CONTENTS

Explanatory Notes	4-6
Data Issues and Notes on Airline Services.....	7
Highlights	8-15
Detailed Monthly Tables	
1. Scheduled International Air Traffic to and from Australia.....	16-18
2. Scheduled Operator Market Shares and Growth.....	19-22
3. Airline Passenger Capacity and Utilisation to and from Australia by Operator ..	23-26
4. Australian International Airport Scheduled Traffic and Aircraft Movements	27
5. Scheduled International Passengers and Freight by City Pairs.....	28-33
6. International Airlines Own Stopover Revenue Passengers, Australian City Pairs ...	34
7. Total Aircraft Movements at Australian International Airports by Aircraft Types ...	35

EXPLANATORY NOTES

INTRODUCTION

1. This publication continues the series of publications on a financial year basis presenting provisional statistical information on the scheduled operations of international airlines operating into/out of Australia.
2. The figures in this publication were obtained from reports submitted by scheduled international carriers and are the best available at the time of publication.

COVERAGE

3. These statistics show uplift/discharge data – These data detail, by direction, the revenue traffic between the actual points of uplift and discharge within each flight, aggregated for all flights within the period. It shows the movement of traffic between two airports not necessarily directly connected but within the same flight number. Typically, flight numbers change when an aircraft reaches its home country. This means that uplift/discharge data for the port in the operator's home country are likely to be overstated by traffic whose origin/destination point is beyond that port. For example, uplift/discharge traffic reported in this publication as Singapore could include traffic whose origin/destination is Europe.
4. These statistics cover revenue traffic carried by the operators of scheduled regular public international air transport services only and do not include charter traffic.
5. Flights with no revenue traffic uplifted from Australia or discharged in Australia are treated as positioning flights and are not included in this data collection. This mainly affects dedicated freighter flights where some flights outbound from Australia do not pick up freight in Australia.

PRODUCTION AND INTERPRETATION

6. Tables 1 and 2 show the country of the relevant uplift or discharge port served by that airline. For example, traffic uplifted/discharged between Sydney and Singapore by British Airways would be shown as Singapore traffic in Tables 1 and 2.
7. Table 3 shows figures for the country of service (or route) for each airline and therefore may not equate to the data in Tables 1 and 2. For example, the British Airways UK service identified in Table 3 could include passengers uplifted or discharged in Singapore as well as the UK; these passengers would be shown individually under those countries in Tables 1 and 2. The difference in treatment of data between Tables 1 and 2 and Table 3 is necessary in order to work out a meaningful Seat Utilisation figure for Table 3.

Figures shown in Table 3 may include total traffic into and out of Australia for airlines that fly through Australia (also necessary in order to work out a meaningful Seat Utilisation figure). Therefore, figures in Table 3 may not equate to figures in Tables 1 and 2. For example, passengers carried by Qantas Airways from New Zealand via Australia to the UK will be included in Table 3 but will not be included in Tables 1 or 2 as these passengers were not uplifted/discharged in Australia.

8. Table 5 – shows uplift/discharge passenger and freight data for city pairs with “same flight number” international flight connections.

9. Where figures have been rounded, discrepancies may occur between sums of component items and totals, and in percentage changes which are derived from figures prior to rounding.
10. Published figures may be revised where figures missing at the time of publication are received or misreporting/miscalculation necessitates revisions.

DEFINITIONS

11. The following definitions have been used in this publication:
 - (a) Aircraft Movement: A landing or a take off.
 - (b) Freight: The aggregate of all revenue freight uplifted.
 - (c) Inbound: Inbound to Australia/Australian international airport.
 - (d) Mail: The aggregate of all mail uplifted.
 - (e) Outbound: Outbound from Australia/Australian international airport.
 - (f) Revenue Passengers: please refer to paragraph 12.
 - (g) Seat Utilisation: The ratio of passengers carried to seats available, expressed as a percentage.
 - (h) Seats Available: Generally based on standard aircraft configuration, the aggregate of seats available on all flights operated over a particular service.
 - (i) Services: Scheduled flights over authorised routes which are listed according to the main ports involved.

COMPARABILITY OF DATA OVER TIME

12. Revenue Passengers:
 - For July 2000 and onwards: All passengers paying any fare (frequent flyer redemption passengers are regarded as revenue passengers). In most cases, Revenue Passengers will now include all passengers excluding free of charge passengers and positioning crew.
 - To December 1999: The aggregate of all passengers paying 25% or more of the standard air fare (as defined by ICAO).
 - January 2000 to June 2000: Transition period.

The Revenue Passenger definition change could result in approximately a three per cent increase in passenger numbers over a full period (month or year).

13. Country and City data – reporting of Uplift/Discharge data by Qantas Airways:

- Prior to January 2003: Uplift/Discharge within Qantas Airways' international network.
- For January 2003 and onwards: Uplift/Discharge within flight number – as per the standard definition.

For example, what was reported as Adelaide to London in January 2002 (no direct services between these two cities), would be reported in January 2003 as either Adelaide to Singapore or Melbourne/Sydney to London.

This change was introduced in order to make the data comparable across all airlines operating services to/from Australia.

The effect of this change – comparing data under the two methods of reporting:

- Country of Port data (Tables 1 & 2) – There will be a shift in traffic to countries such as Singapore and United Arab Emirates (from 2013) which are used as hubs and away from countries such as France, Germany and Italy which

- previously received traffic channelled through hubs. The total volume of traffic is not affected.
- Country of Service data (Table 3) – no change, as the Uplift/Discharge definition is not applicable to classifying the country of service.
- Australian International Airports (Table 4) – there may be a shift of traffic to the major airports.
- City Pairs (Table 5) – There will be a shift in traffic to cities such as Singapore and Dubai (from 2013) which are used as hubs and away from cities such as Paris, Frankfurt and Rome which previously received traffic channelled through hubs. The total volume of traffic is not affected.
- Prior to the change, statistics reported for city pairs without "same flight number" international flight connections mainly reflected carriage on interconnecting international services by Qantas Airways. That traffic should have been interpreted as increasing the volume of traffic between the primary international ports rather than as an indicator of traffic volumes between ports without "same flight number" international flight connections. It should be noted however, that there was no double counting of traffic.

14. Country of Service classification by Qantas Airways:

- For July 2002 and onwards: based on the foreign country where same flight number services commence or cease – as per the standard definition. For example, Sydney-Denpasar-Singapore services would be classified as Country of Service = Singapore.
- Prior to July 2002: based on Qantas classification – this mainly affected Indonesia and Singapore Countries of Service. For example, Sydney-Denpasar-Singapore services were classified as Country of Service = Indonesia.

15. Airline data – Reporting of code share services:

Reporting of traffic split by airline code for code share arrangements was discontinued as of June 2000. For July 2000 and onwards, ALL traffic carried is reported under the operating airline regardless of code share arrangements.

Monthly airline market share figures for July 2001 onwards will be comparable with the same month in the previous year. However, these figures may not be comparable with monthly data prior to July 2000.

SYMBOLS AND OTHER USAGE

- nil or zero
- .. not applicable

DATA ISSUES

Solomon Airlines

Data for January 2013 is under review and no data have been received for February 2013, March 2013, April 2013 and May 2013. Data for June 2013 were received and have been included in this publication. Data have been estimated for January to May 2013.

Vietnam Airlines

The split of inbound passenger movements from Ho Chi Minh City and Hanoi to Sydney have been estimated for June 2010 and onwards.

AIRLINES COMMENCING/WITHDRAWING SERVICES DURING 2012-13

Commencing:

Polar Air Cargo – Service recommenced July 2012.

Sichuan Airlines – Service commenced February 2013.

Ceasing:

Air Austral – Service ceased August 2012.

HIGHLIGHTS – YEAR ENDED JUNE 2013

- Fifty-four international scheduled airlines operated services to/from Australia during the year (includes 5 dedicated freight airlines but excludes airlines operating only via code share arrangements).
- International scheduled passenger traffic in 2012-13 was 30.309 million compared to 28.882 million in 2011-12 – an increase of 4.9 per cent.
- Chart I shows total passenger traffic for the years 2002-03 to 2012-13. Over this period, each year has recorded an increase in traffic compared to the previous year.
- Chart II compares monthly passenger traffic for 2012-13 with monthly passenger traffic for 2011-12. March 2011 (-1.6 per cent) recorded the only annual month on month decrease in traffic since March 2009.
- Chart III shows the airline market shares in terms of passenger carriage for the top ten airlines for 2002-03, 2007-08 and 2012-13. In the latest year, Qantas Airways had the largest share of the market with 17.2 per cent followed by Singapore Airlines with 9.1 per cent, Emirates with 8.8 per cent, Virgin Australia with 8.1 per cent and Jetstar also with 8.1 per cent.
- Compared to 2002-03, Qantas Airways' share has decreased by 15.5 percentage points, Singapore Airlines' share has decreased by 2.2 percentage points and Emirates' share has increased by 6.4 percentage points. Virgin Australia did not commence international operations until January 2004 and Jetstar did not commence international operations until December 2005. The decrease in share for the Qantas group (Qantas Airways, Jetstar and Jetstar Asia in 2012-13 compared to Qantas and Australian Airlines in 2002-03) was 8.7 percentage points.
- The share of passenger traffic accounted for by Australian designated airlines decreased from 34.3 per cent in 2002-03 to 33.0 per cent in 2007-08 and to 31.4 per cent in 2012-13. Qantas Airways, Jetstar and Virgin Australia (excluding services operated under New Zealand designation) contributed to the Australian airline share in 2012-13.
- Seats made available on international scheduled operations in 2012-13 totaled 40.428 million – an increase of 4.8 per cent compared to 2011-12. The overall seat utilisation percentage increased from 75.5 per cent in 2010-11 to 76.6 per cent in 2011-12 and to 77.3 per cent in 2012-13. Note that for November 2011 and onwards, total passengers carried by Emirates into and out of Australia have been used to calculate seat utilisation. For prior periods, only Emirates passengers uplifted from Australia or discharged in Australia were used which resulted in lower seat utilisation percentages (1.2 percentage points lower in 2011-12).
- In 2012-13, Low Cost Carriers AirAsia X, Indonesia AirAsia, Jetstar, Jetstar Asia, Scoot and Tiger Airways together accounted for 14.1 per cent of total international passenger traffic. This compares to the LCC share of 15.6 per cent in 2011-12. The decrease in the LCC share is mainly because Virgin Australia replaced the low cost brands Pacific Blue and Polynesian Blue with the full service brands Virgin Australia and Virgin Samoa in December 2011.
- International scheduled air freight traffic increased by 3.1 per cent to 883 101 tonnes in 2012-13. Inbound freight increased by 0.3 per cent to 535 164 tonnes. Outbound freight increased by 7.6 per cent to 347 937 tonnes.
- In 2012-13, scheduled dedicated freighter operations accounted for 25.1 per cent of scheduled inbound air freight to Australia, 13.3 per cent of scheduled outbound air

freight from Australia and 20.4 per cent of total scheduled air freight. Note that some freighters do not pick up freight in Australia and that accounts for the difference in inbound and outbound percentages.

- Table VI on page 13 shows Traffic On Board passenger movements, flights and operated seats at Australian international airports. All traffic is shown against the first Australian airport for arrivals to Australia and the last Australian airport for departures from Australia. Movements between Australian airports are not accounted for.
- Seat utilisation at capital city airports in 2012-13 increased at Darwin (2.9 percentage points), Sydney (1.7 percentage points), Brisbane (0.9 percentage points) and Melbourne (0.6 percentage points) but declined at Perth (1.9 percentage points) and Adelaide (6.5 percentage points). Melbourne recorded the highest rate at 78.7 per cent followed closely by Sydney on 78.6 per cent while of the major airports, Cairns had the lowest rate at 68.5 per cent. Of the 40.428 million seats operated to/from Australia in 2012-13, Sydney accounted for 41.7 per cent followed by Melbourne with 22.4 per cent, Brisbane with 15.2 per cent and Perth with 12.4 per cent.
- Table VII on page 14 shows Traffic On Board passenger movements, flights and operated seats between Australia and the top thirty countries with non-stop air service connections.
- New Zealand, Singapore, USA, United Arab Emirates and Malaysia were the top five countries in terms of traffic on board passenger movements in 2012-13. Seat utilisation was highest for Chile with 83.5 per cent followed by Canada with 83.1 per cent and United Arab Emirates with 82.8 per cent.
- Table VIII on page 14 shows Traffic On Board passenger movements, flights and operated seats between Australia and the top thirty international cities with non-stop air service connections.
- In 2012-13, 17.8 per cent of the passenger movements to/from Australia were either to/from or via Singapore. Auckland was the next largest hub accounting for 13.4 per cent followed by Kuala Lumpur which accounted for 7.2 per cent. Dubai was the 7th largest hub accounting for 5.6%.
- Page 15 is a diagrammatic representation of Traffic On Board passenger movements, flights and operated seats by region. The region is based on international cities with non-stop air service connections with Australia. In 2012-13, 39.4 per cent of the 40.428 million seats operated to/from Australia were either to/from or via South East Asia. New Zealand had 20.3 per cent of the total followed by North East Asia with 16.7 per cent.
- The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication.

Chart IV Share of Operated Seats at Australian International Airports - 2012-13

The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication. The figures above include some adjustments. The data shown here covers non-stop international connections only - it does not include movements between Australian airports.

Please see notes on page 14 as well.

* First port of call for arrivals to Australia or last port of call for departures from Australia.

Table VII Traffic on Board Passenger Movements, Flights and Seats on Non-Stop Passenger Services By Country - 2012-13

Country *	No. of Flights	Passengers	Seats	Seat Utilisation %
New Zealand	40 360	6 318 628	8 194 743	77.1%

The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication.

The figures above include some adjustments.

The total number of flights, passenger movements and seats shown correspond to total passenger services reported in Table 3.

Passenger numbers shown here do not include passengers not uplifted/discharged in Australia for airlines other than Emirates and Qantas Airways.

* First country/port of call for departures from Australia or last country/port of call for arrivals to Australia.

TRAFFIC ON BOARD PASSENGER MOVEMENTS, FLIGHTS AND SEATS BY REGION BASED ON NON-STOP SERVICES TO AND FROM AUSTRALIA

Please refer to explanatory notes - paragraphs 3, 6 and 13 in particular.

- (a) Operations between Australia and New Caledonia are shown under Air Caledonie. Service ceased August 2012.
- (b) Operated as Strategic Airlines prior to November 2011. Service ceased February 2012.
- (c) Operations taken over by United Airlines for March 2012 and onwards.
- (d) Air Pacific has been re-branded as Fiji Airways.
- (e) Service ceased February 2012.
- (f) Service recommenced July 2012.
- (g) Service commenced June 2012.
- (h) Service commenced February 2013.
- (i) Service recommenced March 2012.
- (j) Data have been estimated for January 2013 to May 2013.
- (k) Pacific Blue and V Australia were re-branded as Virgin Australia in December 2011. Figures for V Australia which operated under its own airline code are shown separately prior to December 2011 and should be added to Virgin Australia figures if calculating changes in market share between the two periods shown in this table.
- (l) Polynesian Blue was re-branded as Virgin Samoa in December 2011.

TABLE 3 AIRLINE PASSENGER CAPACITY AND UTILISATION TO AND FROM AUSTRALIA BY OPERATOR: Year ended June 2013

Please refer to explanatory notes - paragraphs 4, 5, 7 and 14 in particular.

In addition to the above, please note the following regarding Seat Factors shown in this table:

Traffic shown in this table for Emirates and Qantas Airways will differ from traffic shown in Tables 1 and 2 because of the inclusion in this table of total traffic into and ex Australia (for seat factor purposes) whereas Tables 1 and 2 include uplift/discharge traffic only.

All other airlines report uplift/discharge traffic only. Therefore, for other airlines operating via Australia, the seat factors shown here reflect the total seats on the aircraft but only the Australian uplift/discharge portion of passengers on the aircraft. The true seat factors for airlines that operate via Australia will most likely be higher than what is shown in this table.

The following airlines are affected:

Air Austral and China Airlines

- (a) Traffic carried via Australia to/from New Caledonia is not recorded and therefore, reported seat utilisation figures are understated.
- (b) Operations between Australia and New Caledonia are shown under Air Caledonie. Service ceased August 2012.
- (c) Traffic carried via Australia to/from New Zealand is not recorded and therefore, reported seat utilisation figures are understated.
- (d) Freight flights only.
- (e) Air Pacific was re-branded as Fiji Airways in mid 2013.
- (f) Service recommenced July 2012.
- (g) Service commenced February 2013.
- (h) Data have been estimated for January 2013 to May 2013.

Please refer to explanatory notes - paragraphs 3, 8 and 13 in particular.

**TABLE 6 INTERNATIONAL AIRLINES OWN STOPOVER REVENUE PASSENGERS,
AUSTRALIAN CITY PAIRS: Year ended June 2013**

City Pair Route	Total Passengers
Melbourne/Sydney	38 909
Brisbane/Cairns	2 633
Brisbane/Sydney	284
Adelaide/Melbourne	255
TOTAL	42 081

Notes:

1. Own Stopover Revenue Passengers : The aggregate of revenue passengers uplifted at one Australian airport and discharged (excluding transit passengers) at another Australian airport by the same foreign registered international airline on which they entered or left Australia.
2. City Pair Route represents the aggregation of passengers travelling in both directions.
3. This data is additional to the information presented in tables 1-5 which cover only those passengers travelling to/from overseas airports.
