Foreword

The Bureau of Infrastructure and Transport Research Economics (BITRE) monitors the punctuality and reliability of major domestic airlines operating between Australian airports. The purpose of this is to allow for evaluation of overall industry and individual airline performance, so that consumers of air travel can make informed decisions.

The following domestic airlines currently report this information monthly to the BITRE: Hinterland, Jetstar, Qantas, QantasLink, Rex Airlines, SmartLynx Australia (formally Skytrans), Virgin Australia and Virgin Australia Regional Airlines.

Information presented in this report is for Australian domestic routes for which the passenger load averaged 8,000 or more passengers per month over the previous six months and where two or more airlines operated in competition on those routes. Data are presented for 59 routes in October 2025. Over time, routes which meet these criteria change as airline networks and traffic levels vary. Participating airlines report their overall monthly network performance where this is possible.

Total industry figures encompass all services operated by reporting airlines only. These airlines collectively carried over 98% of total domestic passengers (regular public transport only) in 2024.

The method of capturing on time performance varies between airlines utilising different recording systems. Jetstar and Qantas jet aircraft use Aircraft Communication Addressing and Reporting System (ACARS) to electronically measure on time performance. Rex Airlines, Virgin Australia, Virgin Australia Regional Airlines and the Qantas non-jet fleet record on time performance manually using records from pilots, gate agents and/or ground crews.

After initial data is collected, aggregate reports are reviewed by participating airlines prior to publication.

Reports and detailed time series data in Microsoft Excel spreadsheet format are available from the BITRE website at: <http://www.bitre.gov.au/statistics/aviation/otphome.aspx>
