

Fatal crashes involving heavy vehicles, Australia — moving annual total

(Each point shows the number of fatal crashes in the preceding 12 months)

a Data unavailable prior to 2004.

Key features

- During the 12 months to the end of September 2010, 250 people died from 209 crashes involving heavy trucks or buses. These included:
 - 153 deaths from 127 crashes involving articulated trucks,
 - 84 deaths from 68 crashes involving heavy rigid trucks,
 - 19 deaths from 18 crashes involving buses ^b.
- Fatal crashes involving articulated trucks:
 - increased by six per cent compared with the corresponding period one year earlier,
 - decreased by an average of 3.4 per cent per year over the three years to September 2010.
- Fatal crashes involving heavy rigid trucks:
 - decreased by 13 per cent compared with the corresponding period one year earlier,
 - decreased by an average of 5.1 per cent per year over the three years to September 2010.

^b Figures sum to more than the total because some crashes involved more than one type of heavy vehicle.

SUPPLEMENT — OCCASIONAL TABLES

Provided here on an occasional basis are selected further analyses of fatal heavy truck crashes. These tables and others like them may be reproduced from the online *Australian Road Deaths Database*^a.

1. Fatal Crashes involving Heavy Trucks by posted speed limit

YE Sep	≤ 50	60 – 80	≥ 90	Total ^b
2004	11	77	135	224
2005	11	73	123	210
2006	7	75	129	212
2007	17	64	123	206
2008	9	83	137	231
2009	15	64	110	190
2010	12	55	121	191

2. Fatal Crashes involving Heavy Trucks by Crashtype

YE Sep	Pedestrian	Single	Multiple	Total
2004	31	33	160	224
2005	24	35	151	210
2006	27	31	154	212
2007	30	34	142	206
2008	30	31	170	231
2009	30	38	122	190
2010	24	22	145	191

3. Crashtype (per cent) by Speed limit — last five years

	≤ 50	60 – 80	≥ 90	Total
Pedestrian	40%	20%	8%	14%
Single	5%	11%	19%	15%
Multiple	55%	70%	74%	71%
Total	100%	100%	100%	100%

^a Rigid truck data fatal crash is current to September 2010. Earlier tables giving vehicle-occupied data are not available using the Online Database.

^b Total includes crashes with unknown or unrecorded posted speed limit.

APPENDIX

Glossary Note. The following definitions are general explanations only. The precise definitions vary across the organisations that provide the source data. These differences may result in minor inconsistencies between jurisdictions for some variables.

<i>Articulated truck</i>	A motor vehicle constructed primarily for load carrying, consisting of a prime mover that has no significant load carrying area but with a turntable device which can be linked to one or more
<i>Bus</i>	A motor vehicle constructed for the carriage of passengers which has at least 10 seats, including the driver's seat.
<i>Crash</i>	Any apparently unpremeditated event reported to police, or other relevant authority, and resulting in death, injury or property damage attributable to the movement of a road vehicle on a public road.
<i>Death</i>	A person who dies within 30 days of a crash as a result of injuries received in that crash.
<i>Fatal crash</i>	A crash for which there is at least one death.
<i>Gross Vehicle Mass (GVM)</i>	Tare weight (i.e. unladen weight) of the motor vehicle plus its maximum carrying capacity excluding trailers.
<i>Heavy rigid truck</i>	A motor vehicle of GVM greater than 4.5 tonnes constructed with a load carrying area. Includes a rigid truck with a tow bar, draw bar or other non-articulated coupling on the rear of the vehicle.

Preliminary data Data for recent months are preliminary and subject to revision.

Estimation of three year trends In this bulletin, the figures for the 'Average annual per cent change over 3 years' are calculated by fitting an exponential trend line to the last four data points (years 0 to 3). The Excel function LOGEST performs the fit. The resulting trend line represents a constant annual percent change over the period. An example is given below:

Cell Ref.	A	B	C
	Year	Deaths	% change
1	0	300	
2	1	280	-7%
3	2	290	4%
4	3	275	-5%
Average annual change =			-2.2%

Average annual change = INDEX (LOGEST (B1:B4 , A1:A4) , 1) -1 = -2.2%

Data Sources The data presented here are obtained from the following sources:

- Roads and Traffic Authority, New South Wales
- Vicroads
- Department of Transport and Main Roads Queensland
- Department for Transport, Energy and Infrastructure, South Australia
- Western Australia Police
- Department of Infrastructure, Energy and Resources, Tasmania
- Department of Lands and Planning, Northern Territory
- Territory and Municipal Services, Australian Capital Territory
