7. Total Aircraft Movements at Australian International Airports by Aircraft Types ...	31
Explanatory Notes .....	32-34
Data Issues and Notes on Airline Services.....	35

## HIGHLIGHTS – YEAR ENDED JUNE 2021-22

---

- Fifty-six international scheduled airlines operated services to/from Australia during the year (includes four dedicated freight airlines but excludes airlines operating only via code share arrangements). Forty-six airlines operated passenger air services during the year compared to fifty-eight in 2018-19.
- International scheduled passenger traffic in 2021-22 was 6.509 million compared to 1.123 million in 2020-21 and 42.121 million in 2018-19. The decrease compared to 2018-19 is 84.5 per cent. International air services continue to be severely impacted by the COVID-19 pandemic.
- Chart I shows total passenger traffic for the years 2011-12 to 2021-22. Over this period, each year except for 2019-20 and 2020-21 recorded an increase in traffic compared to the previous year.
- Chart II compares monthly passenger traffic for calendar years 2019 to 2022.
- Chart III shows the airline market shares in terms of passenger carriage for the top ten airlines for 2011-12, 2016-17 and 2021-22. In the latest year, Singapore Airlines had the largest share of the market with 17.1 per cent followed by Qantas Airways with 15.7 per cent, Emirates with 11.1 per cent, Air New Zealand with 8.6 per cent and Qatar Airways with 7.4 per cent.
- Compared to 2011-12, Singapore Airlines' share has increased by 8.1 percentage points, Qantas Airways' share has decreased by 2.4 percentage points, Emirates' share has increased by 2.9 percentage points, Air New Zealand's share has increased by 0.4 percentage points and Qatar Airways' share has increased by 6.9 percentage points.
- In 2021-22, the decrease in share of passenger traffic for the Qantas group (Qantas Airways, Jetstar and Jetstar Asia) was 4.0 percentage points compared to 2011-12.
- The share of passenger traffic accounted for by Australian designated airlines decreased from 32.9 per cent in 2011-12 to 31.5 per cent in 2016-17 and was down to 23.1 per cent in 2021-22. Qantas Airways, Jetstar and Virgin Australia contributed to the Australian airline share in 2021-22.
- Seats made available on international scheduled operations in 2021-22 totaled 12.218 million compared to 5.553 million in 2020-21 and 53.863 million in 2018-19. The overall seat utilisation percentage decreased from 80.4 per cent in 2018-19 to 20.2 per cent in 2020-21 and has risen to 53.7 per cent in 2021-22.
- In 2018-19, Low Cost Carriers AirAsia X, Cebu Pacific Air, Indonesia AirAsia, Jetstar, Jetstar Asia, Scoot Tigerair and Thai AirAsia X together accounted for 14.5 per cent of total international passenger traffic. In 2021-22 the Low Cost Carrier share was 10.7 per cent with AirAsia X, Indonesia AirAsia, Jetstar, Jetstar Asia and Scoot Tigerair having carried passengers.
- International scheduled air freight traffic was 977,931 tonnes in 2021-22, 895,049 tonnes in 2020-21 and 1,141,391 tonnes in 2018-19. The decrease for the latest year compared to 2018-19 was 14.3 per cent. Compared to 2018-19, inbound freight decreased by 0.5 per cent to 558,868 tonnes and outbound freight decreased by 27.7 per cent to 419,064 tonnes.
- In 2021-22, scheduled dedicated freighter operations accounted for 67.2 per cent of scheduled inbound air freight to Australia, 57.4 per cent of scheduled outbound air freight from Australia and 63.0 per cent of total scheduled air freight. Several airlines

have only operated freight-only services to and from Australia during the period impacted by COVID-19 while suspending passenger air services. During the COVID-19 period, scheduled air services that did not carry passengers have been recorded as dedicated freighters. For comparison, in 2018-19 dedicated freighters carried 20.2 per cent of inbound, 13.4 per cent of outbound and 16.7 per cent of total scheduled air freight.

- Table VI on page 9 shows Traffic On Board passenger movements, flights and operated seats at Australian international airports. All traffic is shown against the first Australian airport for arrivals to Australia and the last Australian airport for departures from Australia. Movements between Australian airports are not accounted for.
- Table VII on page 10 shows Traffic On Board passenger movements, flights and operated seats between Australia and the top countries with non-stop air service connections. Singapore, United Arab Emirates, New Zealand, USA and Qatar were the top five countries in terms of traffic on board passenger movements in 2021-22.
- Table VIII on page 10 shows Traffic On Board passenger movements, flights and operated seats between Australia and the top international cities with non-stop air service connections. In 2021-22, 24.3 per cent of the passenger movements to/from Australia were either to/from or via Singapore. Dubai was the next largest hub accounting for 11.0 per cent followed by Auckland (10.1 per cent), Doha (7.4 per cent) and Nadi (5.1 per cent).
- Page 11 is a diagrammatic representation of Traffic On Board passenger movements, flights and operated seats by region. The region is based on international cities with non-stop air service connections with Australia. In 2021-22, 41.6 per cent of the 12.218 million seats operated to/from Australia were either to/from or via South East Asia. Middle East had 18.0 per cent followed by North America at 10.6 per cent, New Zealand at 9.6 per cent, North East Asia at 8.1 per cent and the other regions accounted for 12.1 per cent.
- The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication.

**Chart IV Share of Operated Seats at Australian International Airports - 2021-22**

The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication. The figures above include some adjustments. The data shown here covers non-stop international connections only - it does not include movements between Australian airports. Please see notes on page 14 as well.

\* First port of call for arrivals to Australia or last port of call for departures from Australia.

The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication.

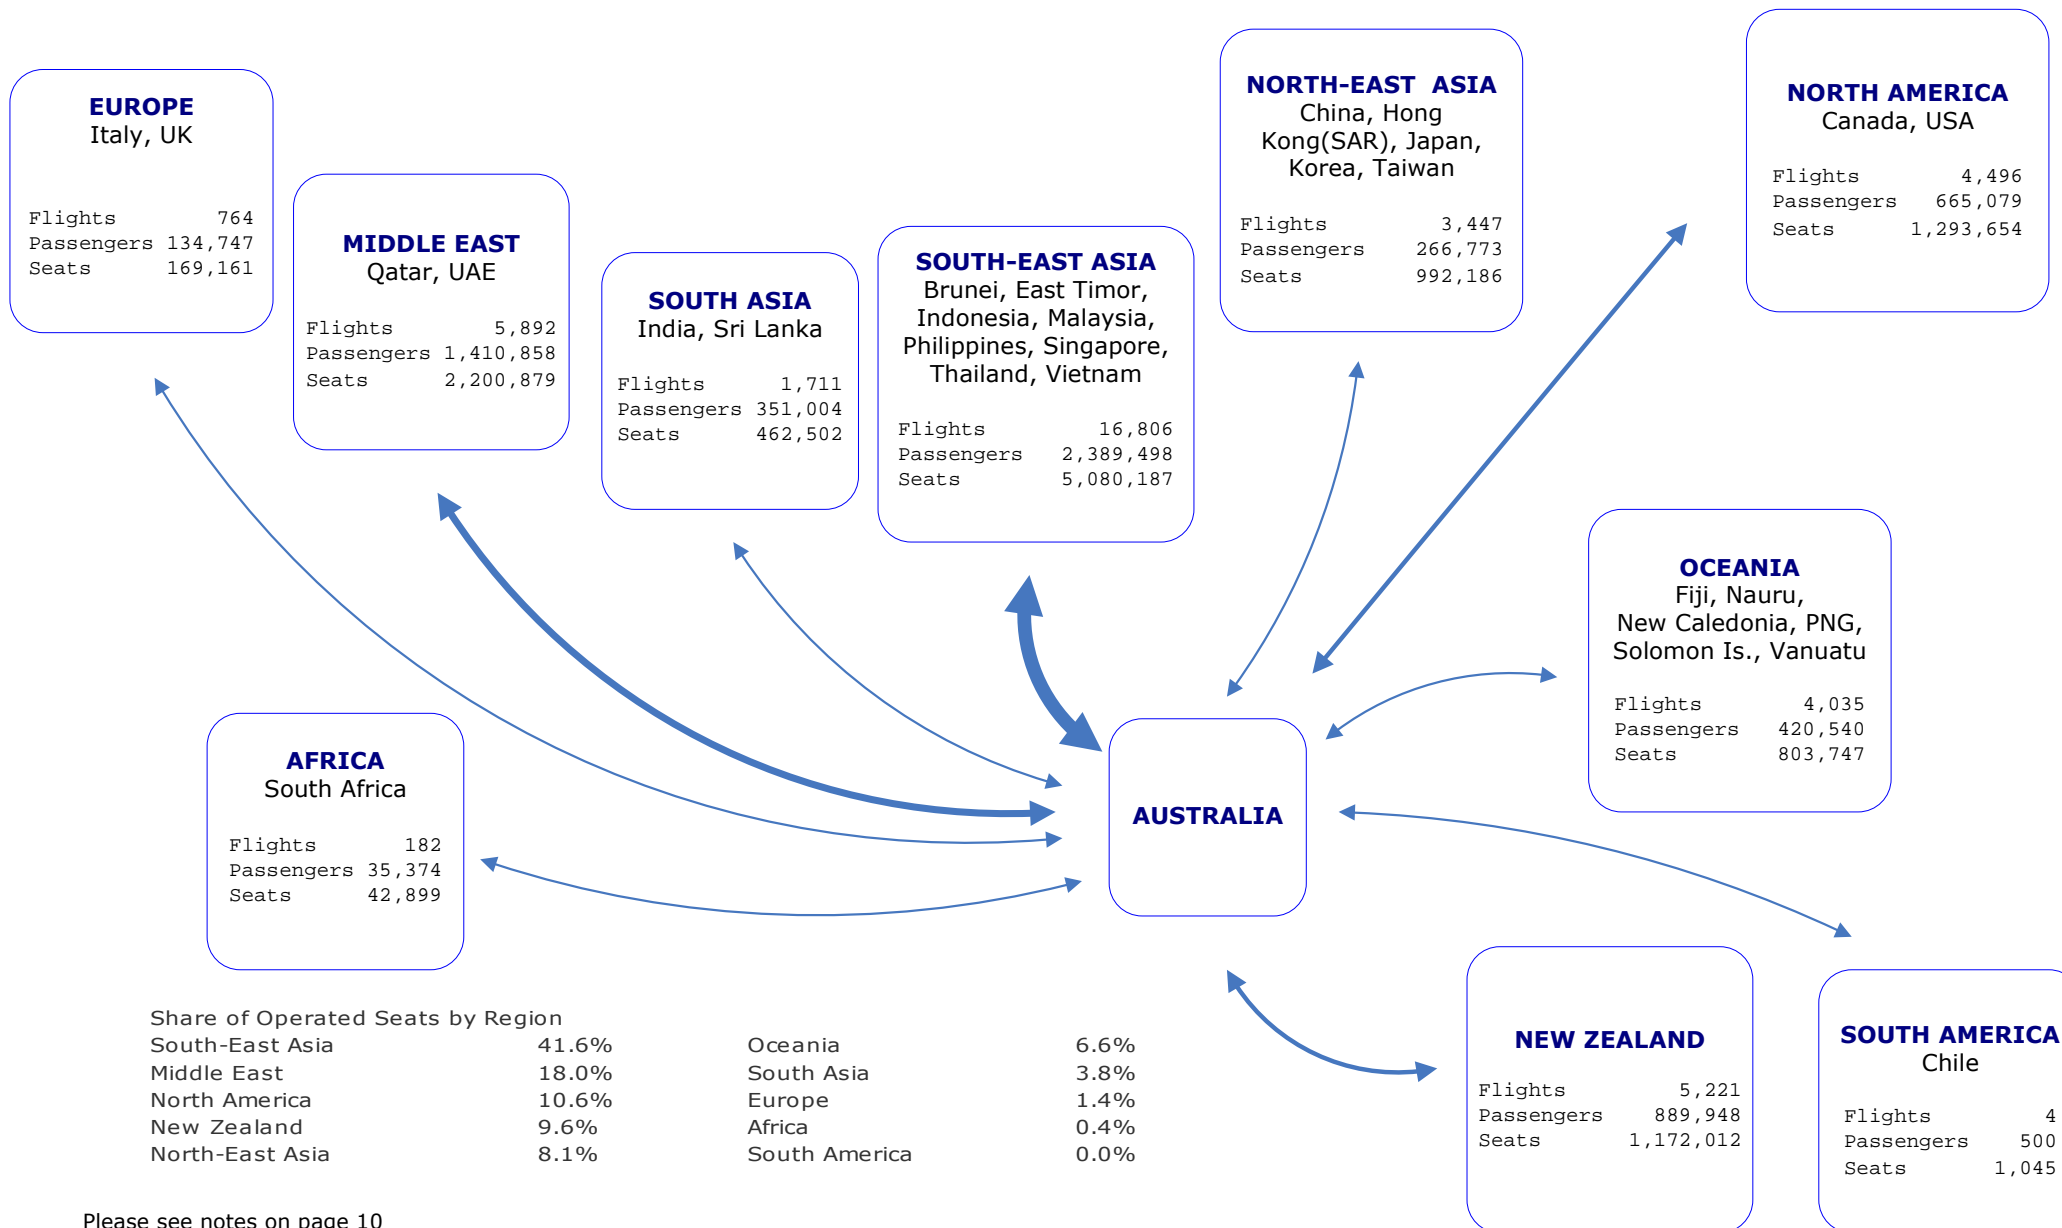

The total number of flights, passenger movements and seats shown correspond to total passenger services reported in Table 3.

Passenger numbers used here for China Airlines, Emirates, Qantas Airways and Singapore Airlines are total carried into and out of Australia.

\* First country/port of call for departures from Australia or last country/port of call for arrivals to Australia.

**TRAFFIC ON BOARD PASSENGER MOVEMENTS, FLIGHTS AND SEATS BY REGION  
BASED ON NON-STOP SERVICES TO AND FROM AUSTRALIA**

SCHEDULED INTERNATIONAL PASSENGER AIR SERVICES – Year ended June 2022

Please see notes on page 10

Please refer to explanatory notes - paragraphs 4, 5, and 7 in particular.

Seat Factors shown in this table:

Traffic shown in this table for Qantas Airways and Qatar Airways may differ from traffic shown in Tables 1 and 2 because of the inclusion in this table of total traffic into and ex Australia (for seat factor purposes) whereas Tables 1 and 2 include uplift/discharge traffic only. All other airlines report uplift/discharge traffic only. Currently, there are no other airlines operating via Australia, and therefore uplift/discharge traffic is the same as total traffic into and ex Australia for all other airlines.

Available seats have not been counted where passenger aircraft have been used to operate freight only services. However, this adjustment cannot be made for airlines that report monthly aggregates and that have operated a mix of passenger and freight only services using passenger aircraft.

(a) Services commenced March 2022.

(b) Freight flights only.

**TABLE 6 INTERNATIONAL AIRLINES OWN STOPOVER REVENUE PASSENGERS,  
AUSTRALIAN CITY PAIRS: Year ended June 2022**

City Pair Route	Total Passengers
TOTAL	0

Notes:

1. Own Stopover Revenue Passengers : The aggregate of revenue passengers uplifted at one Australian airport and discharged (excluding transit passengers) at another Australian airport by the same foreign registered international airline on which they entered or left Australia.
2. City Pair Route represents the aggregation of passengers travelling in both directions.
3. This data is additional to the information presented in tables 1-5 which cover only those passengers travelling to/from overseas airports.

**TABLE 7 TOTAL AIRCRAFT MOVEMENTS AT AUSTRALIAN INTERNATIONAL AIRPORTS BY AIRCRAFT TYPES: Year ended June 2022**

Airport	Passenger Aircraft									Freighters			All Types	
	32S	330	350	380	737	767	777	787	Other	33F/M1F/ 73F	74F	76F		77F

Fokker	70	100						

# EXPLANATORY NOTES

---

## INTRODUCTION

1. This publication continues the series of publications on a financial year basis presenting statistical information on the scheduled operations of international airlines operating into/out of Australia.
2. The figures in this publication were obtained from reports submitted by scheduled international carriers and are the best available at the time of publication.

## COVERAGE

3. These statistics show uplift/discharge data – These data detail, by direction, the revenue traffic between the actual points of uplift and discharge within each flight, aggregated for all flights within the period. It shows the movement of traffic between two airports not necessarily directly connected but within the same flight number. Typically, flight numbers change when an aircraft reaches its home country. This means that uplift/discharge data for the port in the operator's home country are likely to be overstated by traffic whose origin/destination point is beyond that port. For example, uplift/discharge traffic reported in this publication as Singapore could include traffic whose origin/destination is Europe.
4. These statistics cover revenue traffic carried by the operators of scheduled regular public international air transport services only and do not include charter traffic.
5. Flights with no revenue traffic uplifted from Australia or discharged in Australia are treated as positioning flights and are not included in this data collection. This mainly affects dedicated freighter flights where some flights outbound from Australia do not pick up freight in Australia.

## PRODUCTION AND INTERPRETATION

6. Tables 1 and 2 show the country of the relevant uplift or discharge port served by that airline. For example, traffic uplifted/discharged between Sydney and Singapore by British Airways would be shown as Singapore traffic in Tables 1 and 2.
7. Table 3 shows figures for the country of service (or route) for each airline and therefore may not equate to the data in Tables 1 and 2. For example, the British Airways UK service identified in Table 3 could include passengers uplifted or discharged in Singapore as well as the UK; these passengers would be shown individually under those countries in Tables 1 and 2. The difference in treatment of data between Tables 1 and 2 and Table 3 is necessary in order to work out a meaningful Seat Utilisation figure for Table 3.

Figures shown in Table 3 may include total traffic into and out of Australia for airlines that fly through Australia (also necessary in order to work out a meaningful Seat Utilisation figure). Therefore, figures in Table 3 may not equate to figures in Tables 1 and 2. For example, passengers carried by Qantas Airways from New Zealand via Australia to the UK will be included in Table 3 but will not be included in Tables 1 or 2 as these passengers were not uplifted/discharged in Australia.

8. Table 5 – shows uplift/discharge passenger and freight data for city pairs with “same flight number” international flight connections.

9. Where figures have been rounded, discrepancies may occur between sums of component items and totals, and in percentage changes which are derived from figures prior to rounding.
10. Published figures may be revised where figures missing at the time of publication are received or misreporting/miscalculation necessitates revisions.

## DEFINITIONS

11. The following definitions have been used in this publication:
  - (a) Aircraft Movement: A landing or a take off.
  - (b) Freight: The aggregate of all revenue freight uplifted or discharged in Australia.
  - (c) Inbound: Inbound to Australia/Australian international airport.
  - (d) Mail: The aggregate of all mail uplifted or discharged in Australia.
  - (e) Outbound: Outbound from Australia/Australian international airport.
  - (f) Revenue Passengers: please refer to paragraph 12.
  - (g) Seat Utilisation: The ratio of passengers carried to seats available, expressed as a percentage.
  - (h) Seats Available: Generally based on standard aircraft configuration, the aggregate of seats available on all flights operated over a particular service.
  - (i) Services: Scheduled flights over authorised routes which are listed according to the main ports involved.

## COMPARABILITY OF DATA OVER TIME

### 12. Revenue Passengers:

- For July 2000 and onwards: All passengers paying any fare (frequent flyer redemption passengers are regarded as revenue passengers). In most cases, Revenue Passengers will now include all passengers excluding Free Of Charge passengers and positioning crew.
- To December 1999: The aggregate of all passengers paying 25% or more of the standard air fare (as defined by ICAO at the time).
- January 2000 to June 2000: Transition period.

The Revenue Passenger definition change could result in approximately a three per cent increase in passenger numbers over a full period (month or year).

### 13. Country and City data – reporting of Uplift/Discharge data by Qantas Airways:

- Prior to January 2003: Uplift/Discharge within Qantas Airways' international network.
- For January 2003 and onwards: Uplift/Discharge within flight number – as per the standard definition.

For example, what was reported as Adelaide to London in January 2002 (no direct services between these two cities), would be reported in January 2003 as either Adelaide to Singapore or Melbourne/Sydney to London.

This change was introduced in order to make the data comparable across all airlines operating services to/from Australia.

The effect of this change – comparing data under the two methods of reporting:

- Country of Port data (Tables 1 & 2) – There will be a shift in traffic to countries such as Singapore and United Arab Emirates (from 2013) which are used as hubs and away from countries such as France, Germany and Italy which

previously received traffic channelled through hubs. The total volume of traffic is not affected.

- Country of Service data (Table 3) – no change, as the Uplift/Discharge definition is not applicable to classifying the country of service.
- Australian International Airports (Table 4) – there may be a shift of traffic to the major airports.
- City Pairs (Table 5) – There will be a shift in traffic to cities such as Singapore and Dubai (from 2013) which are used as hubs and away from cities such as Paris, Frankfurt and Rome which previously received traffic channelled through hubs. The total volume of traffic is not affected.
- Prior to the change, statistics reported for city pairs without “same flight number” international flight connections mainly reflected carriage on interconnecting international services by Qantas Airways. That traffic should have been interpreted as increasing the volume of traffic between the primary international ports rather than as an indicator of traffic volumes between ports without “same flight number” international flight connections. It should be noted however, that there was no double counting of traffic.

14. Country of Service classification by Qantas Airways:

- For July 2002 and onwards: based on the foreign country where same flight number services commence or cease – as per the standard definition. For example, Sydney-Denpasar-Singapore services would be classified as Country of Service = Singapore.
- Prior to July 2002: based on Qantas classification – this mainly affected Indonesia and Singapore Countries of Service. For example, Sydney-Denpasar-Singapore services were classified as Country of Service = Indonesia.

15. Airline data – Reporting of code share services:

Reporting of traffic split by airline code for code share arrangements was discontinued as of June 2000. For July 2000 and onwards, ALL traffic carried is reported under the operating airline regardless of code share arrangements.

Monthly airline market share figures for July 2001 onwards will be comparable with the same month in the previous year. However, these figures may not be comparable with monthly data prior to July 2000.

## SYMBOLS AND OTHER USAGE

- nil or zero
- .. not applicable

## DATA ISSUES

---

During the period impacted by the COVID-19 pandemic, airlines that normally would only operate scheduled air services could also operate charter air services and where charter air services are not clearly identified, they may be included in the data in this publication.

Seat utilisation:

Available seats have not been counted where passenger aircraft have been used to operate freight-only services. However, this adjustment cannot be made for airlines that report monthly aggregates and that have operated a mix of passenger and freight-only services using passenger aircraft.

## AIRLINES COMMENCING/WITHDRAWING SERVICES DURING 2021-22

---

Bamboo Airways commenced scheduled air services in March 2022.

Several airlines suspended all scheduled services or only operated freight-only services to and from Australia during the period impacted by COVID-19.

Compared to 2018-19 (before COVID-19), the following airlines have not operated scheduled air services to/from Australia during 2021-22:

Air Mauritius  
Batik Air Indonesia  
Beijing Capital Airlines  
Donghai Airlines  
Pacific Air Express  
Polar Air Cargo  
Samoa Airways  
Sichuan Airlines  
Silk Air  
South African Airways
