Seat Factors shown in this table:

Traffic shown in this table for China Airlines, China Eastern Airlines, Emirates and Qantas Airways may differ from traffic shown in Tables 1 and 2 because of the inclusion in this table of total traffic into and ex Australia (for seat factor purposes) whereas Tables 1 and 2 include uplift/discharge traffic only. All other airlines report uplift/discharge traffic only. Currently, there are no other airlines operating via Australia, and therefore uplift/discharge traffic is the same as total traffic into and ex Australia for all other airlines.

(a) Freight flights only.

# EXPLANATORY NOTES

---

## INTRODUCTION

1. This publication continues the series of monthly publications presenting provisional statistical information on the scheduled operations of international airlines operating into/out of Australia.
2. The figures in this publication were obtained from reports submitted by scheduled international carriers and are the best available at the time of publication.

## COVERAGE

3. These statistics show uplift/discharge data – These data detail, by direction, the revenue traffic between the actual points of uplift and discharge within each flight, aggregated for all flights within the period. It shows the movement of traffic between two airports not necessarily directly connected but within the same flight number. Typically, flight numbers change when an aircraft reaches its home country. This means that uplift/discharge data for the port in the operator's home country are likely to be overstated by traffic whose origin/destination point is beyond that port. For example, uplift/discharge traffic reported in this publication as Singapore could include traffic whose origin/destination is Europe.
4. These statistics cover revenue traffic carried by the operators of scheduled regular public international air transport services only and do not include charter traffic.
5. Flights with no revenue traffic uplifted from Australia or discharged in Australia are treated as positioning flights and are not included in this data collection. This mainly affects dedicated freighter flights where some flights outbound from Australia do not pick up freight in Australia.

## PRODUCTION AND INTERPRETATION

6. Tables 1 and 2 show the country of the relevant uplift or discharge port served by that airline. For example, traffic uplifted/discharged between Sydney and Singapore by British Airways would be shown as Singapore traffic in Tables 1 and 2.
7. Table 3 shows figures for the country of service (or route) for each airline and therefore may not equate to the data in Tables 1 and 2. For example, the British Airways UK service identified in Table 3 could include passengers uplifted or discharged in Singapore as well as the UK; these passengers would be shown individually under those countries in Tables 1 and 2. The difference in treatment of data between Tables 1 and 2 and Table 3 is necessary in order to work out a meaningful Seat Utilisation figure for Table 3.

Figures shown in Table 3 may include total traffic into and out of Australia for airlines that fly through Australia (also necessary in order to work out a meaningful Seat Utilisation figure). Therefore, figures in Table 3 may not equate to figures in Tables 1 and 2. For example, passengers carried by Qantas Airways from New Zealand via Australia to the UK will be included in Table 3 but will not be included in Tables 1 or 2 as these passengers were not uplifted/discharged in Australia.

8. Table 5 – shows uplift/discharge passenger and freight data for city pairs with “same flight number” international flight connections.

9. Where figures have been rounded, discrepancies may occur between sums of component items and totals, and in percentage changes which are derived from figures prior to rounding.
10. Published figures may be revised where figures missing at the time of publication are received or misreporting/miscalculation necessitates revisions.

## DEFINITIONS

11. The following definitions have been used in this publication:
  - (a) Aircraft Movement: A landing or a take off.
  - (b) Freight: The aggregate of all revenue freight uplifted or discharged in Australia.
  - (c) Inbound: Inbound to Australia/Australian international airport.
  - (d) Mail: The aggregate of all mail uplifted or discharged in Australia.
  - (e) Outbound: Outbound from Australia/Australian international airport.
  - (f) Revenue Passengers: All passengers paying any fare (frequent flyer redemption passengers are regarded as revenue passengers). In most cases, Revenue Passengers includes all passengers excluding Free Of Charge passengers and positioning crew.
  - (g) Seat Utilisation: The ratio of passengers carried to seats available, expressed as a percentage.
  - (h) Seats Available: Generally based on standard aircraft configuration, the aggregate of seats available on all flights operated over a particular service.
  - (i) Services: Scheduled flights over authorised routes which are listed according to the main ports involved.

## SYMBOLS AND OTHER USAGE

- nil or zero
- .. not applicable

## DATA ISSUES

---

Seat utilisation: Available seats have not been counted where passenger aircraft have been used to operate freight-only services. However, this adjustment cannot be made for airlines that report monthly aggregates and that have operated a mix of passenger and freight-only services using passenger aircraft.

Freight: Gross weight was used for Tasman Cargo Airlines and partial routes for Federal Express prior January 2025.

## NOTES ON AIRLINE SERVICES

---

Jetstar commenced flying three times weekly Perth to Manila and return services in November 2025.
