6. International Airlines Own Stopover Revenue Passengers, Australian City Pairs	31
7. Total Aircraft Movements at Australian International Airports by Aircraft Types	32
Explanatory Notes	33-35
Data Issues and Notes on Airline Services	36

HIGHLIGHTS – YEAR ENDED DECEMBER 2021

- Fifty-four international scheduled airlines operated services to/from Australia during the year (includes five dedicated freight airlines but excludes airlines operating only via code share arrangements). Forty-three airlines operated passenger air services during the year compared to fifty-nine in 2019.
- International scheduled passenger traffic in 2021 was 1.556 million compared to 9.302 million in 2020 and 42.508 million in 2019. The decrease compared to 2019 is 96.3 per cent. International air services have been severely impacted by travel restrictions introduced at the end of March 2020 due to the COVID-19 pandemic.
- Chart I shows total passenger traffic for the years 2011 to 2021. Over this period, each year except for 2020 and 2021 recorded an increase in traffic compared to the previous year.
- Chart II compares monthly passenger traffic for 2021 with monthly passenger traffic for 2020 and 2019.
- Chart III shows the airline market shares in terms of passenger carriage for the top ten airlines for 2011, 2016 and 2021. In the latest year, Air New Zealand had the largest share of the market with 22.9 per cent followed by Singapore Airlines and Qantas Airways with 12.9 per cent, Qatar Airways with 9.3 per cent and Emirates with 8.8 per cent.
- Compared to 2011, Air New Zealand's share has increased by 14.6 percentage points, Singapore Airlines' share has increased by 3.9 percentage points, Qantas Airways' share has decreased by 5.3 percentage points, Qatar Airways' share has increased by 8.8 percentage points and Emirates' share has increased by 0.9 percentage points.
- The decrease in share of passenger traffic for the Qantas group (Qantas Airways, Jetstar and Jetstar Asia) was 10.7 percentage points compared to 2011.
- The share of passenger traffic accounted for by Australian designated airlines decreased from 33.1 per cent in 2011 to 29.0 per cent in 2016 and was down to 16.0 per cent in 2021. Qantas Airways, Jetstar and Virgin Australia contributed to the Australian airline share in 2021.
- Seats made available on international scheduled operations in 2021 totaled 7.259 million compared to 14.902 million in 2020 and 53.627 million in 2019. The overall seat utilisation percentage has decreased from 81.3 per cent in 2019 to 64.3 per cent in 2020 and to 21.4 per cent in 2021.
- In 2019, Low Cost Carriers AirAsia X, Cebu Pacific Air, Citilink Indonesia, Indonesia AirAsia, Jetstar, Jetstar Asia, Scoot Tigerair and Thai AirAsia X together accounted for 14.6 per cent of total international passenger traffic. In 2021 the Low Cost Carrier share was 4.6 per cent with only AirAsia X, Jetstar, Jetstar Asia and Scoot Tigerair having carried passengers.
- International scheduled air freight traffic was 946 255 tonnes in 2021, 894 715 tonnes in 2020 and 1 102 785 tonnes in 2019. The decrease for the latest year compared to 2019 was 14.2 per cent. Compared to 2019, inbound freight decreased by 1.9 per cent to 527 302 tonnes and outbound freight decreased by 25.9 per cent to 418 953 tonnes.
- In 2021, scheduled dedicated freighter operations accounted for 72.0 per cent of scheduled inbound air freight to Australia, 62.9 per cent of scheduled outbound air freight from Australia and 68.0 per cent of total scheduled air freight. Several airlines

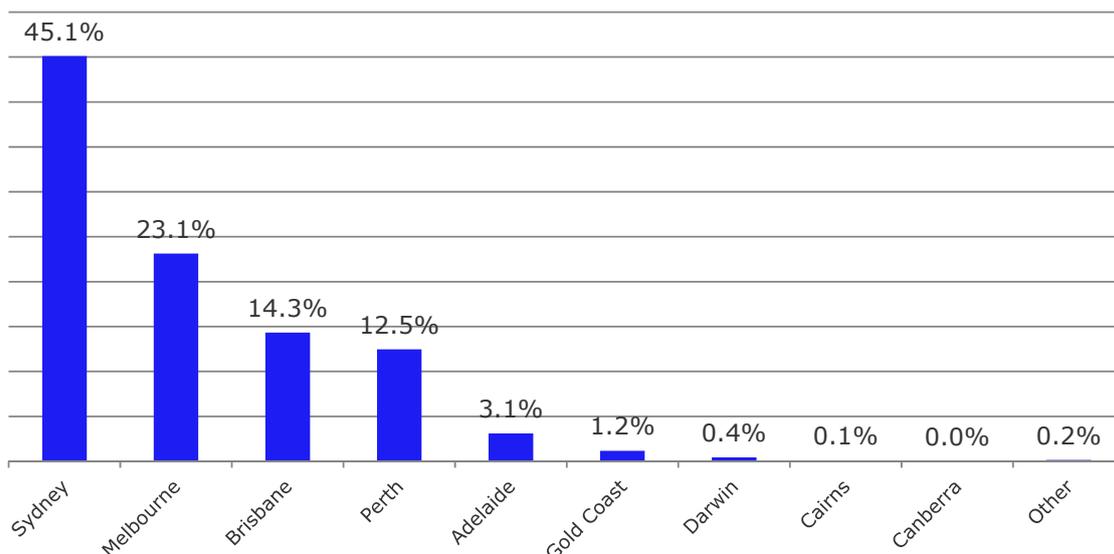

are only operating freight-only services to and from Australia during the period impacted by COVID-19 while suspending passenger air services. During the COVID-19 period, scheduled air services that did not carry passengers have been recorded as dedicated freighters. For comparison, in 2019 dedicated freighters carried 21.9 per cent of inbound, 14.2 per cent of outbound and 17.9 per cent of total scheduled air freight.

- Table VI on page 9 shows Traffic On Board passenger movements, flights and operated seats at Australian international airports. All traffic is shown against the first Australian airport for arrivals to Australia and the last Australian airport for departures from Australia. Movements between Australian airports are not accounted for.
- Table VII on page 10 shows Traffic On Board passenger movements, flights and operated seats between Australia and the top countries with non-stop air service connections. New Zealand, Singapore, United Arab Emirates, Qatar and USA were the top five countries in terms of traffic on board passenger movements in 2021.
- Table VIII on page 10 shows Traffic On Board passenger movements, flights and operated seats between Australia and the top international cities with non-stop air service connections. In 2021, 25.1 per cent of the passenger movements to/from Australia were either to/from or via Auckland. Singapore was the next largest hub accounting for 15.7 per cent followed by Doha (9.3 per cent), Dubai (8.8 per cent) and Los Angeles (4.4 per cent).
- Page 11 is a diagrammatic representation of Traffic On Board passenger movements, flights and operated seats by region. The region is based on international cities with non-stop air service connections with Australia. In 2021, 34.0 per cent of the 7.259 million seats operated to/from Australia were either to/from or via South East Asia. Middle East had 19.9 per cent followed by New Zealand at 15.2 per cent, North East Asia at 14.2 per cent, North America at 9.5 per cent and the other regions accounted for 7.2 per cent.
- The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication.

Table VI Traffic on Board Passenger Movements, Flights and Seats at Australian International Airports - Scheduled International Passenger Services

Chart IV Share of Operated Seats at Australian International Airports - 2021

The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication. The figures above include some adjustments. The data shown here covers non-stop international connections only - it does not include movements between Australian airports. Please see notes on page 14 as well.

* First port of call for arrivals to Australia or last port of call for departures from Australia.

Table VII Traffic on Board Passenger Movements, Flights and Seats on Non-Stop Passenger Services By Country - 2021

The information on Traffic On Board is derived from the uplift/discharge data used to produce the main Tables in this publication.

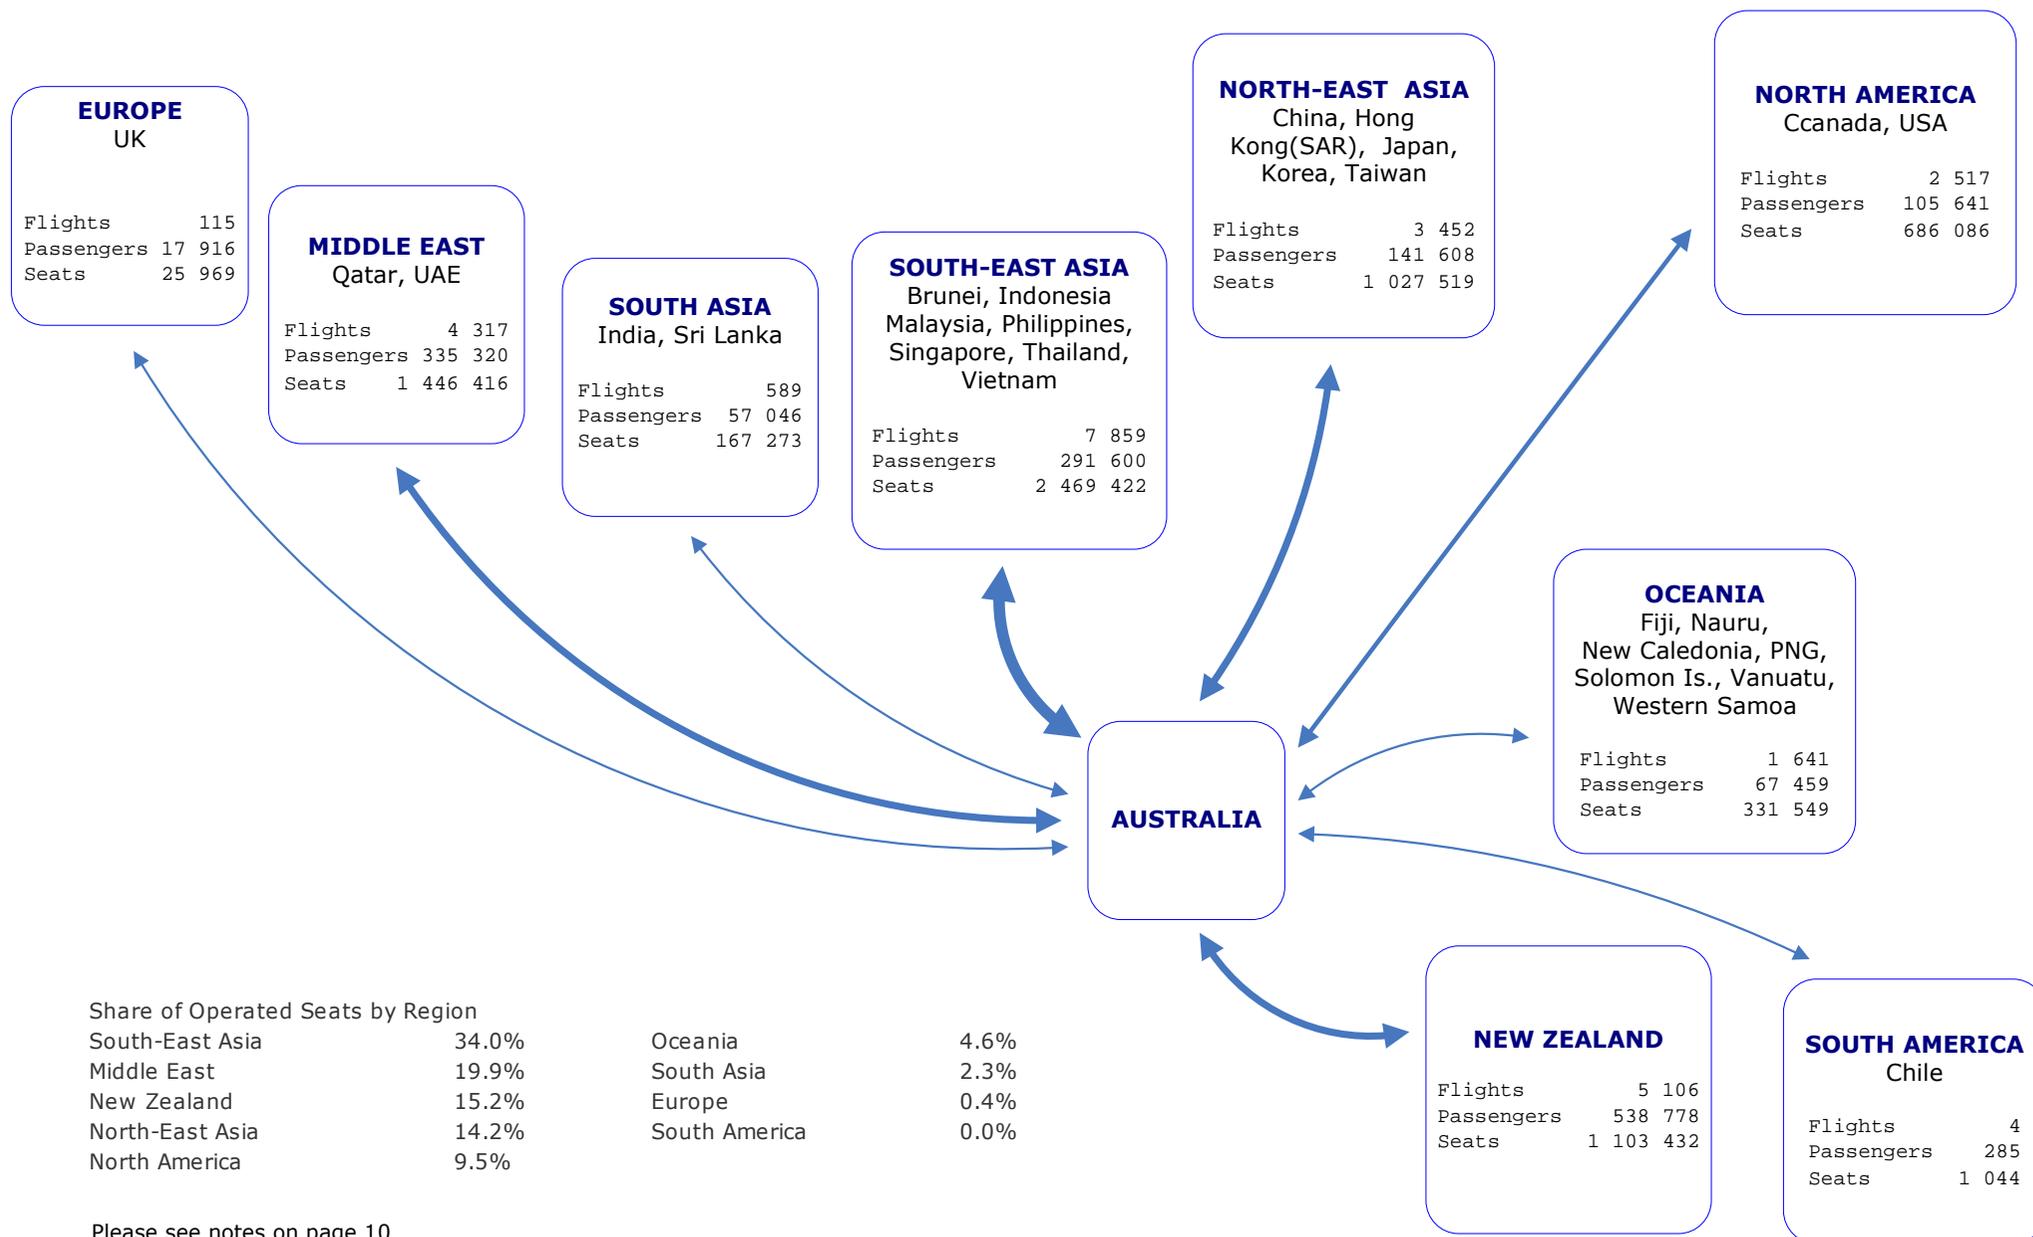

The total number of flights, passenger movements and seats shown correspond to total passenger services reported in Table 3.

Passenger numbers used here for China Airlines, Emirates, Qantas Airways and Singapore Airlines are total carried into and out of Australia.

* First country/port of call for departures from Australia or last country/port of call for arrivals to Australia.

**TRAFFIC ON BOARD PASSENGER MOVEMENTS, FLIGHTS AND SEATS BY REGION
BASED ON NON-STOP SERVICES TO AND FROM AUSTRALIA**

SCHEDULED INTERNATIONAL PASSENGER AIR SERVICES – Year ended December 2021

Please refer to explanatory notes - paragraphs 4, 5, and 7 in particular.

Several airlines have suspended all scheduled services or are only operating freight-only services to and from Australia during the period impacted by COVID-19. Seat Factors shown in this table:

Traffic shown in this table for China Airlines, Emirates, Qantas Airways and Singapore Airlines may differ from traffic shown in Tables 1 and 2 because of the inclusion in this table of total traffic into and ex Australia (for seat factor purposes) whereas Tables 1 and 2 include uplift/discharge traffic only. All other airlines report uplift/discharge traffic only. Currently, there are no other airlines operating via Australia, and therefore uplift/discharge traffic is the same as total traffic into and ex Australia for all other airlines.

Available seats have not been counted where passenger aircraft have been used to operate freight only services. However, this adjustment cannot be made for airlines that report monthly aggregates and that have operated a mix of passenger and freight only services using passenger aircraft.

(a) Freight flights only.

**TABLE 6 INTERNATIONAL AIRLINES OWN STOPOVER REVENUE PASSENGERS,
AUSTRALIAN CITY PAIRS: Year ended December 2021**

City Pair Route	Total Passengers
TOTAL	0

Notes:

1. Own Stopover Revenue Passengers : The aggregate of revenue passengers uplifted at one Australian airport and discharged (excluding transit passengers) at another Australian airport by the same foreign registered international airline on which they entered or left Australia.
2. City Pair Route represents the aggregation of passengers travelling in both directions.
3. This data is additional to the information presented in tables 1-5 which cover only those passengers travelling to/from overseas airports.

TABLE 7 TOTAL AIRCRAFT MOVEMENTS AT AUSTRALIAN INTERNATIONAL AIRPORTS BY AIRCRAFT TYPES: Year ended December 2021

Airport	Passenger Aircraft									Freighters				All Types

NOTE:

These figures only cover scheduled operations of the airlines listed in this publication. Charter/ferry operations are not included.

During the COVID-19 period, passenger aircraft have been used as freighters but are shown here as passenger aircraft.

Aircraft Types (all series)

Airbus	330	350	380	32S (319, 320, 321)	33F			
Boeing	737	767	777	787	73F	74F	76F	77F
McDonnell Douglas	M1F							
Other:								
Bombardier	DH8							
Fokker	70	100						

EXPLANATORY NOTES

INTRODUCTION

1. This publication continues the series of publications on a calendar year basis presenting statistical information on the scheduled operations of international airlines operating into/out of Australia.
2. The figures in this publication were obtained from reports submitted by scheduled international carriers and are the best available at the time of publication.

COVERAGE

3. These statistics show uplift/discharge data – These data detail, by direction, the revenue traffic between the actual points of uplift and discharge within each flight, aggregated for all flights within the period. It shows the movement of traffic between two airports not necessarily directly connected but within the same flight number. Typically, flight numbers change when an aircraft reaches its home country. This means that uplift/discharge data for the port in the operator's home country are likely to be overstated by traffic whose origin/destination point is beyond that port. For example, uplift/discharge traffic reported in this publication as Singapore could include traffic whose origin/destination is Europe.
4. These statistics cover revenue traffic carried by the operators of scheduled regular public international air transport services only and do not include charter traffic.
5. Flights with no revenue traffic uplifted from Australia or discharged in Australia are treated as positioning flights and are not included in this data collection. This mainly affects dedicated freighter flights where some flights outbound from Australia do not pick up freight in Australia.

PRODUCTION AND INTERPRETATION

6. Tables 1 and 2 show the country of the relevant uplift or discharge port served by that airline. For example, traffic uplifted/discharged between Sydney and Singapore by British Airways would be shown as Singapore traffic in Tables 1 and 2.
7. Table 3 shows figures for the country of service (or route) for each airline and therefore may not equate to the data in Tables 1 and 2. For example, the British Airways UK service identified in Table 3 could include passengers uplifted or discharged in Singapore as well as the UK; these passengers would be shown individually under those countries in Tables 1 and 2. The difference in treatment of data between Tables 1 and 2 and Table 3 is necessary in order to work out a meaningful Seat Utilisation figure for Table 3.

Figures shown in Table 3 may include total traffic into and out of Australia for airlines that fly through Australia (also necessary in order to work out a meaningful Seat Utilisation figure). Therefore, figures in Table 3 may not equate to figures in Tables 1 and 2. For example, passengers carried by Qantas Airways from New Zealand via Australia to the UK will be included in Table 3 but will not be included in Tables 1 or 2 as these passengers were not uplifted/discharged in Australia.

8. Table 5 – shows uplift/discharge passenger and freight data for city pairs with “same flight number” international flight connections.

9. Where figures have been rounded, discrepancies may occur between sums of component items and totals, and in percentage changes which are derived from figures prior to rounding.
10. Published figures may be revised where figures missing at the time of publication are received or misreporting/miscalculation necessitates revisions.

DEFINITIONS

11. The following definitions have been used in this publication:
 - (a) Aircraft Movement: A landing or a take off.
 - (b) Freight: The aggregate of all revenue freight uplifted or discharged in Australia.
 - (c) Inbound: Inbound to Australia/Australian international airport.
 - (d) Mail: The aggregate of all mail uplifted or discharged in Australia.
 - (e) Outbound: Outbound from Australia/Australian international airport.
 - (f) Revenue Passengers: please refer to paragraph 12.
 - (g) Seat Utilisation: The ratio of passengers carried to seats available, expressed as a percentage.
 - (h) Seats Available: Generally based on standard aircraft configuration, the aggregate of seats available on all flights operated over a particular service.
 - (i) Services: Scheduled flights over authorised routes which are listed according to the main ports involved.

COMPARABILITY OF DATA OVER TIME

12. Revenue Passengers:
 - For July 2000 and onwards: All passengers paying any fare (frequent flyer redemption passengers are regarded as revenue passengers). In most cases, Revenue Passengers will now include all passengers excluding Free Of Charge passengers and positioning crew.
 - To December 1999: The aggregate of all passengers paying 25% or more of the standard air fare (as defined by ICAO at the time).
 - January 2000 to June 2000: Transition period.

The Revenue Passenger definition change could result in approximately a three per cent increase in passenger numbers over a full period (month or year).

13. Country and City data – reporting of Uplift/Discharge data by Qantas Airways:
 - Prior to January 2003: Uplift/Discharge within Qantas Airways' international network.
 - For January 2003 and onwards: Uplift/Discharge within flight number – as per the standard definition.

For example, what was reported as Adelaide to London in January 2002 (no direct services between these two cities), would be reported in January 2003 as either Adelaide to Singapore or Melbourne/Sydney to London.

This change was introduced in order to make the data comparable across all airlines operating services to/from Australia.

The effect of this change – comparing data under the two methods of reporting:

- Country of Port data (Tables 1 & 2) – There will be a shift in traffic to countries such as Singapore and United Arab Emirates (from 2013) which are used as hubs and away from countries such as France, Germany and Italy which

previously received traffic channelled through hubs. The total volume of traffic is not affected.

- Country of Service data (Table 3) – no change, as the Uplift/Discharge definition is not applicable to classifying the country of service.
- Australian International Airports (Table 4) – there may be a shift of traffic to the major airports.
- City Pairs (Table 5) – There will be a shift in traffic to cities such as Singapore and Dubai (from 2013) which are used as hubs and away from cities such as Paris, Frankfurt and Rome which previously received traffic channelled through hubs. The total volume of traffic is not affected.
- Prior to the change, statistics reported for city pairs without “same flight number” international flight connections mainly reflected carriage on interconnecting international services by Qantas Airways. That traffic should have been interpreted as increasing the volume of traffic between the primary international ports rather than as an indicator of traffic volumes between ports without “same flight number” international flight connections. It should be noted however, that there was no double counting of traffic.

14. Country of Service classification by Qantas Airways:

- For July 2002 and onwards: based on the foreign country where same flight number services commence or cease – as per the standard definition. For example, Sydney-Denpasar-Singapore services would be classified as Country of Service = Singapore.
- Prior to July 2002: based on Qantas classification – this mainly affected Indonesia and Singapore Countries of Service. For example, Sydney-Denpasar-Singapore services were classified as Country of Service = Indonesia.

15. Airline data – Reporting of code share services:

Reporting of traffic split by airline code for code share arrangements was discontinued as of June 2000. For July 2000 and onwards, ALL traffic carried is reported under the operating airline regardless of code share arrangements.

Monthly airline market share figures for July 2001 onwards will be comparable with the same month in the previous year. However, these figures may not be comparable with monthly data prior to July 2000.

SYMBOLS AND OTHER USAGE

- nil or zero

DATA ISSUES

During the period impacted by the COVID-19 pandemic, airlines that normally would only operate scheduled air services could also operate charter air services and where charter air services are not clearly identified, they may be included in the data in this publication.

Seat utilisation:

Available seats have not been counted where passenger aircraft have been used to operate freight-only services. However, this adjustment cannot be made for airlines that report monthly aggregates and that have operated a mix of passenger and freight-only services using passenger aircraft.

AIRLINES COMMENCING/WITHDRAWING SERVICES DURING 2021

Several airlines have suspended all scheduled services or are only operating freight-only services to and from Australia during the period impacted by COVID-19.

The following airlines have not operated scheduled air services to/from Australia during 2021:

Air Mauritius
Batik Air Indonesia
British Airways
Citilink Indonesia
Donghai Airlines
Indonesia AirAsia
Pacific Air Express
Samoa Airways
Sichuan Airlines
Silk Air
South African Airways
Tianjin Airlines
