FOREWORD

This report provides an overview of domestic (including charter) commercial aviation activity in Australia for the year ending December 2017.

The data cover revenue passengers carried by Australian-registered operators of scheduled regular public transport services over Australian flight stages and fixed-wing charter operators. These estimates include passengers carried between domestic airports on international flights operated by these carriers. The passengers carried refer to traffic on board by stages.

Estimates of passengers and aircraft movements for charter aviation are included in this publication, where BITRE confidentiality standards are met.

Individual routes shown are restricted to those with an average exceeding 8 000 passengers per month where two or more airlines operate in competition. For the year ending December 2017 there were 66 such routes.

Information on both the total network and the Regular Public Transport (RPT) network for the year ending December 2017 is presented on page 2.

Detailed information on the 66 individual routes can be found in the RPT summary pages 3–10 of this publication.

The top ten airports in terms of RPT passenger movements are shown on page 11.

Data on domestic RPT cargo movements at the top five cargo airports are provided on page 12. The table includes cargo carried on passenger flights operated by the Qantas group (including Jetstar), Virgin Australia, Air North and Skippers as well as the cargo carried by dedicated freighter aircraft operated by Qantas Freight, Toll Priority and Virgin Australia Cargo.

The long-term trends for the top twenty competitive RPT routes are presented graphically on pages 13–22.

Domestic RPT passenger movements at the top 50 regional airports are presented on page 23.

Tables providing estimates of domestic charter aviation activity are shown on page 24. BITRE confidentiality standards restrict publication of detailed airport-level estimates for any Australian airport, with the exception of Perth Airport.

A list of definitions can be found on page 25.

This report was prepared by the Aviation Statistics Section of the Bureau of Infrastructure, Transport and Regional Economics with data provided by airlines.

Estimates are included where data were not available and data presented in this publication may contain revisions to previously published data.

Where figures have been rounded, discrepancies may occur between sums of component items and totals, and in percentage changes which are derived from figures prior to rounding.

HIGHLIGHTS

There were 62.41 million passengers carried on Australian domestic commercial aviation (including charter operations) in the year ending December 2017, an increase of 1.7 per cent compared with the year ending December 2016. In the year ending December 2017 there were 684 681 aircraft trips, a decrease of 0.5 per cent compared to the previous year.

59.98 million passengers were carried on RPT flights in the year ending December 2017, an increase of 1.7 compared with the year ending December 2016.

RPT revenue passenger kilometres (RPKs) performed were 70.01 billion in the year, up 1.0 per cent on the year ending December 2016.

Capacity, measured by available seat kilometres (ASKs), decreased 1.0 per cent compared with the year ending December 2016, to a total of 88.20 billion.

With RPT passenger traffic increasing and capacity decreasing, the industry wide load factor (RPKs/ASKs) increased from 77.8 per cent in the year ending December 2016 to 79.4 per cent in the year ending December 2017. Load factors on individual routes increased on 48 of the 64 RPT routes for which data is available in both years.

In the year ending December 2017, Melbourne – Sydney remained Australia's busiest RPT route with 9.10 million passengers, an increase of 2.2 per cent compared with the year ending December 2016. It was followed by Brisbane – Sydney with 4.75 million passengers (up 1.9 per cent) and Brisbane – Melbourne with 3.54 million passengers (up 1.4 per cent).

The greatest percentage increase in RPT passenger numbers, compared to the year ending December 2016, was on the Brisbane – Proserpine route (up 13.9 per cent). There were large increases on a number of other routes, including Canberra – Melbourne (up 10.4 per cent), Melbourne – Sunshine Coast (up 10.0 per cent), Sunshine Coast – Sydney (up 7.9 per cent) and Darwin – Perth (up 7.6 per cent).

RPT routes with traffic decreases in the year ending December 2017, compared with the year ending December 2016, included Hamilton Island – Sydney (down 26.2 per cent), Brisbane – Gladstone (down 14.9 per cent), Brisbane – Hamilton Island (down 14.0 per cent) and Karratha – Perth (down 11.0 per cent).

In the year ending December 2017, Sydney remained Australia's busiest domestic airport with 27.33 million passenger movements, followed by Melbourne with 25.35 million passenger movements and Brisbane with 17.29 million passenger movements.

Total cargo movements at Australian airports on domestic RPT flights were 454.8 thousand tonnes in the year ending December 2017, an increase of 4.4 per cent compared to the year ending December 2016.

In the year ending December 2017, the number of domestic aviation passengers travelling through regional airports was 24.47 million, 1.7 per cent higher than for the year ending December 2016. Out of the top 50 regional airports, the strongest growth was at Olympic Dam airport (up 36.3 per cent on year ending December 2016), while the largest decrease was at Hamilton Island airport (down 23.0 per cent on year ending December 2016).

Fixed-wing charter operators carried 2.43 million passengers in the year ending December 2017, an increase of 0.7 per cent compared with the year ending December 2016. Perth airport accounted for 37.9 per cent of all charter passengers in Australia.

TOTAL NETWORK

Summary of annual commercial aviation activity

Perth airport charter aircraft movements	31 529	31 229	-1.0

Note: Helicopter, joyflights and sightseeing charter flights not included.

Charter passenger and aircraft movement numbers are the sum of arrivals and departures at each airport.

DEFINITIONS

Aircraft Trips	The number of flight stages. A return flight counts as two aircraft trips.
Airport Movements	Airport movements (passenger and cargo) are measured once on arrival and once on departure. Each domestic trip generates two movements at airports. For example, a trip from Melbourne to Sydney will be counted twice, as a passenger departure at Melbourne and as a passenger arrival at Sydney. At the national level, the sum of all domestic airport traffic will therefore be equal to twice the number of trips undertaken.
Available Seat Kilometres (ASKs)	Calculated by multiplying the number of seats available on each flight stage, by the distance in kilometres between the ports. The distances used are Great Circle Distances.
City-Pair	The ports shown make up the city-pair route. Passenger movements shown for a city pair reflect total traffic in both directions.
Flight Stage	The operation of an aircraft from take-off to landing.
Load Factor	The total revenue passenger kilometres performed as a percentage of the total available seat kilometres.
Passengers Carried	Revenue passengers carried.
Regular Public Transport Services (RPT)	All air service operations in which aircraft are available for the transport of members of public and are conducted in accordance with fixed schedules. It does not include charter or other non-scheduled operations.
Revenue Passengers	All passengers paying any fare. Frequent flyer redemption travellers are regarded as revenue passengers.
Revenue Passenger Kilometres (RPKs)	Calculated by multiplying the number of revenue passengers travelling on each flight stage, by the distance in kilometres between the ports. The distances used are Great Circle Distances.
Traffic on board by stages	The total of all traffic (revenue passengers) on each flight stage between two directly connected airports.
..	Data not included
NA	Not applicable
