

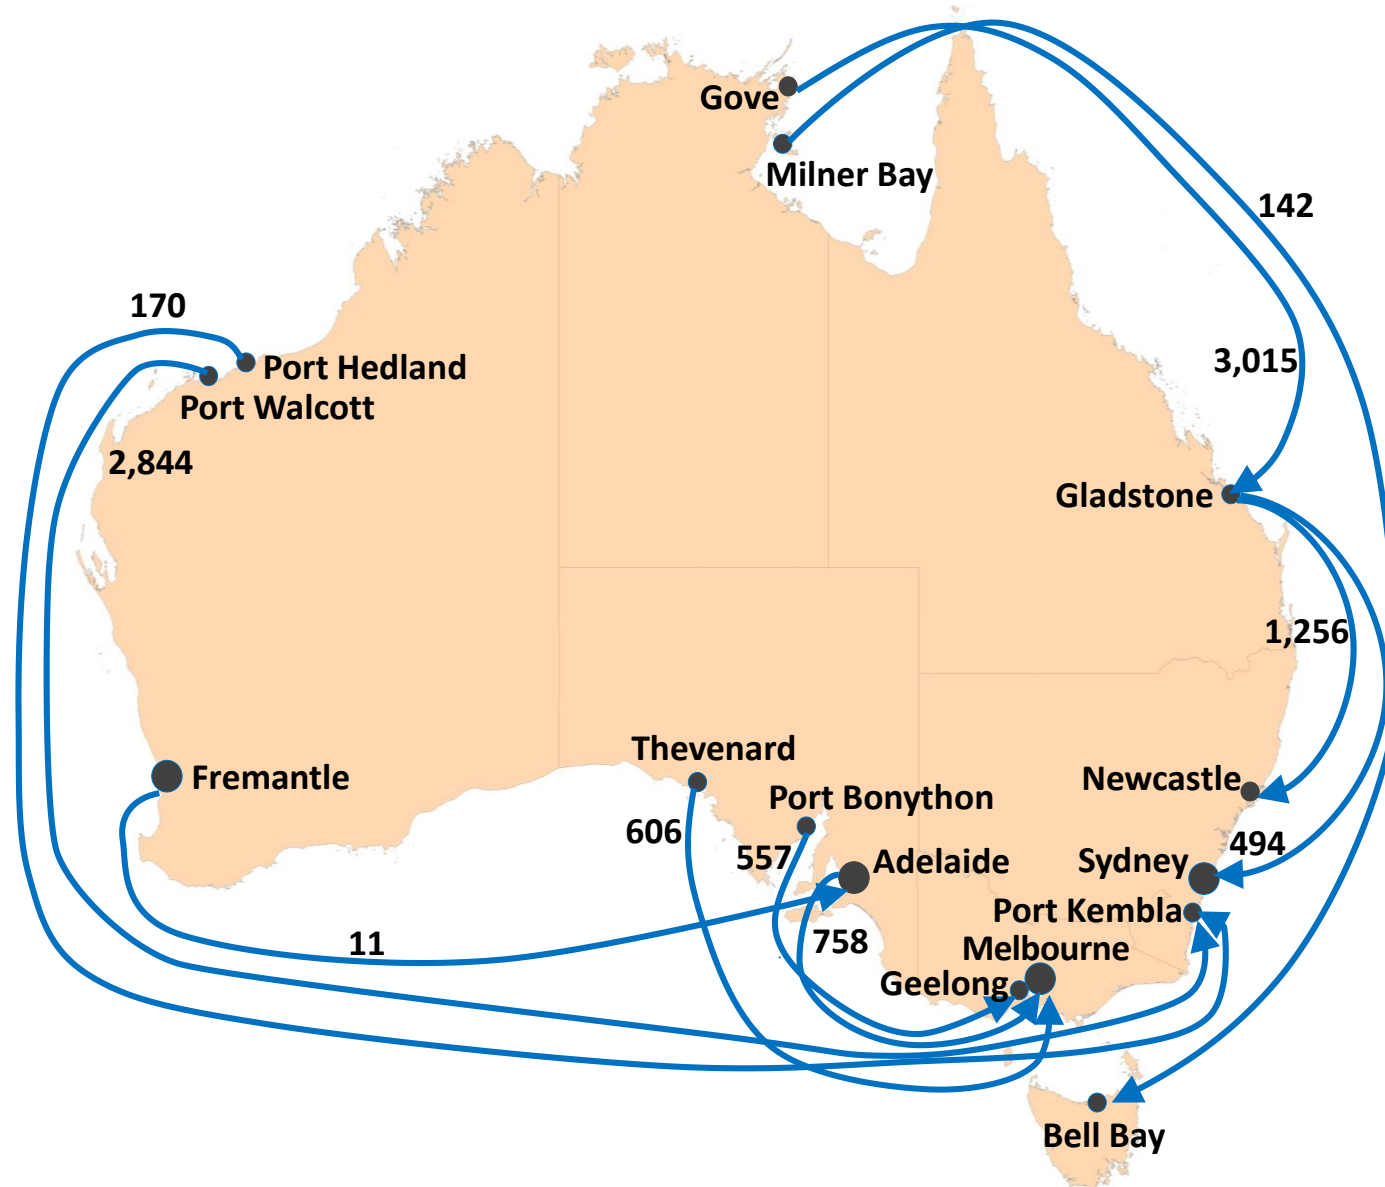

**Figure 3.1 Top 10 routes for tonnage of freight carried under temporary licence, 2023–24 ('000 tonnes)**

Notes: The top 10 routes for tonnage are the routes that carried the largest weight of coastal freight under temporary licence summed over 10 years (2014–15 to 2023–24). Only 2023–24 freight volumes are displayed in the figure.

In some cases the statistics for several nearby ports are included in one heading, mainly because of difficulties in clearly identifying exact freight origins and destinations. The full list of ports and grouped ports/terminals/facilities is in "Appendix A: Australian ports". For example, Sydney in this report includes Port Botany, Botany Bay, Gore Bay, Glebe Island, Kurnell, Port Jackson and White Bay. Fremantle in this report also includes Kwinana.
