally based on standard aircraft configuration, the aggregate of seats available on all flights operated over a particular service.
 - (i) Services: Scheduled flights over authorised routes which are listed according to the main ports involved.

COMPARABILITY OF DATA OVER TIME

12. Revenue Passengers:
 - For July 2000 and onwards: All passengers paying any fare (frequent flyer redemption passengers are regarded as revenue passengers). In most cases, Revenue Passengers will now include all passengers excluding Free Of Charge passengers and positioning crew.
 - To December 1999: The aggregate of all passengers paying 25% or more of the standard air fare (as defined by ICAO at the time).
 - January 2000 to June 2000: Transition period.

The Revenue Passenger definition change could result in approximately a three per cent increase in passenger numbers over a full period (month or year).

13. Country and City data – reporting of Uplift/Discharge data by Qantas Airways:
 - Prior to January 2003: Uplift/Discharge within Qantas Airways' international network.
 - For January 2003 and onwards: Uplift/Discharge within flight number – as per the standard definition.

For example, what was reported as Adelaide to London in January 2002 (no direct services between these two cities), would be reported in January 2003 as either Adelaide to Singapore or Melbourne/Sydney to London.

This change was introduced in order to make the data comparable across all airlines operating services to/from Australia.

The effect of this change – comparing data under the two methods of reporting:

- Country of Port data (Tables 1 & 2) – There will be a shift in traffic to countries such as Singapore and United Arab Emirates (from 2013) which are used as hubs and away from countries such as France, Germany and Italy which

previously received traffic channelled through hubs. The total volume of traffic is not affected.

- Country of Service data (Table 3) – no change, as the Uplift/Discharge definition is not applicable to classifying the country of service.
- Australian International Airports (Table 4) – there may be a shift of traffic to the major airports.
- City Pairs (Table 5) – There will be a shift in traffic to cities such as Singapore and Dubai (from 2013) which are used as hubs and away from cities such as Paris, Frankfurt and Rome which previously received traffic channelled through hubs. The total volume of traffic is not affected.
- Prior to the change, statistics reported for city pairs without “same flight number” international flight connections mainly reflected carriage on interconnecting international services by Qantas Airways. That traffic should have been interpreted as increasing the volume of traffic between the primary international ports rather than as an indicator of traffic volumes between ports without “same flight number” international flight connections. It should be noted however, that there was no double counting of traffic.

14. Country of Service classification by Qantas Airways:

- For July 2002 and onwards: based on the foreign country where same flight number services commence or cease – as per the standard definition. For example, Sydney-Denpasar-Singapore services would be classified as Country of Service = Singapore.
- Prior to July 2002: based on Qantas classification – this mainly affected Indonesia and Singapore Countries of Service. For example, Sydney-Denpasar-Singapore services were classified as Country of Service = Indonesia.

15. Airline data – Reporting of code share services:

Reporting of traffic split by airline code for code share arrangements was discontinued as of June 2000. For July 2000 and onwards, ALL traffic carried is reported under the operating airline regardless of code share arrangements.

Monthly airline market share figures for July 2001 onwards will be comparable with the same month in the previous year. However, these figures may not be comparable with monthly data prior to July 2000.

SYMBOLS AND OTHER USAGE

- nil or zero
- .. not applicable

DATA ISSUES

Hong Kong Airlines

In this report, all freight carried is reported as to and from the Gold Coast. The airline is unable to split the freight carried between Cairns and Gold Coast airports at this stage.

AIRLINES COMMENCING/WITHDRAWING SERVICES DURING 2018

Donghai Airlines – Services commenced May 2018.

Hong Kong Airlines – Services ceased October 2018.

Jin Air – Seasonal services recommenced December 2017 and ceased January 2018.

Samoa Airways – Scheduled services commenced late March 2018.

HIGHLIGHTS – YEAR ENDED DECEMBER 2018

- Sixty-three international scheduled airlines operated services to/from Australia during the year (includes five dedicated freight airlines but excludes airlines operating only via code share arrangements).
- International scheduled passenger traffic in 2018 was 41.575 million compared to 39.616 million in 2017 – an increase of 4.9 per cent.
- Chart I shows total passenger traffic for the years 2008 to 2018. Over this period, each year has recorded an increase in traffic compared to the previous year.
- Chart II compares monthly passenger traffic for 2018 with monthly passenger traffic for 2017. March 2011 (-1.6 per cent) was the last time that monthly passenger traffic recorded a decrease compared to the same month in the previous year.
- Chart III shows the airline market shares in terms of passenger carriage for the top ten airlines for 2008, 2013 and 2018. In the latest year, Qantas Airways had the largest share of the market with 17.1 per cent followed by Jetstar with 8.9 per cent, Singapore Airlines with 8.0 per cent, Emirates with 7.7 per cent and Air New Zealand with 6.6 per cent.
- Compared to 2008, Qantas Airways' share has decreased by 7.5 percentage points, Jetstar's share has increased by 2.9 percentage points, Singapore Airlines' share has decreased by 3.6 percentage points, Emirates' share has increased by 0.7 percentage points and Air New Zealand's share has decreased by 2.8 percentage points. The decrease in share for the Qantas group (Qantas Airways, Jetstar and Jetstar Asia in 2018 compared to Qantas and Jetstar in 2008) was 4.3 percentage points.
- The share of passenger traffic accounted for by Australian designated airlines decreased from 32.4 per cent in 2008 to 30.4 per cent in 2013 and increased to 32.2 per cent in 2018. Qantas Airways, Jetstar and Virgin Australia contributed to the Australian airline share in 2018 (prior to August 2015, some Virgin Australia Trans-Tasman services were operated as New Zealand designated services).
- Seats made available on international scheduled operations in 2018 totaled 53.901 million – an increase of 4.2 per cent compared to 2017. The overall seat utilisation percentage (including AirAsia X, China Airlines, Emirates, Qantas and Singapore Airlines passengers travelling through Australian ports) has increased from 79.5 per cent in 2017 to 79.7 per cent in 2018.
- In 2018, Low Cost Carriers AirAsia X, Cebu Pacific Air, Indonesia AirAsia, Jetstar, Jetstar Asia and Scoot Tigerair together accounted for 15.2 per cent of total international passenger traffic. This compares to the LCC share of 16.7 per cent in 2017.
- International scheduled air freight traffic increased by 5.7 per cent compared to 2017 to 1 170 360 tonnes in 2018. Inbound freight increased by 4.2 per cent to 586 873 tonnes. Outbound freight increased by 7.2 per cent to 583 487 tonnes.
- In 2018, scheduled dedicated freighter operations accounted for 19.2 per cent of scheduled inbound air freight to Australia, 12.6 per cent of scheduled outbound air freight from Australia and 15.9 per cent of total scheduled air freight. Note that some freighters do not pick up freight in Australia.
- Table VI on page 13 shows Traffic On Board passenger movements, flights and operated seats at Australian international airports. All traffic is shown against the first

Australian airport for arrivals to Australia and the last Australian airport for departures from Australia. Movements between Australian airports are not accounted for.

- Of the major airports, seat utilisation in 2018 was highest at Melbourne at 81.3 per cent, followed by Sydney at 80.1 per cent, Gold Coast at 80.0 per cent, Perth at 78.4 per cent, Brisbane at 77.9 per cent, Adelaide at 77.8 per cent and Cairns at 72.1 per cent.
- Table VII on page 14 shows Traffic On Board passenger movements, flights and operated seats between Australia and the top thirty countries with non-stop air service connections.
- New Zealand, Singapore, United Arab Emirates, China, and USA were the top five countries in terms of traffic on board passenger movements in 2018. Seat utilisation was highest for UK (non-stop services) at 93.6 per cent, followed by Japan at 83.5 per cent, Singapore at 82.8 per cent, Chile at 82.4 per cent and India at 82.0 per cent.
- Table VIII on page 14 shows Traffic On Board passenger movements, flights and operated seats between Australia and the top thirty international cities with non-stop air service connections.
- In 2018, 14.3 per cent of the passenger movements to/from Australia were either to/from or via Singapore. Auckland was the next largest hub accounting for 11.5 per cent followed by Denpasar (6.7 per cent), Hong Kong (6.6 per cent) and Dubai (5.8 per cent).
- Page 15 is a diagrammatic representation of Traffic On Board passenger movements, flights and operated seats by region. The region is based on international cities with non-stop air service connections with Australia. In 2018, 34.0 per cent of the 53.901 million seats operated to/from Australia were either to/from or via South East Asia. North East Asia had 20.9 per cent followed by New Zealand at 18.2 per cent, Middle East at 11.6 per cent, North America at 8.5 per cent and the other regions accounted for 6.8 per cent.
- The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication.

Chart IV Share of Operated Seats at Australian International Airports - 2018

The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication. The figures above include some adjustments. The data shown here covers non-stop international connections only - it does not include movements between Australian airports.

Please see notes on page 14 as well.

* First port of call for arrivals to Australia or last port of call for departures from Australia.

Table VII Traffic on Board Passenger Movements, Flights and Seats on Non-Stop Passenger Services By Country - 2018

Country *	No. of Flights	Passengers	Seats	Utilisation %
New Zealand	46 568	7 881 870	9 796 470	80.5%
Singapore	24 610	6 134 043	7 411 198	82.8%

The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication. The total number of flights, passenger movements and seats shown correspond to total passenger services reported in Table 3. Passenger numbers used here for AirAsia X, China Airlines, Emirates, Qantas Airways and Singapore Airlines are total carried into and out of Australia.

* First country/port of call for departures from Australia or last country/port of call for arrivals to Australia.

TRAFFIC ON BOARD PASSENGER MOVEMENTS, FLIGHTS AND SEATS BY REGION BASED ON NON-STOP SERVICES TO AND FROM AUSTRALIA

Please refer to explanatory notes - paragraphs 3, 6 and 13 in particular.

(a) Services commenced June 2017.

(b) Services commenced May 2018.

(c) Services ceased October 2018.

(d) Seasonal services operated from December 2016 to February 2017 and December 2017 to January 2018.

(e) Scheduled services commenced late March 2018.

(f) Operated as Scoot to 24 July 2017 and as Scoot Tigerair from 25 July 2017.

(g) Services recommenced October 2017.

(h) Services commenced November 2017.

(i) Services ceased November 2017.

Please refer to explanatory notes - paragraphs 4, 5, and 7 in particular.

Seat Factors shown in this table:

Traffic shown in this table for AirAsia X, China Airlines, Emirates, Qantas Airways and Singapore Airlines will differ from traffic shown in Tables 1 and 2 because of the inclusion in this table of total traffic into and ex Australia (for seat factor purposes) whereas Tables 1 and 2 include uplift/discharge traffic only. All other airlines report uplift/discharge traffic only. Currently, there are no other airlines operating via Australia, and therefore uplift/discharge traffic is the same as total traffic into and ex Australia for all other airlines.

(a) Services commenced May 2018.

(b) Freight flights only.

(c) Services ceased October 2018.

(d) Seasonal services recommenced December 2017 and ceased January 2018.

(e) Scheduled services commenced late March 2018.

Please refer to explanatory notes - paragraphs 3 and 8 in particular.

**TABLE 6 INTERNATIONAL AIRLINES OWN STOPOVER REVENUE PASSENGERS,
AUSTRALIAN CITY PAIRS: Year ended December 2018**

City Pair Route	Total Passengers
Gold Coast/Cairns	8 399
Brisbane/Cairns	743
Sydney/Canberra	482
TOTAL	9 624

Notes:

1. Own Stopover Revenue Passengers : The aggregate of revenue passengers uplifted at one Australian airport and discharged (excluding transit passengers) at another Australian airport by the same foreign registered international airline on which they entered or left Australia.
2. City Pair Route represents the aggregation of passengers travelling in both directions.
3. This data is additional to the information presented in tables 1-5 which cover only those passengers travelling to/from overseas airports.
